B. PROJECT DESCRIPTION

The subject project involves the new construction of the 56-unit Willow Lake Apartments in Lancaster, South Carolina. The proposed project, which will offer one-, two- and three-bedroom units, will be developed under the Low-Income Housing Tax Credit (LIHTC) and HOME programs and will target households with incomes of up to 50% and 60% of Area Median Household Income (AMHI). The proposed collected rents will be \$395 to \$450 for a one-bedroom unit, \$463 to \$500 for a two-bedroom unit and \$522 to \$600 for a three-bedroom unit. The project is projected to be open in March 2016. Additional details concerning the subject project are as follows:

a. Property Location: 211 North Willow Lake Road

Lancaster, South Carolina 29720

(Lancaster County)

QCT: Yes DDA: No

b. Construction Type:New Construction

c. Occupancy Type: Family

d. Target Income Group: 50% and 60% of AMHI

e. Special Needs Population: Not applicable

f. and h. to j. Unit Configuration and Rents:

AMHI – Area Median Household Income (Lancaster County, SC; 2014)

*Units operating under the HOME program
**HOME Program Limits (Low Home)

g. Number Of Stories/Buildings:Three (3) two- and three-story residential walk-up buildings

k. Project-Based Rental Assistance (Existing or Proposed):

Not applicable

l. Community Amenities:

The subject property will include the following community:

- On-Site Management
- Community Room
- Laundry Facility
- Fitness Center

- Playground
- Computer Center
- Picnic Area
- CCTV

m. Unit Amenities:

Each unit will include the following amenities:

- Electric Range
- Refrigerator
- Dishwasher
- Microwave Oven
- Garbage Disposal
- Central Air Conditioning

- Carpet
- Window Blinds
- Washer/Dryer Hook-Ups
- Ceiling Fan
- Patio/Balcony

n. Parking:

A surface parking lot will be provided at no charge to the tenants

o. Renovations and Current Occupancy:

Not applicable

p. Utility Responsibility:

