Date: March 2, 2018

#### INTRODUCTION

Shaw Research & Consulting, LLC has prepared the following rental housing study to examine and analyze the Florence area as it pertains to the market feasibility of The Belmont Apartments, a proposed 32-unit affordable rental housing development targeting low-income family households. The subject proposal is to be located in the central portion of the city just north of Cherokee Road along the west side of Irby Street (one of the main retail/commercial thoroughfares bisecting the city), approximately ½ mile south of Palmetto Street (U.S. 76) and roughly ¾ miles south of downtown Florence. Furthermore, the area immediately surrounding the subject property is primarily commercial with a variety of usages (including grocery, auto repair, insurance, offices, and restaurant). As such, most buildings within the immediate area are in fair to good condition.

The purpose of this report is to analyze the market feasibility of the subject proposal based on the project specifications and site location presented in the following section. Findings and conclusions will be based through an analytic evaluation of demographic trends, recent economic patterns, existing rental housing conditions, detailed fieldwork and site visit, and a demand forecast for rental housing within the Florence market area. All fieldwork and community data collection was conducted on February 16, 2018 by Steven Shaw. A phone survey of existing rental developments identified within the PMA, as well as site visits to those properties deemed most comparable to the subject, was also reviewed to further measure the potential market depth for the subject proposal.

This study assumes Low Income Housing Tax Credits (LIHTC) will be utilized in the development of the subject rental facility, along with the associated rent and income restrictions obtained from the South Carolina State Housing Finance and Development Authority (SCSHFDA). As a result, the proposed The Belmont Apartments will feature a total of 32 units restricted to households at 50 percent and 60 percent of the area median income (AMI). Furthermore, there are no unrestricted (market rate) or project-based rental assistance (PBRA) units proposed within the subject development.

#### **EXECUTIVE SUMMARY**

Based on the information collected and presented within this report, sufficient evidence has been introduced for the successful introduction and absorption of the subject proposal, as described in the following project description, within the Florence market area. As such, the following summary highlights the key findings and conclusions reached from this information:

- 1) The subject proposal is a 32-unit open rental development targeting low-income family households. The facility will consist of a mix of two and three-bedroom units restricted to households at or below 50 percent and 60 percent of AMI.
- 2) Demand estimates for the proposed development show sufficient statistical support for the introduction and absorption of additional rental units within the Florence PMA. Capture rates are presented in Exhibit S-2 (following the executive summary), and are clearly reflective of the continued need for affordable rental housing locally.
- 3) Occupancy rates for affordable rental housing are quite positive throughout the local market area at the current time. As such, an overall occupancy rate of 97.7 percent was calculated among 20 properties included in a January 2018 survey of family rental developments identified and contacted within the PMA.
- 4) Considering only the six existing tax credit developments within the survey, a combined occupancy rate of 97.6 percent was calculated, with five properties reporting a waiting list most of which were quite extensive, providing a clear indication of the acceptance and overall demand for affordable rental options locally.
- 5) The most recent family LIHTC property opened in 2014 and was rapidly absorbed. Palmetto Station was fully leased within two months of opening, and is currently 98 percent occupied with 30 names on a waiting list providing additional evidence of strong affordable housing conditions.
- 6) It should be noted that a similar open tax credit development received an allocation in 2016 –Attwood Pointe is a 52-unit property (consisting of two and three-bedroom units targeted at 50 percent and 60 percent AMI) currently under construction. Even when taking these new units into account, demand estimates demonstrate sufficient market depth for the development of the subject proposal.
- 7) Based on U.S. Census figures and ESRI forecasts, demographic patterns throughout the Florence area have been generally positive since 2000. As such, the overall population within the PMA is estimated to have increased by three percent between 2010 and 2017, representing a gain of nearly 2,700 additional residents during this time. Furthermore, future projections indicate these gains will continue, with an additional increase of two percent (roughly 1,625 persons) anticipated between 2017 and 2022.

8) Considering the subject's proposed unit mix, income targeting, affordable rental rates, and competitive unit sizes and development features, the introduction of The Belmont Apartments should prove successful. Based on positive demographic patterns and continued strong occupancy levels throughout the local rental stock (especially within tax credit properties), additional affordable units should be readily absorbed within the Florence rental market. As such, evidence presented within the market study suggests a normal absorption period (between seven and eight months) should be anticipated based on project characteristics as proposed. Furthermore, the development of the subject proposal will not have any adverse effect on any other existing rental property or those under development – either affordable or market rate.

#### A. PROJECT DESCRIPTION

According to project information supplied by the sponsor of the subject proposal, the analysis presented within this report is based on the following development configuration and assumptions:

Project Name: THE BELMONT APTS

Project Address: 719 S. Irby Street

Project City: Florence, South Carolina

**County:** Florence County

Total Units: 32

Occupancy Type: Family

**Construction Type:** New Construction

Proposed Rental Assistance (PBRA).....None

#### **Project Size:**

| Total Development Size      | 32 units |
|-----------------------------|----------|
| Number of Affordable Units  | 32 units |
| Number of Market Rate Units | 0 units  |
| Number of PBRA Units        | 0 units  |
| Number of Employee Units    | 0 units  |

#### **Development Characteristics:**

| Number of Total Units           | 32 units              |
|---------------------------------|-----------------------|
| Number of Garden Apartments     | 32 units              |
| Number of Townhouses            | 0 units               |
| Number of Residential Buildings | 2 (maximum two story) |
| Number of Community Buildings   | 1                     |
| Exterior Construction           | Minimum 60% Brick     |

#### **Unit Amenities:**

> Frost Free Refrigerator w/ Ice maker

> Oven/Range

> Dishwasher

➤ Microwave over Oven

➤ Ceiling Fan

➤ Range Queen Fire Suppression

> Washer/Dryer Hook-Up

➤ Mini-Blinds/Vertical Blinds

Central Air Conditioning

➤ Walk-In Closet

> Patio/Sunroom

> Individual Entrances

#### **Development Amenities:**

> Community Building

> Multi-Purpose Room w/ Kitchenette

> Equipped Computer Center

> Gazebo

➤ Key FOB for Community Space

- > On-Site Laundry Facility
- > Playground
- > On-Site Management Office
- > Security Cameras
- > Irrigated Landscaping

### **Additional Assumptions:**

- > Water, sewer, and trash removal will be included in the rent. Electricity (including electric heat pump), cable television, internet access, and telephone charges will be paid by the tenant; and
- Market entry is scheduled for early 2020.

