Section 1: Introduction

Market Analyst Professionals, LLC (MAP) has prepared the following report to determine the market feasibility of an affordable housing project located in Gaffney, South Carolina. The subject proposal is described in detail in Section 3. The study assumes Low Income Housing Tax Credits will be utilized in financing the subject property. The market study was prepared in accordance with South Carolina State Housing Finance and Development Authority (SCSHFDA) guidelines and industry accepted practices. Information contained within the report is assumed to be trustworthy and reliable. Recommendations and conclusions in the report are based on professional opinion. MAP does not guarantee the data nor assume any liability for any errors in fact, analysis or judgment resulting from the use of the report.

Section 2: Executive Summary

| 2013 EXHIBIT S – 2 SCSHFDA PRIMARY MARKET AREA ANALYSIS SUMMARY: (APPENDIX C) | | | | | | | | | | |

- Based on the analysis within this report, the proposal will be successful as is; no changes are deemed necessary. The market study supports that the subject will fill a housing void for affordable housing within the market. High demand for comparable housing as well as demand statistics offer support for the proposal. The proposal will offer units targeting households at 50 and 60 percent AMI. The site is located near existing residential, demonstrating the site's viability for residential housing. Amenities and employment opportunities are located in close proximity. Local economic conditions deteriorated along with the turmoil in the national economy in 2008 but are showing signs of recovery in terms of year over year employed and positive net jobs in the past four quarters. Additionally, the subject is slated to enter the market after 2014 at which point it is expected that the economy will have entered a more normal growth phase. Households have contracted very modestly in the past decade in the PMA, but are forecasted to increase through 2019. Stabilization in the local economy is evident, which should stabilize or reverse recent contractions in households. Additionally, derived demand statistics based on demographic data suggest sufficient demand to absorb the proposal. Demand statistics also suggest an additional approximately 70 similarly positioned units could enter the market before increasing capture rates above threshold levels; however, absorption would become problematic. Furthermore, supply side data indicates rents for the subject will be competitively positioned in the area and the subject will be well positioned in the market and competitive with comparable projects. As a result, the development of the proposal to more adequately serve the PMA's population is appropriate.
- ➤ Between 2000 and 2010, population and households decreased at a modest rate in the PMA Nielsen forecasts a reversal of these declines through 2019 with modest growth over this period.
- The site is a vacant lot located on the south side of Buford Street southwest of the intersection of Liberty Street in a mixed use area. The site is bordered by trees to the southwest. Immediately

adjacent to the west is a church and to the southeast is the corporate office of Hamrick Mills, a textiles company. Across Buford Street to the northeast are single family homes in good condition. Farther removed to the southwest, northwest and northeast are single family and multifamily residential in good condition (including Westwinds Village, a senior only RD project). Farther removed to the southeast is a park and a few commercial buildings. The downtown area is located a short distance to the northeast.

- The overall occupancy rate for the most comparable projects is 96.2 percent, with Iveywood Park, the only LIHTC project in the competitive set reporting 97.9 percent occupancy. This project should be considered the most comparable to the subject given condition and targeting. Rents for the subject are discounted relative to this project for similar AMI targeting and should be considered a value. Among the remaining competitive set projects both projects offer unrestricted units with higher rents relative to the proposal and comparable appeal at Stonecrest Apartments but lower appeal at Westwood Apartments, this is evident in the steep discount from market rent for the subject. The proposal offers comparable amenities, construction type and unit sizes to the most comparable facilities (Stonecrest and Iveywood) and superior appeal to Westwood Apartments. The high occupancy among competitive set projects offers evidence of demand for the proposal. Competitive rents and strong demand for affordable housing in the area offer support for the success of the proposal.
- A capture rate of 13.3 percent for the total LIHTC units was determined based on the demand calculations. The capture rate is within the threshold rate of 30 percent. Individual capture rates are also within the 30 percent threshold rate. The capture rates for the proposal should be considered to provide further evidence of potential demand for the subject.
- No projects included in the survey were able to cite absorption information. MAP has utilized movership ratios from the American Housing Survey as well as estimated "capture" rates among these income eligible households to estimate absorption. Based on the limited number of new rental projects, the quality of unit offered and the competitive rents at the subject, the proposal can expect to capture a large percentage of eligible movers. Based on these estimates MAP projects an absorption period of to 7 to 8 months.

