

Project Name: _____

Project Owner Name: _____

I, _____ (owner representative), certify that
_____ (project name) will be designed and
constructed in accordance with the below selected sustainable building certification:

- Enterprise's Enterprise Green Communities certification program (following Enterprise Green Communities protocol under the guidance of an Enterprise Qualified TA provider);
- US Green Building Council's LEED for Homes certification program;
- Home Innovation Research Lab's National Green Building Standard, meeting Bronze level or higher; or
- Southface Energy Institute and Greater Atlanta Home Builders Association's EarthCraft certification programs, based on development type

Owner Certification: The _____ (name of green and/ or energy certification firm/individual) has been selected to oversee the building certification process to ensure the project is constructed in accordance with the selected sustainable building certification. The owner certifies that the project will meet all certification requirements at project completion and that all reports and certification documents will be provided to the Authority with the final inspection request.

Sustainable Building Professional's Certification: I certify that the final plans and specifications will meet the requirements of the selected sustainable building certification. I further certify that I have the appropriate credentials to make this certification and that neither I nor the company I work for have any financial interest in the proposed SRDP application other than in the practice of our profession.

The credentials of the selected green/energy certification individual/firm must be included with this form.