#### **B. SITE DESCRIPTION**

#### 1. Site Visit Date

All fieldwork and community data collection was conducted on February 16, 2018 by Steven Shaw.

#### 2. Site Neighborhood and Overview

The subject property is located within the central portion of Florence along the west side of Irby Street (U.S. 52), just north of Cherokee Road and approximately ½ mile south of Palmetto Street (U.S. 76). Downtown Florence is roughly ¾ miles north of the site along Irby Street, representing one of the main retail/commercial corridors bisecting the city. Overall characteristics of the immediate neighborhood are predominantly commercial, with a Piggly Wiggly grocery store and an auto/tire repair shop adjacent to the south of the subject property, an insurance office adjacent to the north, and a restaurant and other commercial properties immediately to the east. Additional nearby retail includes a CVS/Pharmacy and Walgreens situated just south of the site at the intersection of Irby Street and Cherokee Road. Furthermore, the area to the west of the subject is somewhat more diverse, with office buildings (adjacent) followed by single-family homes and a city park. Overall, areas to the west of the subject property are generally residential, while areas to the north and south along Irby Street are largely commercial and retail-oriented - with most nearby structures in generally fair to good condition.

The subject property consists of approximately 2.3 acres of vacant and presently undeveloped property. While the site is partially paved, scattered trees and other vegetation can be found throughout the property, as well. Situated within Census Tract 10.00 of Florence County, the property is currently zoned as AC (Activity Center) - which allows for the development of multi-family units. Based on current usages, zoning throughout the immediate area should not impede or negatively affect the viability of the subject proposal. As such, adjacent land usage is as follows:

**North:** Commercial

**South:** Commercial (*grocery/automotive repair*)

West: Commercial/Office

**East:** Irby Street/Commercial (restaurants)

Primary access to the site will be from Irby Street to the east (representing a well-traveled five-lane roadway and one of the main commercial corridors in Florence), while secondary access will be from Brogdon Street to the north (a lightly-traveled secondary residential street). As such, the subject's location will provide favorable visibility and a generally positive curb appeal, with several retail opportunities and other services within walking distance and most nearby structures (commercial, residential, or otherwise) in fair to good condition. While traffic congestion is evident along Irby Street at certain times of the day, this should be viewed as only a minor factor as site access along Brogdon Street will mitigate any potential ingress/egress issues. Furthermore, the site's proximity and relatively convenient access to much of the area's retail, medical, recreational, and employment locales should be viewed as a positive factor, and suitable for multi-family housing.

#### 3. Nearby Retail

As previously mentioned, several retail opportunities can be found near the subject property, several of which are within walking distance of the site – including a Piggly Wiggly grocery, CVS/Pharmacy, Walgreens, and Dollar General all less than one-third mile away. Numerous additional retail areas are situated along Irby Street, most of which are south of the site – including a Walmart Supercenter, Aldi Food Store, Dollar Tree, and much more within two miles. Other retail concentrations include the Freedom Boulevard/Pamplico Highway intersection to the southeast of the site, as well as along Palmetto Street to the north and west (which traverses downtown Florence and the Magnolia Mall near the I-20/I-95 interchange).

#### 4. Medical Offices and Hospitals

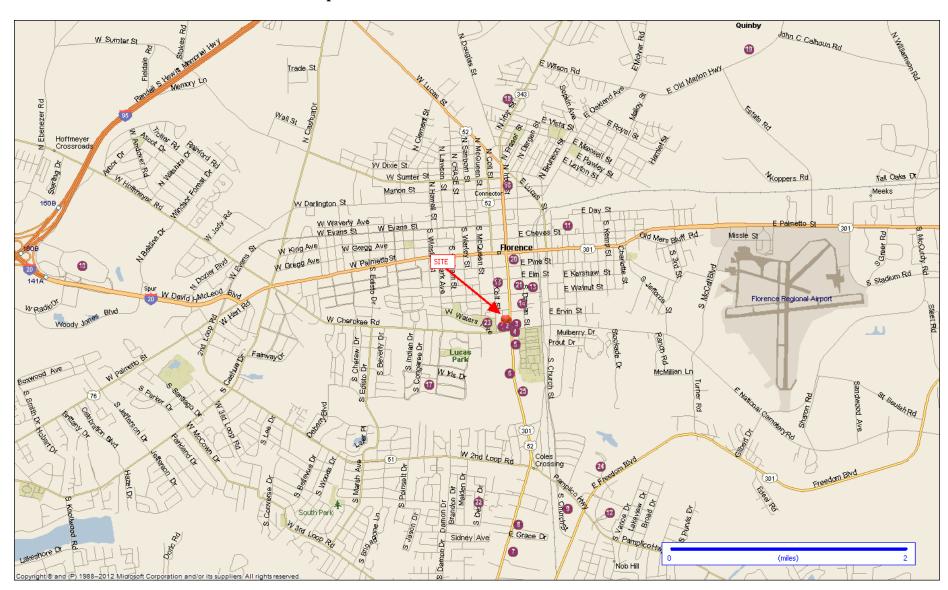

Numerous medical services and physician offices can be found throughout the immediate area as well. There are two full-service hospitals within Florence, including the McLeod Regional Medical Center (one mile northeast of the site) and the Carolinas Hospital System complex (roughly two miles southeast). While numerous physician offices and medical/specialty clinics can be found surrounding each of the hospitals, several medical offices/clinics can be found near the site – including Magnolia Health Care and the Mercy Medicine Clinic, each located less than one-half mile of the site.