The introduction of the proposal will have no long-term negative impact on existing surveyed LIHTC projects. Strong demand is evident among existing competitive set projects with reported occupancy at the only LIHTC project of 97.9 percent. Strong demand in the overall rental market and ongoing obsolescence of existing units and moderate household growth in the area will fuel demand for the subject.

Section 3: Project Description

Name: Liberty Station Apartments

Address: SW of Buford and Liberty Streets

Gaffney, SC 29341

Section 4: Site Profile

Date of Inspection: 2/18/2014

Acreage: 5.45

Total Residential Buildings: 4

Density: 1.4

(Acres/Building)

Topography: Vacant land

Adjacent Land Uses: Impact:

North: Single-family homes Favorable
East: Office Neutral
South: Wooded lot Favorable
West: Church Neutral

City and Neighborhood Characteristics

The subject is located in the city of Gaffney, South Carolina. Gaffney is the county seat of Cherokee County and is located 20 miles northeast of Spartanburg, South Carolina and 50 miles southwest of Charlotte, North Carolina.

The site is a vacant lot located on the south side of Buford Street southwest of the intersection of Liberty Street in a mixed use area. The site is bordered by trees to the southwest. Immediately adjacent to the west is a church and to the southeast is the corporate office of Hamrick Mills, a textiles company. Across Buford Street to the northeast are single family homes in good condition. Farther removed to the southwest, northwest and northeast are single family and multifamily residential in good condition (including Westwinds Village, a senior only RD project. Farther removed to the southeast is a park and a few commercial buildings. The downtown area is located a short distance to the northeast.

Visibility and Accessibility of the Site

The site is located in a primarily residential area, away from main thoroughfares. The subject will be easily visible from Buford Street and accessibility will be good. Marketing efforts will be critical to draw potential tenants to the site, but other projects in the survey in less trafficked areas have reported

high occupancy. It is assumed an experienced management company, familiar with LIHTC guidelines and initial project lease ups, will manage the project.

Marketability of Proposal

The site is located in an area attractive to its targeted tenants. The project's adjacency to multi-family residential and proximity to single-family residential demonstrate the site's viability for residential use. It is located a short distance from retail and service amenities and offers easy access to roadways that provide linkages to the greater area.

Neighborhood Amenities/Retail/Services

Adequate amenities are located near the site. Commercial concentrations are located along South Granard Street to the southeast and W Floyd Baker Blvd to the northwest. The nearest grocery store is Bi-Lo on W Floyd Baker Blvd, less than .5 miles to the northwest. Other commercial along W Floyd Baker includes Walgreen's, several restaurants and offices, auto parts store, cash advance store, furniture store, hair salon, and post office. CVS/Pharmacy is located at the intersection of Buford and Granard, .5 miles southeast. Also along Granard are county offices, flower shop, tire store, auto parts store, banks, several offices, Family Dollar, dry cleaners, post office, and Ace Hardware.

Health Care

The nearest major hospital is Gaffney Medical Center, less than 2 miles northeast of the site. Gaffney Medical Center provides emergency services, medical services, surgery, maternity and intensive care. In addition, the hospital provides outpatient services including a pain clinic, bariatrics, wound care and sleep disorders studies.