#### 5. Other PMA Services

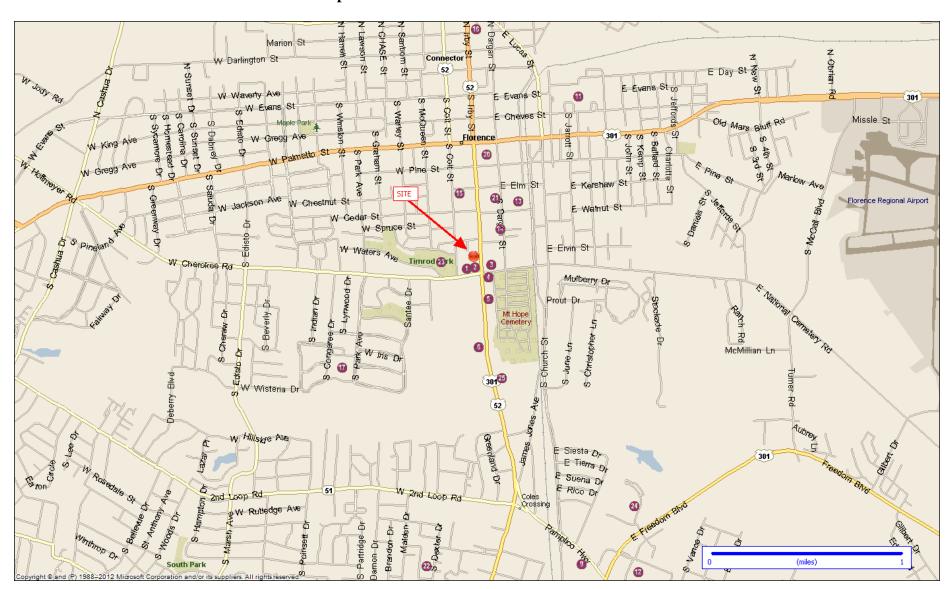

Additional services of note within the market area include a library and several parks and recreation centers. In addition to Timrod Park located just west of the subject property (which has 14 lighted tennis courts, seven pickleball courts, a playground, picnic areas and shelter, fitness area, amphitheater, and nature trails), the Florence Family YMCA is situated approximately two miles to the south, offering activities for residents of all ages. Additionally, scheduled fixed-route bus/transit services are provided locally through Pee Dee Regional Transportation Authority (PDRTA), with several bus stops within walking distance along Irby Street.

The following identifies pertinent locations and features within the Florence market area, and can be found on the following map by the number next to the corresponding description. Please note that this list is not all-inclusive and only represents those locations closest to the subject property. Further, all distances are estimated.

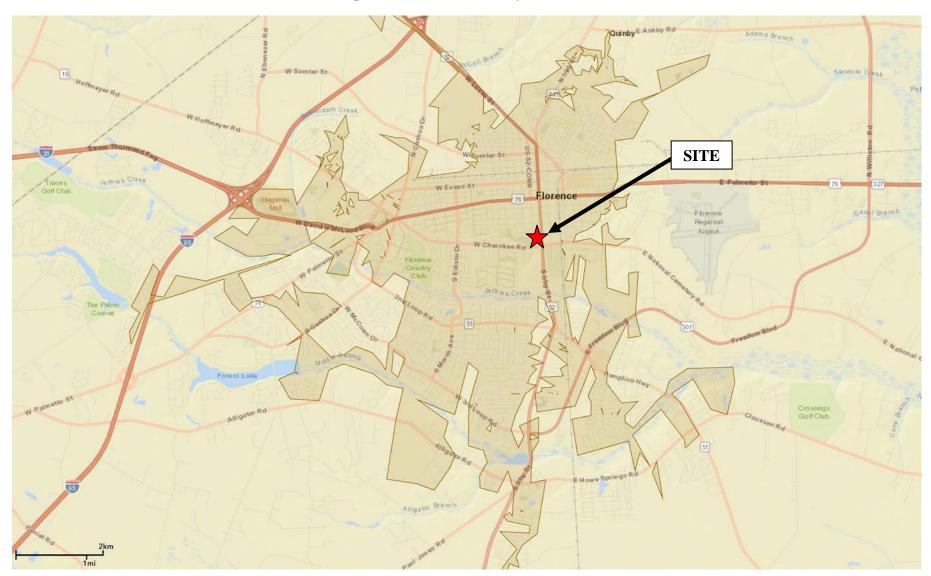

| Retail |   |                     |
|--------|---|---------------------|

#### 6. Crime Assessment

Based on crime information by zip code, the crime rates for the Florence Metro area are notably above state and national levels. However, data for the immediate area of the site are somewhat lower than regional levels. As such, on a scale from one (indicating low crime) to 100 (high crime), the area in which the subject property is situated (zip code 29501) had a violent crime (murder, non-negligent manslaughter, rape, robbery, and aggravated assault) score of 49.2, while the property crime (burglary, larceny-theft, motor vehicle theft, and arson) score was 48.9. As can be seen, violent crime scores are above state and national averages, while property crimes are lower than state norms, but remain higher than national levels.

Although first hand observations from a recent site visit did not indicate a significant crime risk at the subject property or surrounding neighborhood, the elevated crime statistics for the immediate area need to be taken into consideration. As such, extra security precautions should be deemed as a necessary measure to provide a safe environment for potential residents of the subject property (such as extra lighting, surveillance cameras, and/or in-unit alarm systems). Considering these factors as well as information gathered during the site visit, there does not appear to be any noticeable security concerns within the immediate neighborhood surrounding the site.

**Table 1: Crime Risk Index** 

#### 7. Road/Infrastructure Improvements

Based on the site visit and evaluation of the local market area, no significant road work and/or infrastructure improvements were observed near the site that would have any impact (positive or negative) on the marketability or absorption of the subject proposal.

#### 8. Overall Site Conclusions

Overall, the majority of necessary services are situated within a short distance of the site, with a grocery, pharmacy, medical offices, park, and other various services all located within the immediate area (many of which are less than one-half mile away). Furthermore, the site is along one of the city's primary retail/commercial corridors, providing convenient access to downtown Florence and numerous other retail concentrations. Based on a site visit conducted February 16, 2018, overall site characteristics can be viewed as mostly positive, with no significant visible nuances that can have a potentially negative effect on the marketability or absorption of the subject property. The subject property has a generally positive curb appeal, with most nearby properties (residential, commercial, or otherwise) in fair to good condition.

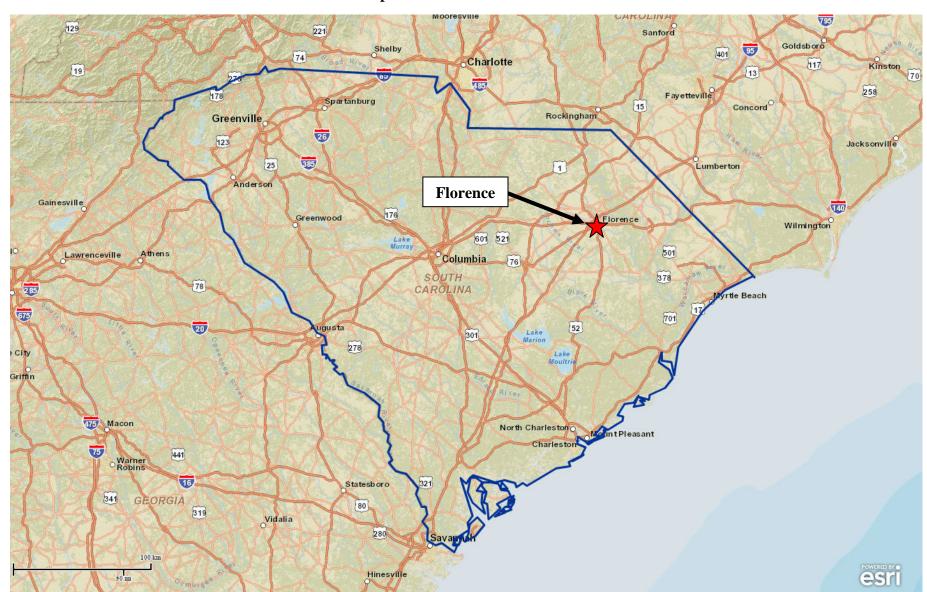

#### C. PRIMARY MARKET AREA DELINEATION

The Primary Market Area (PMA) is defined as the geographic area from which the subject property (either proposed or existing) is expected to draw the *majority* of its residents. For the purpose of this report, the Florence PMA consists of the city of Florence and the immediate surrounding area. More specifically, the PMA is comprised of 21 census tracts and reaches approximately 4½ miles to the north of the site, nine miles to the south, five miles to the east, and roughly seven miles to the west. As such, the aforementioned primary market area delineation can be considered as a realistic indication of the potential draw of the subject proposal based on a positive site location and Florence being the primary economic center of the county and region. Additionally, the site is located near a prime retail area as well as several key roadways (including Irby Street (U.S. 52), Palmetto Street (U.S. 76), Interstate 95, and Interstate 20), each providing relatively convenient access throughout the majority of the PMA and greater Florence area.

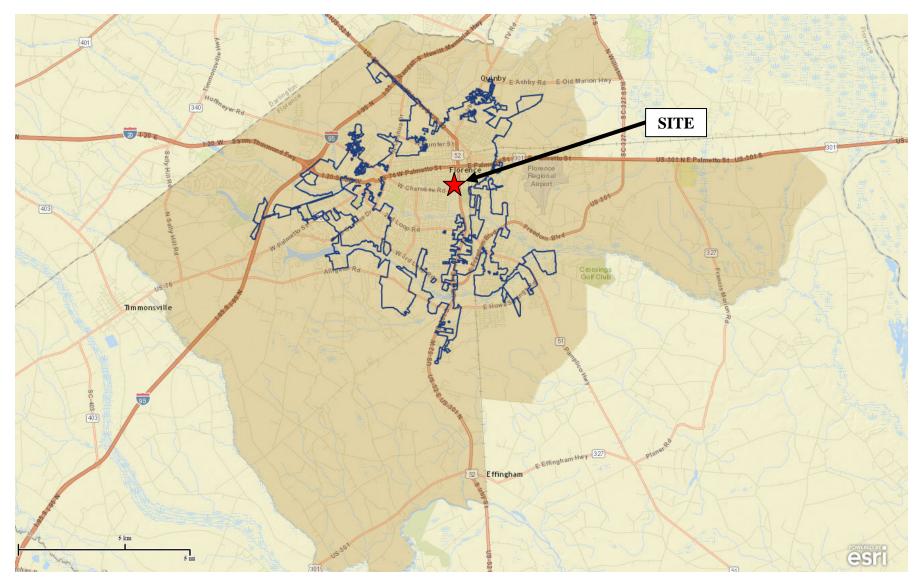

Factors such as socio-economic conditions and patterns, local roadway infrastructure, commuting patterns, physical boundaries, school boundaries, and personal experience were utilized when defining the primary market area. The PMA is comprised of the following census tracts (all within Florence County):

- Tract 1.01 • Tract 5.00 • Tract 9.00 • Tract 13.00 • Tract 15.05 • Tract 1.02 • Tract 6.00 • Tract 10.00\* • Tract 14.00 • Tract 15.06 • Tract 7.00 • Tract 2.01 • Tract 11.00 • Tract 15.03 • Tract 16.01 • Tract 2.02 • Tract 8.00 • Tract 12.00 • Tract 15.04 • Tract 9801
- Tract 3.00

<sup>\*</sup> Site is located in Census Tract 10.00

#### D. MARKET AREA ECONOMY

#### 1. Employment by Industry

According to information from the South Carolina Department of Employment and Workforce, the largest individual employment industry within Florence County was health care/social assistance (22 percent of all jobs), followed by persons employed in retail trade (14 percent), and accommodation/food services (11 percent). Based on a comparison of employment by industry from 2011, a slight majority of industries experienced a net gain over the past five years. Accommodation/food services, administrative/waste services, and health care/social assistance had the largest growth, each increasing by more than 1,000 new jobs between 2011 and 2016. In contrast, industries experiencing the greatest declines during this time include finance/insurance (1,013 fewer jobs) and manufacturing (474 fewer jobs).

#### 2. Commuting Patterns

Based on place of employment (using 2016 American Community Survey data), 84 percent of PMA residents are employed within Florence County, while 16 percent work outside of the county – most of which commute to neighboring Darlington County for employment, as well as Williamsburg and Marion Counties to a lesser extent.

An overwhelming majority of workers throughout Florence County traveled alone to their place of employment, whether it was within the county or commuting outside of the area. According to ACS data, approximately 85 percent of workers within the PMA drove alone to their place of employment, while ten percent carpooled in some manner. Only a very small number (less than three percent) utilized public transportation, walked, or used some other means to get to work.