Road or Infrastructure Improvements

Planned or underway projects within Cherokee County according to the South Carolina Department of Transportation include the following:

In Design/Development

Cherokee - Blacksburg Highway (S-83) Bridge over Buffalo Creek

Cherokee - Beech Street (S-41) Bridge over People's Creek

In Construction

Cherokee - Possum Trot Road (S-223) Bridge over Garner Branch

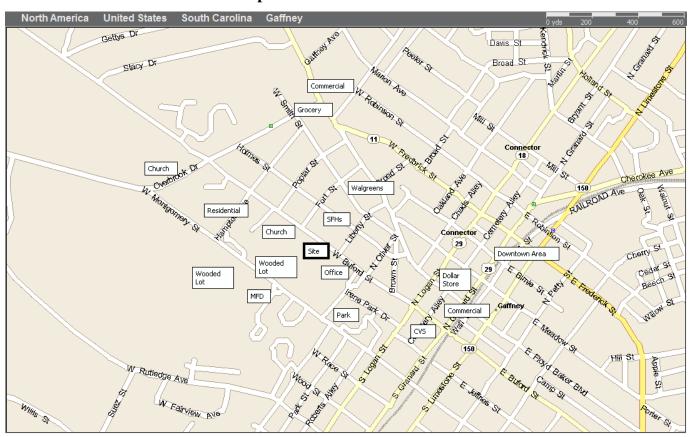

Cherokee - US 29 Bridge over Norfolk Southern R.R.

Crime

A crime index for the area is illustrated below. Total crime risk for the 29341 zip code is slightly higher than the state as a whole for most crime statistics. However, perception of crime is not deemed problematic for the site. The Crime Index score represents the combined risks of crime compared to the national average of 100. A score of 200 indicates twice the national average total crime risk, while 50 indicates half the national risk. The different types of crime are given equal weight in this score. Scores are based on demographic and geographic analyses of crime over seven years.

| | Gaffney | | |

Section 5: Market Area Delineation

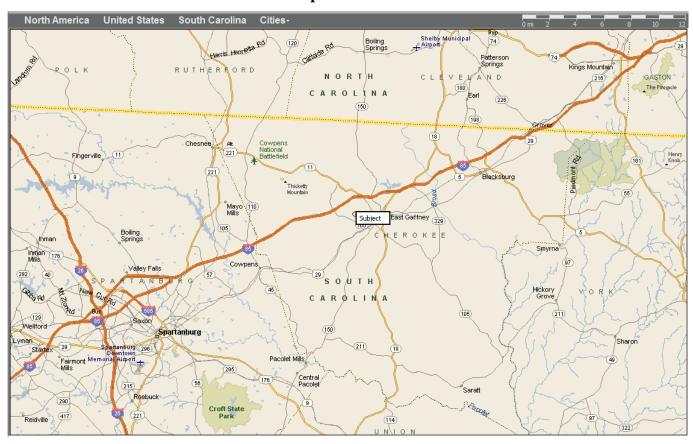

The following demographic information, comparables, and demand analysis are based on the Primary Market Area (PMA) as defined below and outlined in the following maps. The proposal is located in Gaffney, South Carolina, in Census Tract 9702.01 of Cherokee County. For comparison purposes, data pertaining to the city of Gaffney, Cherokee County and the state of South Carolina where appropriate have also been included throughout the analysis.

Census Tracts were used to define the PMA. The county border forms the boundaries of the PMA to the north and the river to the east. To the west Census Tract boundaries form the boundaries of the PMA. The farthest boundary of the PMA is approximately 10.3 miles from the site to the southeast. From the site, the PMA extends approximately 7 miles to the north, 4 miles to the west, less than 4.5 miles to the east and 8.7 miles to the south. Census Tracts defining the market area include:

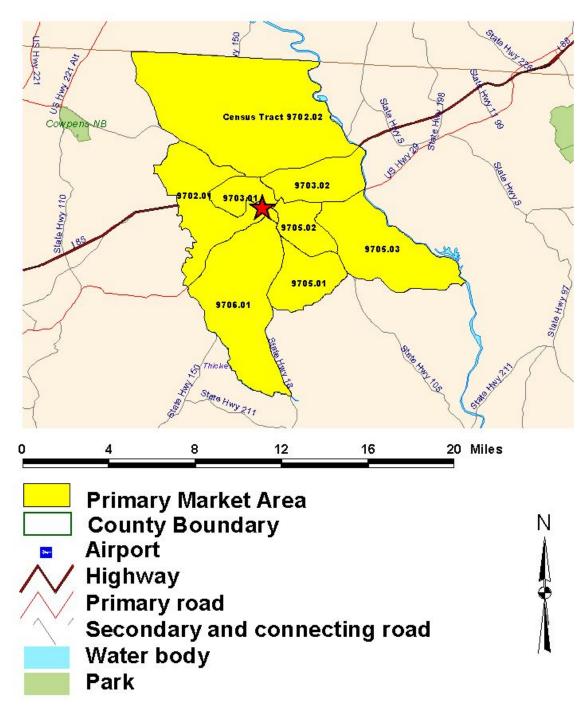

| Census Tract 9701 | Census Tract 9705.01 |
|----------------------|----------------------|
| Census Tract 9702.01 | Census Tract 9705.02 |
| Census Tract 9703.01 | Census Tract 9705.03 |
| Census Tract 9703.02 | Census Tract 9706.01 |

Major factors in defining the PMA were proximity to the site, competition with surrounding areas and socioeconomic conditions. The proposal is a family project, located in Gaffney. Outside of the city there is little development, resulting in little competition for tenants within the county, therefore the PMA should be considered a conservative estimate of demand for the subject. Declining proximity was the primary factor in limiting the PMA to the north and south, while the river forms a natural boundary to the east and increasing competition with Spartanburg limits farther extension to the west.

Macro View

Section 6: Economic Analysis

Economic Overview

The proposal will offer units targeted at low and moderate income households within the Gaffney area. Economic analysis is provided for Cherokee County, which is deemed the most important for the area's economic viability. In addition, information for the State of South Carolina and United States are illustrated to put these trends into greater context.

Local economics are largely driven by the national economy, particularly for larger, more urban areas with greater economic diversification. This is visually evident in the unemployment rate comparison presented in the following pages (i.e., movements in the unemployment rate for the United States coincide with state and local movements). While generally moving in tandem with national levels, the unemployment rate in South Carolina has been higher in comparison to national levels in recent years with a dramatic surge evident in 2008--this can be attributed to a continual rise in the labor force combined with a decline in employment. In recent months the unemployment rate within the state has stabilized or reversed owing to an increase in employment outpacing growth in the labor force.

The national economy suffered a credit crisis in 2008, which led to worsening economic conditions including declining consumer confidence, continued pressure on an already fragile housing sector, declining consumer spending and a dramatic decline in automotive purchases all contributing to a worsening in economic conditions throughout the nation. While the credit crisis has largely passed and there are nascent signs of recovery, unemployment throughout the nation remains high relative to recent historical trends, but with renewed optimism among some economists. Analysis throughout this report is based on current economic conditions remaining stable with a more robust recovery beginning in 2014-2015. The effects of a deceleration or stagnation in the economy generally serve to increase demand for affordable housing among those experiencing wage cuts while eliminating from consideration those who become unemployed.

Economic Characteristics and Trends

Gaffney is located within Cherokee County, with the bulk of employment concentrations within the county located within Gaffney. Within the PMA, 45 percent of workers find employment within a less than 15 minute travel time, while an additional 36 percent of workers find employment within a 30 minute radius.

Employee Commute Times

| | City of Gaffney | PMA | County of Cherokee | State of SC |

Industry employment concentrations in the city, county and state are illustrated below with national trends illustrated to put state and local trends into greater context. Locally within the city and PMA employment is more heavily concentrated in manufacturing than the state as a whole, with this concentration offset against a broad range of industries. Employment concentrations in the PMA and county are more concentrated in the production, transportation and material moving sectors relative to the state as a whole.