#### 4. Employment and Unemployment Trends

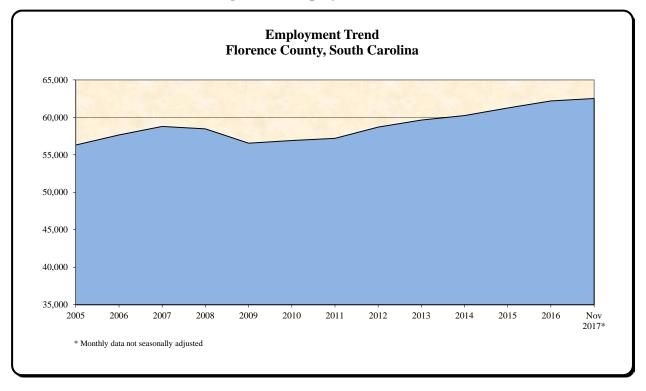

The overall economy throughout Florence County has demonstrated improvement in recent years, with employment increases in each of the last seven years although the unemployment rate has been typically above both the state and national averages. As such, Florence County recorded an overall gain of more than 5,600 jobs since 2010, representing an increase of ten percent (an average annual increase of 1.4 percent). In addition, the annual unemployment rate for 2016 was calculated at 5.1 percent, improving from 6.5 percent in 2015 and representing the county's lowest rate since at least 2005. More recently, the county's November 2017 unemployment rate was 4.2 percent, remaining slightly above both the state and national unemployment rates (at 4.0 and 3.9 percent, respectively).

## E. COMMUNITY DEMOGRAPHIC DATA

#### 1. Population Trends

Based on U.S. Census data and ESRI forecasts, much of Florence County has experienced relatively positive demographic gains since 2010, including Florence and the market area. Overall, the PMA had an estimated population of 89,187 persons in 2017, representing an increase of three percent from 2010 (a gain of nearly 2,700 persons). Additionally, both the city and county increased by a similar three percent between 2010 and 2016.

Future projections indicate continued modest growth with an estimated increase of two percent anticipated within the PMA between 2017 and 2022 (approximately 1,625 additional persons). Both Florence and Florence County are also expected to increase by two percent during this time.

**Table 7: Population Trends (2000 to 2022)**

| Florence PMA           |             | 1.3%        | 0.4%          | 0.4%          | 0.4%          |
| Florence County        |             | 0.9%        | 0.4%          | 0.3%          | 0.3%          |

The largest population group for the PMA in 2010 consisted of persons between the ages of 20 and 44 years, accounting for 33 percent of all persons. In comparison, this age group also represented the largest cohort within both the city and county as a whole. Persons under the age of 20 years also accounted for a relatively large portion of the population in each area. As such, 27 percent of the total population in the PMA was within this age cohort in 2010, while representing nearly identical proportions of the overall city and county populations.

When reviewing distribution patterns between 2000 and 2022, the aging of the population is clearly evident within all three areas analyzed. The proportion of persons under the age of 44 has declined slightly since 2000, and is expected to decrease further through 2022. In contrast, the fastest growing portion of the population base is the older age segments. Within the PMA, persons 55 years and over, which represented 21 percent of the population in 2000, is expected to increase to account for 31 percent of all persons by 2022 – clearly demonstrating the aging of the baby boom generation as the younger age cohorts are anticipated to decline during this time.

Although decreasing somewhat, the steady percentage of population below the age of 45 seen throughout Florence and the PMA (56 percent and 58 percent of all persons in 2022, respectively) signifies positive trends for the subject proposal by continuing to provide a solid base of potential tenants for the subject development.

#### 2. Household Trends

Similar to population patterns, the Florence area has also experienced generally positive household creation since 2000. As such, occupied households within the PMA numbered 34,481 units in 2017, representing an increase of two percent from 2010 (a gain of more than 750 households). ESRI forecasts for 2022 indicate this number will continue to increase slightly, with forecasted growth of two percent (510 additional households) anticipated between 2017 and 2022. In comparison, the number of households grew at a similar rate within Florence and Florence County between 2010 and 2017 (two percent), demonstrating relatively consistent demographic patterns throughout the region.

Renter-occupied households throughout the market area have also exhibited gains, increasing at rates slightly greater than overall household creation. According to U.S. Census figures and ESRI estimates, a total of 12,130 renter-occupied households are estimated within the PMA for 2017, representing an increase of four percent from 2010 figures (a gain of approximately 440 additional rental units). In addition, a projected increase of two percent (200 additional rental units) is forecast for the PMA between 2017 and 2022.

Overall, a somewhat moderate ratio of renter households exists throughout the Florence market area. For the PMA, the renter household percentage was calculated at 35 percent in 2017, slightly lower than the city ratio (42 percent), and more in line with the county's renter representation (33 percent). Furthermore, it should also be noted that renter propensities within the PMA have increased since 2000, increasing by approximately five percentage points between 2000 and 2017.

As with overall households, renter household sizes for the Florence PMA were generally larger than those reported for Florence, on average. However, in contrast to overall household patterns, average renter sizes actually increased over the past decade – from 2.31 persons per rental unit in 2000 to 2.45 persons per unit in 2010. Despite the increase in average size, the majority of units locally contained just one or two persons (61 percent), with three persons occupying 18 percent of units, and 21 percent of units with four or more persons.

#### 4. Household Income Trends

Income levels throughout the Florence area have experienced somewhat modest gains over the past decade. Overall, much of the county recorded annual gains of between one and two percent between 2000 and 2010, but decreased to less than one percent annually since 2010 for Florence and the PMA. As such, the median household income for 2017 was estimated at \$48,899 for the PMA, which was ten percent greater than that estimated for both the city and county (at \$44,621 and \$44,384, respectively). Furthermore, the PMA figure represents an increase of six percent from 2010 (an average annual increase of 0.9 percent), while the county increased at a somewhat greater rate of 1.4 percent annually.

According to ESRI data, the rate of income growth is forecast to improve somewhat through 2022. As such, it is projected that the median income within the PMA will increase by 2.4 percent annually between 2017 and 2022.

According to the U.S. Census Bureau, approximately 38 percent of all households within the Florence PMA had an annual income of less than \$35,000 in 2016 - the portion of the population with the greatest need for affordable housing options. In comparison, a slightly greater 40 percent of city households also had incomes within this range, while 41 percent of county households had incomes less than \$35,000. As such, with more than one out of every three households within the market area earning less than \$35,000 per year, additional affordable housing options will be well received.