Industry Employment Concentrations

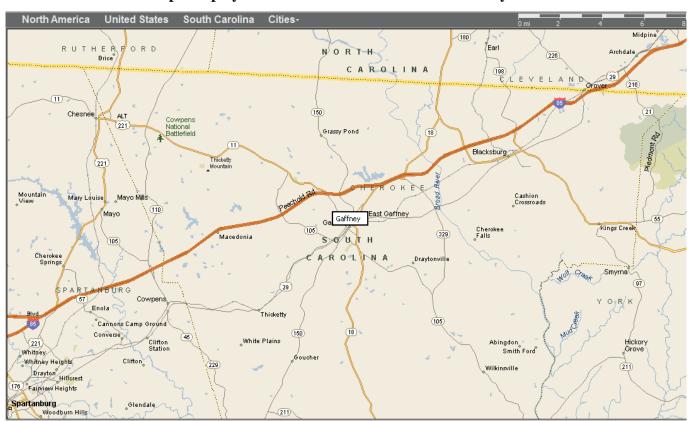

| | City of Gaffney | County of Cherokee | State of SC | USA |
|---|--------------------|-----------------------|----------------|-------|
| Ag, forestry, fishing and hunting, and mining | 1.0% | 0.7% | 1.1% | 1.9% |

Section 7: Demographic Trends and Characteristics

Demographic Overview

Between 2000 and 2010, population and households decreased at a modest rate in the PMA Nielsen forecasts a reversal of these declines through 2019 with modest growth over this period.

Population Characteristics and Trends

Population information for the PMA, Cherokee County and the city of Gaffney is illustrated below. In addition, information for the state of South Carolina is provided to put demographic trends in greater context. Population increased at a tepid rate in the county with declines in other submarkets, including a very negligible change in population in the PMA between 2000 and 2010. Nielsen forecasts a reversal of these declines through 2019 with modest growth over this period in the PMA, indeed growth in the PMA is forecasted to increase at a rate in excess of the county over this period.

| Annualized Change (2010 to 2019) | -0.2% | 0.5% | 0.3% | 0.8% | |

All three submarkets share similar age distribution characteristics with the majority of the population concentrated in the 44 and under age cohorts. The aging of the Baby Boom generation has and will continue to shift the national age distribution toward the 45 and over population segments. This national trend is evident within all three areas here as well with the majority of growth between 2000 and 2010 concentrated in the 45 and over age segments and a forecasted shift to the upper age segments through 2019.

Household Characteristics and Trends

Household growth trends follow similar patterns to those observed in the overall population within all areas. Between 2000 and 2010, households decreased marginally in the PMA and city with tepid growth in the county, lagging the state as a whole. Nielsen forecasts households within the PMA to expand through 2019 at a rate in excess of the county as a whole.

Average household size can reflect economic conditions (with household size increasing during periods of recession) or indicative of the construction of larger units within the area. Consistent with national trends, average household size decreased within the state between 2000 and 2010, but with an increase in all submarkets over this period. Nielsen projections indicate a decline in average household size within all areas except the county through 2019.

Renter penetration rates increased within the PMA between 2000 and 2010 consistent with the financial crisis of 2008 and lasting impacts on home ownership. The increase is consistent with an overall increase in the state as a whole. Renter penetration is the highest within the city at 46.3 percent, and lowest within the county at 31.1 percent. This is consistent with the higher density of the city relative to the county. Nielsen forecasts increasing renter penetration rates in all the PMA through 2019, contributing to ongoing growth in renter households over this period.

Renter Households

Household Income

Median household income within all areas increased at a steady annual rate between 1999 and 2013, decreasing over this period and suggesting a loss of purchasing power. Income levels within the county as a whole are highest among the three submarkets. Nielsen forecasts a continual decline in median income for all submarkets through 2019, with income expected to decrease at a 0.8 percent annual rate within the PMA over this period. While this is consistent with historic growth it is likely overly pessimistic.

Median Household Income

| Annualized Change (1999 to 2019) | -0.8% | -0.8% | -0.8% | 0.9% | |

The income range for the proposed facility is approximately \$18,411 to \$32,760 (in current dollars). Current year data for household income distribution by tenure is not available; consequently results below are based on extrapolations considering household growth and inflation rates. In particular household income distribution based on 2010 Census data is applied to forecasted households for 2016. Additionally these income distributions are inflated to current year dollars based on the Consumer Price Index. Based on these calculations approximately 19 percent of households within the PMA will be income qualified for the proposal.

Household Income Distribution by Tenure PMA

Section 8: Demand Analysis

Utilizing methodology provided by SCSHFDA, demand estimates for the proposal are outlined in the following pages based on qualified income ranges for the proposal. Income ranges are based on an affordability ratio of 35 and 40 percent of income to gross rent for family and senior projects respectively, and maximum LIHTC rents and income limits for Cherokee County. Based on South Carolina requirements, demand estimates are measured from two key sources: new renter household growth and demand from existing households and elderly owner households converting to rentership for senior projects. The resulting calculations are illustrated in the following tables and discussed below.

Demand by bedroom is derived from the individual income ranges by bedroom by income targeting. Specifically, the income range is based on beginning gross rents by bedroom size and maximum income by income target. For three-bedroom and larger units the analysis is further refined taking into account only large size households.

Capture Rates

From the LIHTC demand calculations, capture rates provide an indication of the percentage of annual income-qualified demand necessary for the subject property. Lower capture rates indicate generally deeper markets, thus reducing risk and hastening potential absorption periods.

A capture rate of 13.3 percent for the total LIHTC units was determined based on the demand calculations outlined in the following pages (including renter household growth, substandard units and overburdened rental housing potential). The capture rate is within the threshold rate of 30 percent. Individual capture rates are also within the 30 percent threshold rate. The capture rates for the proposal should be considered to provide further evidence of potential demand for the subject.

Absorption Rate

No projects included in the survey were able to cite absorption information. MAP has utilized movership ratios from the American Housing Survey as well as estimated "capture" rates among these income eligible households to estimate absorption. Based on the limited number of new rental projects, the quality of unit offered and the competitive rents at the subject, the proposal can expect to capture a

large percentage of eligible movers. Based on these estimates MAP projects an absorption period of to 7 to 8 months.

Section 9: Supply Analysis and Characteristics

Local Rental Market Analysis

MAP completed a survey of existing rental projects within the market area in February 2014. Leasing specialists of developments were contacted to identify rental housing trends as well as the most competitive projects within the area. Additionally, the area was surveyed regarding current developments under construction; pipeline projects are detailed below. The overall occupancy rate for the surveyed projects was 97.0 percent with the only LIHTC project reporting 97.9 percent—both rates are indicative of very strong demand for rental housing.

For those facilities providing information, the rental stock surveyed was weighted toward one- and two-bedroom units, which represent approximately 18 and 39 percent, respectively, of the surveyed rental stock. In terms of number of projects, the surveyed rental market is weighted to affordable housing projects. The average build year for the surveyed facilities was 1981.

Comparable Project Analysis

The proposal will be new construction operating under LIHTC guidelines. The most relevant projects for assessing demand for the proposal include units operating under income restriction guidelines in close proximity to the subject. Only one LIHTC project was located in the market area, so the competitive set was expanded to include two market rates projects offering two- and three-bedroom units, (which are also used to gauge hypothetical market rents).

The overall occupancy rate for the most comparable projects is 96.2 percent, with Iveywood Park, the only LIHTC project in the competitive set reporting 97.9 percent occupancy. This project should be considered the most comparable to the subject given condition and targeting. Rents for the subject are discounted relative to this project for similar AMI targeting and should be considered a value. Among the remaining competitive set projects both projects offer unrestricted units with higher rents relative to the proposal and comparable appeal at Stonecrest Apartments but lower appeal at Westwood Apartments, this is evident in the steep discount from market rent for the subject. The proposal offers comparable amenities, construction type and unit sizes to the most comparable facilities (Stonecrest and Iveywood) and superior appeal to Westwood Apartments. The high occupancy among competitive set projects offers

evidence of demand for the proposal. Competitive rents and strong demand for affordable housing in the area offer support for the success of the proposal.