**Table 14: Overall Household Income Distribution (2016)** 

| Income Range           | City of 1  | Florence | Florence     | ce PMA  | Florence | County  |
|------------------------|------------|----------|--------------|---------|----------|---------|

Based on the proposed income targeting and rent levels, the key income range for the subject proposal is \$21,531 to \$36,180 (in current dollars). Utilizing Census information available on household income by tenure, dollar values were inflated to current dollars using the Consumer Price Index calculator from the Bureau of Labor Statistic's website. Based on this data, the targeted income range accounts for a moderate number of low-income households throughout the area. As such, roughly 14 percent of the PMA's owner-occupied household number, and 22 percent of the renter-occupied household figure are within the income-qualified range. Considering the relative density of the PMA, this equates to roughly 5,850 potential income-qualified households for the proposed development, including almost 2,750 incomequalified renter households.

Source: U.S. Census of Population and Housing; BLS CPI Calculator; Shaw Research & Consulting

The 2016 American Community Survey shows that approximately 36 percent of all renter households within the PMA are rent-overburdened; that is, they pay more than 35 percent of their incomes on rent and other housing expenses. As such, this data demonstrates that the need for affordable housing is quite apparent in the PMA, and the income-targeting plan proposed for the subject would clearly help to alleviate this issue.

**Table 16: Renter Overburdened Households (2016)**

Shaw Research & Consulting, LLC

#### F. DEMAND ANALYSIS

#### 1. Demand for Tax Credit Rental Units

Demand calculations for each targeted income level of the subject proposal are illustrated in the following tables. Utilizing SCSHFDA guidelines, demand estimates will be measured from three key sources: household growth, substandard housing, and rent-overburdened households. All demand sources will be income-qualified, based on the targeting plan of the subject proposal and current LIHTC income restrictions as published by SCSHFDA. Demand estimates will be calculated for units designated at each income level targeted in the subject proposal – in this case, at 50 percent and 60 percent of AMI. As such, calculations will be based on the starting rental rate, a 35 percent rent-to-income ratio, and a maximum income of \$36,180 (the 5-person income limit at 60 percent AMI for Florence County). The resulting overall income-eligibility range (expressed in current-year dollars) for each targeted income level is as follows:

|                   | <u>Minimum</u>                        | <u>Maximum</u> |
|-------------------|---------------------------------------|----------------|
| 50 percent of AMI | \$21,531                              | \$30,150       |
| 60 percent of AMI | \$25,509                              | \$36,180       |
| Overall           | , , , , , , , , , , , , , , , , , , , | *              |

- -- .

By applying the income-qualified range and 2020 household forecasts to the current-year household income distribution by tenure (adjusted from 2010 data based on the Labor Statistics' Consumer Price Index), the number of income-qualified households can be calculated. As a result, 22 percent of all renter households within the PMA are estimated to fall within the stated LIHTC qualified income range. More specifically, 13 percent of all renter households are income-qualified for units at 50 percent of AMI, while 17 percent of renters are income-eligible for units restricted at 60 percent of AMI. In addition, it should also be noted that only larger renter households (those with three persons or more) were utilized within the demand calculations.

Based on U.S. Census data and projections from ESRI, approximately 122 additional renter households are anticipated within the PMA between 2017 and 2020. By applying the income-qualified percentage to the overall eligible figure, a demand for 11 tax credit rental units can be calculated as a result of new rental household growth.

Using U.S. Census data on substandard rental housing, it is estimated that approximately four percent of all renter households within the PMA could be considered substandard, either by overcrowding (a greater than 1-to-1 ratio of persons to rooms) or incomplete plumbing facilities (a unit that lacks at least a sink, bathtub, or toilet). Applying this figure, along with the renter propensity and income-qualified percentage, to the number of households currently present in 2010 (the base year utilized within the demand calculations), the tax credit demand resulting from substandard units is calculated at 36 units within the PMA.

And lastly, potential demand for the subject proposal may also arise from those households experiencing rent-overburden, defined by households paying greater than 35 percent of monthly income for rent. Excluding owner-occupied units, an estimate of market potential for the subject proposal based on American Housing Survey data on rent-overburdened households paying more than 35 percent of monthly income for rent is calculated. Using information contained within the American Housing Survey, the percentage of renter households within this overburdened range is reported at approximately 36 percent. Applying this rate to the number of renter households yields a total demand of 368 additional units as a result of rent overburden.

Although there has been no comparable LIHTC multi-family rental developments placed in service since 2017 within the Florence PMA, one property is currently under construction. Therefore, units from Attwood Pointe Apartments (a 52-unit family proposal allocated tax credits in 2016) need to be deducted from the three sources of demand listed previously. As such, combining all above factors results in an overall demand of 363 LIHTC units for 2020.

Calculations by individual bedroom size are also provided utilizing the same methodology. As such, it is clear that sufficient demand exists for the project and each unit type proposed. Therefore, an additional rental housing option for low-income households should receive a positive response due to the positive demographic growth and demand forecasts for the Florence area, as well as strong occupancy levels within existing local affordable rental developments.

**Table 17: Demand Calculation – by Income Targeting**

#### 2. Capture and Absorption Rates

Utilizing information from the demand forecast calculations, capture rates provide an indication of the percentage of annual income-qualified demand necessary for the successful absorption of the subject property. An overall capture rate of 8.8 percent was determined based on the demand calculation (including renter household growth, substandard and/or overburdened units among existing renter households, utilizing larger renter households, and excluding any comparable activity since 2017), providing an indication of the overall general market depth for the subject proposal. More specifically, the capture rate for units restricted at 50 percent AMI was calculated at 3.0 percent, while the 60 percent AMI capture rate was at 9.4 percent. As such, these capture rates provide a relatively positive indication of the need for affordable rental options locally and are well within acceptable industry thresholds and should be considered a positive factor.

Taking into consideration the overall occupancy rates for the Florence PMA, the success and extensive waiting lists at most existing LIHTC developments, the rapid lease-up of the most recent family tax credit property (Palmetto Pointe), and also factoring the current construction of a similar tax credit option (Attwood Pointe), the overall absorption period to reach 93 percent occupancy is estimated at seven to eight months. This is a relatively conservative estimate as compared to the actual absorption of Palmetto Pointe (20+ units per month when it opened in 2014). This determination also takes into consideration a market entry in late 2019/early 2020; a minimum of 20 percent of units pre-leased; and assumes all units will enter the market at approximately the same time. Based on this information, no market-related concerns are present.