Impact on Existing LIHTC Housing

The introduction of the proposal will have no long-term negative impact on existing surveyed LIHTC projects. Strong demand is evident among existing competitive set projects with reported occupancy at the only LIHTC project of 97.9 percent. Strong demand in the overall rental market and ongoing obsolescence of existing units and moderate household growth in the area will fuel demand for the subject.

Competitive Environment

The housing market throughout most of the nation has deteriorated considerably over the past several years. While this has created buying opportunities in many markets, credit restrictions, particularly for lower income buyers, have made purchasing a home outside the reach of potential buyers. Thus competition between rental and ownership options are limited, making rental housing the most viable option for low- to moderate-income families.

Pipeline Considerations

No comparable units in the planning stages were located within the area.

Market and Achievable Rent

Market and achievable rents for the subject are illustrated below. These rents were estimated based on competitive positioning of the project in the area. An analysis utilizing both LIHTC and market rents is presented on the following page to help illustrate the competitive positioning of the subject and its positioning as a hypothetical market rate project and in comparison to similar LIHTC projects. Rents are adjusted based on appeal (including location, amenities and unit design), included utilities, unit size and where applicable by maximum allowable gross and a minimum 10 percent market advantage. Site location, condition and appeal scores are relative to the subject (i.e., the subject is always rated as 5). Based on these analyses, the subject's rents as proposed would be discounted more than 10 percent from market rents and are consistent with estimated achievable LIHTC rents.

Estimated achievable LIHTC and hypothetical market rent represent an assessment of what a comparable unit is receiving within the market. It is not an endorsement of rent at that level as the project was analyzed considering contract rent. Changes in contract rent will impact absorption, demand statistics and competitive positioning of the proposal and would necessitate additional analysis.

| | AMI Target | Contract Rent | Est. Achievable LIHTC Rent | Est. Market Rent | Market Advantage | |

Section 10: Interviews

Contact: Patterson

Title: Housing Authority Administrator

Agency: Gaffney Housing Authority

Phone Number: 864-489-3193

Area Covered: 4 properties (274 public housing units) - not entire county. Numerous other complexes in Cherokee County

and some may be Section 8 but are privately managed.

Number of Vouchers Issued: Not familiar with the voucher program. Don't have a section 8 program but we manage 274 units.

Number of Vouchers in Use: All units are occupied.

Waiting List: Waiting List is broken down by #of BR and it varies for each.

Number of Persons on Waiting List: For 1Br, over 200 people, maybe 400 total people on waiting list for all unit sizes.

Opinion regarding the demand for affordable rental housing in area?

Contact did not have an opinion.

Contact: Sheila Teague (Tony Lavender, Zoning Administrator was unavailable)

Title: Administrative Assistant to Zoning Administrator

Phone Number: 864.487.8500

Location: 201 North Limestone Street

Gafney, SC 29340

Any multi family rental development under construction or in the pipeline?

Refurbishing an old apartment complex off Chandler Drive

Opinion regarding the demand for affordable rental housing in area?