#### G. SUPPLY/COMPARABLE RENTAL ANALYSIS

#### 1. Florence PMA Rental Market Characteristics

As part of the rental analysis for the Florence area, a survey of existing rental projects within the Florence primary market area was completed by Shaw Research & Consulting in January 2018. As such, a total of 20 apartment properties were identified and questioned for information such as current rental rates, amenities, and vacancy levels. Results from the survey provide an indication of overall market conditions throughout the area, and are discussed below and illustrated on the following pages.

Considering the developments responding to our survey, a total of 1,670 units were reported, with the majority of units containing two bedrooms. Among the properties providing a specific unit breakdown, 20 percent of all units had one bedroom, 66 percent had two bedrooms, and 14 percent of units contained three bedrooms. There were no studio/efficiency or four-bedroom units reported in the survey. The average age of the rental properties was 16 years old (an average build date of 2002), with four properties built or rehabbed since 2010 – including three tax credit developments. In addition, a total of nine facilities reported to have some sort of income eligibility requirements – with seven tax credit developments and two subsidized projects.

Overall conditions for the Florence rental market appear to be extremely positive at the current time. Among the properties included in the survey, the overall occupancy rate was calculated at 97.7 percent (excluding one LIHTC property which is currently under construction) – with 14 of the 20 developments at 98 percent occupancy or better. When breaking down occupancy rates by financing type, the 11 market rate developments averaged 97.8 percent occupied, the seven tax credit properties (excluding Attwood Pointe) were a combined 97.6 percent occupied, and the two subsidized projects were 97.5 percent occupied – clearly reflective of generally strong conditions for all types of rental options, affordable and market rate.

#### 2. Comparable Rental Market Characteristics

Considering the subject property will be developed utilizing tax credits, Shaw Research has identified six tax credit facilities within the PMA as being most comparable (including one under construction). According to survey results, the combined occupancy rate for these developments was calculated at 98.9 percent, each reporting a waiting list – most of which are quite extensive. Detailed results on rent levels and unit sizes are also illustrated in the tables on the following pages - the average LIHTC rent for a one-bedroom unit was calculated at \$447 per month with an average size of 738 square feet – the resulting average rent per square foot ratio is \$0.61. Further, the average tax credit rent for a two-bedroom unit was \$538 with an average size of 1,002 square feet (an average rent per square foot ratio of \$0.54), while three-bedroom units averaged \$617 and 1,177 square feet (\$0.52 per square foot). In comparison to tax credit averages, the subject proposal's rental rates are overall competitive with somewhat larger than average unit sizes.

The most recent family LIHTC development within Florence opened in 2014, and has been quite successful: **Palmetto Station Apartments** (consisting of 48 two and three-bedroom units) was fully leased in less than two months, and now reports a waiting list of 30 names, demonstrating the strong demand for affordable rental housing locally.

In comparison to other tax credit properties and taking into account utilities (the subject will include water/sewer, whereas some LIHTC projects do not), the subject proposal's rental rates are overall quite competitive. As such, the proposed rents are approximately four percent higher than the 60 percent AMI average, but unit sizes are notably larger (roughly ten percent larger than average). As such, the subject's rent-per-square foot ratios are extremely competitive and are among the most affordable of all LIHTC developments.

From a market standpoint, it is evident that sufficient demand is present for the development of additional affordable tax credit units targeting low-income family households. However, based on prevailing rental rates and income levels, the rent structure is crucial for the long-term viability of any new rental development. As such, considering unit sizes, amenity levels, and rent-per-square foot ratios, the proposed rental rates within the subject are appropriate for the local rental market, and should be considered a positive factor.

#### 3. Comparable Pipeline Units

According to SCSHFDA information and local government officials, there is one comparable LIHTC rental development under construction within the Florence PMA at the current time. Attwood Pointe Apartments received an allocation in 2016 and consists of 52 two and three-bedroom units targeting households at or below 50 percent and 60 percent AMI.

#### 4. Impact on Existing Tax Credit Properties

Based on the strong occupancy rates among LIHTC developments included in the survey (at 98.9 percent), the current construction of a similar tax credit project, and also taking into account the rapid absorption of the most recent family tax credit project (Palmetto Station), the construction of the proposal will not have any adverse impact on existing rental properties or those presently under construction – either affordable or market rate. Considering future demographic growth anticipated for the PMA, as well as the positive characteristics of the immediate area, affordable housing will undoubtedly continue to be in demand locally.

## 5. Competitive Environment

According to Realtor.com, price points are relatively affordable within the immediate area as compared to previous years. However, considering current economic conditions throughout the state and region, home-ownership (especially those homes needing monetary improvement) is not a viable alternative to a large percentage of households in the PMA, especially among the target market for the subject development who have generally lower incomes and a greater likelihood of having credit issues and/or require some level of assistance for housing expenses. As such, the subject will have limited competition with home-ownership options.

#### 6. Market Rent Calculations

Estimated market rents are utilized to determine the approximate rental rates that can be achieved within the local PMA assuming no income restrictions. Based on existing market rate properties that can be considered as most comparable to the subject proposal (based on but not limited to location, target market, building type, and age), rental rates are adjusted according to specific factors as compared to the subject. Adjustment factors include design, location, and condition of the property, construction date, unit and site amenities, unit sizes, and utilities included.

Four properties were selected to determine the estimated market rate, based largely on construction date, location, and building type – these projects include Charles Pointe, Columns at Millstone, Bentree Apartments, and Woodlake Apartments. Using the Rent Comparability Grid on the following pages, the following is a summary of the estimated market rents by bedroom size along with the subject property's corresponding market advantage:

|                     | Proposed<br>Net Rent | Estimated<br>Market Rent | Market<br>Advantage |
|---------------------|----------------------|--------------------------|---------------------|
| Two-Bedroom Units   |                      |                          |                     |
| 50% AMI             | \$512                | \$932                    | 45%                 |
| 60% AMI             | \$628                | \$932                    | 33%                 |
| Three-Bedroom Units |                      |                          |                     |
| 50% AMI             | \$582                | \$1,102                  | 47%                 |
| 60% AMI             | \$717                | \$1,102                  | 35%                 |

#### H. INTERVIEWS

Throughout the course of performing this analysis of the Florence rental market, many individuals were contacted. Based on discussions with local government officials, the following multi-family activity was reported within the PMA at this time:

- 1. **Irby Senior Village** Senior 125 Federal Court
  - a. 2016 allocation
  - b. 40 units LIHTC
  - c. Under construction and expected to open in April/May 2018
- 2. **Attwood Pointe Apartments** Family 201 W. Attwood Avenue
  - a. 2017 allocation
  - b. 52 units LIHTC
  - c. Under construction
- 3. Waterchase Apartments Family 3230 Hoffmeyer Road
  - a. 360 units Affordable/Market
  - b. Under construction

The only activity that can be considered as directly comparable to the subject proposal is Attwood Pointe. However, considering current waiting lists as well as the rapid absorption of the most recent family tax credit property, it is likely that Attwood Pointe will be fully absorbed before the subject enters the market. As such, it will likely have minimal impact on the marketability or absorption of the subject property. The following planning official/department was contacted:

#### 1. Florence, SC -

Contact: Alane Zlotnicki, Planner, Planning Research and Development

Phone: 843-665-2047 Date: 1/19/2018

Additional information was collected during property visits and informal interviews with leasing agents and resident managers throughout the Florence rental market as part of our survey of existing rental housing to collect more specific data. The results of these interviews are presented within the supply section of the market study. Based on these interviews, seven of the eight existing LIHTC reported a waiting list, and no widespread specials/concessions were reported throughout the local rental market.

#### I. CONCLUSIONS/RECOMMENDATIONS

Based on the information collected and reported within this study, sufficient evidence has been presented for the successful introduction and absorption of the subject property, as proposed, within the Florence PMA. Factors supporting the introduction of a newly constructed rental alternative targeted for low-income households include the following:

- 1. Demographic patterns have generally been positive throughout the PMA since 2010 the overall population is estimated to have increased by three percent between 2010 and 2017, representing nearly 2,700 additional persons;
- 2. Overall strong occupancy levels throughout the market area, with an overall occupancy rate of 97.7 percent calculated among 20 properties surveyed;
- 3. Extremely positive occupancy rates within the area's family LIHTC properties, as well. Of the six existing tax credit properties within the survey, a combined occupancy rate of 97.6 percent was calculated with five reporting a waiting list, most of which are quite extensive;
- 4. The most recent family LIHTC development opened in 2014, and was fully leased in less than two months, providing additional evidence of the need for affordable housing;
- 5. The location of the subject property can also be considered a positive factor, with a grocery and pharmacy within walking distance. As such, the site is situated along one of the city's primary retail/commercial corridors, providing direct access to downtown Florence, and generally convenient access to most retail, education, medical, and employment centers throughout the area;
- 6. The proposal represents a modern product with numerous amenities and features at an affordable rental level. As such, coupled with the proposed unit sizes, the rent-per-square foot ratios within the subject are extremely competitive in relation to other local LIHTC properties, and can be considered a positive factor;
- 7. A sufficient statistical demand calculation even considering that a similar LIHTC property (Attwood Pointe) will enter the market sometime in 2018, the absorption period for the subject proposal is estimated at approximately seven to eight months.

As such, the proposed facility should maintain at least a 93 percent occupancy rate into the foreseeable future with no long-term adverse effects on existing local rental facilities – either affordable or market rate. Assuming the subject proposal is developed as described within this analysis, Shaw Research & Consulting can provide a positive recommendation for the proposed development with no reservations or conditions.

## J. SIGNED STATEMENT REQUIREMENTS

I affirm that I have made a physical inspection of the market and surrounding area and that information obtained in the field has been used to determine the need and demand for LIHTC units. I understand that any misrepresentation of this statement may result in the denial of further participation in the South Carolina State Housing Finance & Development Authority's programs. I also affirm that I have no financial interest in the project or current business relationship with the ownership entity and my compensation is not contingent on this project being funded. This report was written according to the SCSHFDA's market study requirements. The information included is accurate and can be relied upon by SCSHFDA to present a true assessment of the low-income housing rental market.

#### L. RESUME

# STEVEN R. SHAW SHAW RESEARCH & CONSULTING, LLC

Mr. Shaw is a principal at Shaw Research and Consulting, LLC. With over twenty-seven years of experience in market research, he has assisted a broad range of clients with the development of various types of housing alternatives throughout the United States, including multi-family rental properties, single-family rental developments, for-sale condominiums, and senior housing options. Clients include developers, federal and state government agencies, non-profit organizations, and financial institutions. Areas of expertise include market study preparation, pre-feasibility analysis, strategic targeting and market identification, customized survey and focus group research, and demographic and economic analysis. Since 2000, Mr. Shaw has reviewed and analyzed housing conditions in nearly 400 markets across 24 states.

Previous to forming Shaw Research in January 2007, he most recently served as partner and Director of Market Research at Community Research Services (2004-2006). In addition, Mr. Shaw also was a partner for Community Research Group (1999-2004), and worked as a market consultant at Community Targeting Associates (1997-1999). Each of these firms provided the same types of services as Shaw Research and Consulting.

Additional market research experience includes serving as manager of automotive analysis for J.D. Power and Associates (1992-1997), a global automotive market research firm based in Troy, Michigan. While serving in this capacity, Mr. Shaw was responsible for identifying market trends and analyzing the automotive sector through proprietary and syndicated analytic reports. During his five-year tenure at J.D. Power, Mr. Shaw developed a strong background in quantitative and qualitative research measurement techniques through the use of mail and phone surveys, focus group interviews, and demographic and psychographic analysis. Previous to J.D. Power, Mr. Shaw was employed as a Senior Market Research Analyst with Target Market Systems (the market research branch of First Centrum Corporation) in East Lansing, Michigan (1990-1992). At TMS, his activities consisted largely of market study preparation for housing projects financed through RHS and MSHDA programs. Other key duties included the strategic targeting and identification of new areas for multi-family and single-family housing development throughout the Midwest.

A 1990 graduate of Michigan State University, Mr. Shaw earned a Bachelor of Arts degree in Marketing with an emphasis in Market Research, while also earning an additional major in Psychology.