Demand appears to be moderate

Section 11: Recommendations and Conclusions

Based on the analysis within this report, the proposal will be successful as is; no changes are deemed necessary. The market study supports that the subject will fill a housing void for affordable housing within the market. High demand for comparable housing as well as demand statistics offer support for the proposal. The proposal will offer units targeting households at 50 and 60 percent AMI. The site is located near existing residential, demonstrating the site's viability for residential housing. Amenities and employment opportunities are located in close proximity. Local economic conditions deteriorated along with the turmoil in the national economy in 2008 but are showing signs of recovery in terms of year over year employed and positive net jobs in the past four quarters. Additionally, the subject is slated to enter the market after 2014 at which point it is expected that the economy will have entered a more normal growth phase. Households have contracted very modestly in the past decade in the PMA, but are forecasted to increase through 2019. Stabilization in the local economy is evident, which should stabilize or reverse recent contractions in households. Additionally, derived demand statistics based on demographic data suggest sufficient demand to absorb the proposal. Demand statistics also suggest an additional approximately 70 similarly positioned units could enter the market before increasing capture rates above threshold levels; however, absorption would become problematic. Furthermore, supply side data indicates rents for the subject will be competitively positioned in the area and the subject will be well positioned in the market and competitive with comparable projects. As a result, the development of the proposal to more adequately serve the PMA's population is appropriate.

Section 12: Qualifications of the Market Analyst

CHRIS VANCE

EDUCATION:

Michigan State University

Master of Arts, Economics

- Concentration in Industrial Organization
- Doctorate level curriculum

Oakland University

Bachelor of Science, Economics

- Concentrations in Finance and Computer Science
- Graduated with Honors

EMPLOYMENT HISTORY:

MARKET ANALYST PROFESSIONALS, LLC, a real estate market research company

Founder (12/03 to Present)

- Founder
- Custom report development.

COMMUNITY RESEARCH GROUP, LLC, a real estate market research company.

Market Analyst/Consultant (2/00 to12/03)

- Prepared real estate market feasibility studies considering site characteristics, economic and demographic trends, market forecasts and project guidelines.
- Developed analytical tools and improved methodologies.
- Provided project recommendations based on analysis of market area.
- Gathered information utilizing secondary market research and through personal interviews.

J.D. POWER AND ASSOCIATES, an automotive marketing information firm.

Analyst-Economic Analysis in Forecasting Group (6/98 to 9/99)

Senior Analyst-Economic Analysis in Forecasting Group (9/99 to 2/00)

- Wrote detailed analysis of economic, political and automotive market conditions of global economies for monthly, quarterly and annual reports.
- Developed forecasting models and analytical tools to enhance forecasting capabilities using computer, data collection and analysis skills.
- Analyzed the impact of automotive market dynamics on automotive sales and competition, including pricing and profitability analysis.
- Forecasted economic growth and automotive sales for North and South America and Asia.
- Traveled to Asia and Europe as needed to participate in the company's strategic growth and product positioning decisions.

Section 13: Signed Statement Requirements

I affirm that I have made a physical inspection of the market and surrounding area and the information obtained in the field has been used to determine the need and demand for LIHTC units. I understand that any misrepresentation of this statement may result in the denial of further participation in the South Carolina State Housing Finance and Development Authority's (SCSHFDA) programs. I also affirm that I have no financial interest in the project or current business relationship with the ownership entity and my compensation is not contingent on this project being funded. This report was written according to the SCSHFDA's market study requirements. The information included is accurate and can be relied upon by SCSHFDA to present a true assessment of the low-income housing rental market.

2013 Approved Market Study Provider

Acknowledgment, Release and Waiver of Liability

In consideration for being an approved market study provider, I acknowledge and agree to the following:

- 1. I, Chris Vance, am a duly authorized representative of Market Analyst Professionals. As an approved Market Study Provider for the Low Income Housing Tax Credit Program as administered by the South Carolina State Housing Finance and Development Authority (the "Authority"), my organization may prepare market studies on behalf of developers to be submitted as part of their application for Low Income Housing Tax Credits.
- 2. I understand and agree that any market study and applicable attachments submitted to the Authority are subject to a request for disclosure and I expressly consent to such disclosure on behalf of my organization.
- 3. I understand and agree that the Authority may upload any market study and applicable attachments to its website and I expressly consent to such disclosure on behalf of my organization.
- 4. On behalf of my organization, I agree to release, waive, discharge and covenant not to sue the Authority and its officers, agents, or employees from any and all liability, claims, demands and causes of action whatsoever arising out of or related to the Authority's use or disclosure of any market study and applicable attachments.