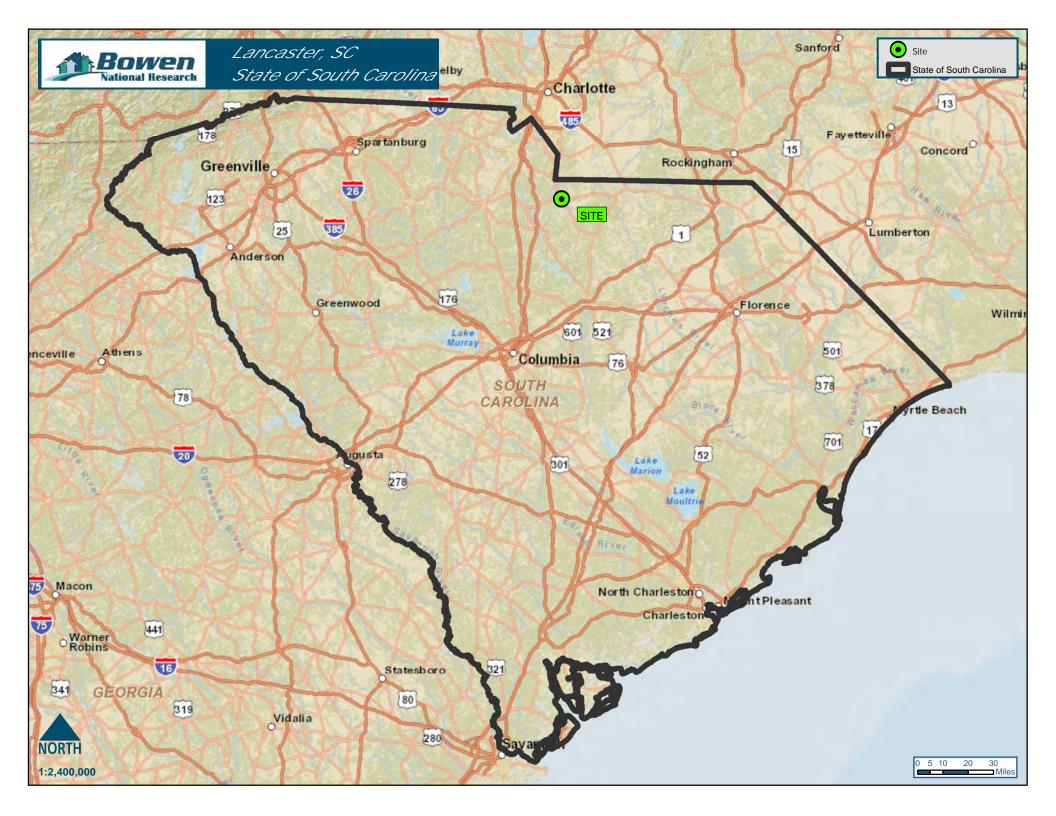

Water, sewer and trash collection will be included in the rent, while tenants will be responsible for all other utilities and services, including the following:

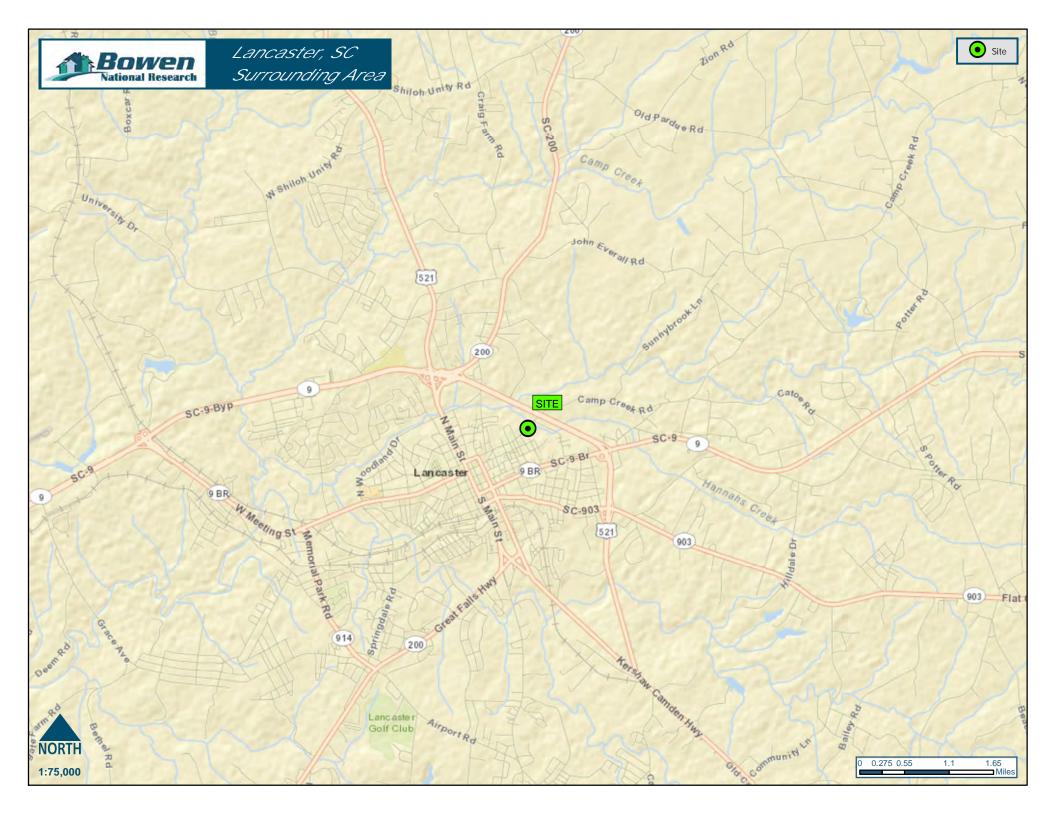

- Electric Heat
- Electric Hot Water

- Electric Cooking
- General Electricity

A state map and an area map are on the following pages.

C. SITE DESCRIPTION AND EVALUATION

1. SITE INSPECTION DATE

Bowen National Research personally inspected the subject site during the week of February 17, 2014. The following is a summary of our site evaluation, including an analysis of the site's proximity to community services.

2. SITE DESCRIPTION AND SURROUNDING LAND USES

The subject site consists of approximately 7.5 acres of wooded located at 211 North Willow Lake Road in Lancaster, South Carolina. Located within Lancaster County, the town of Lancaster is approximately 42.0 miles south of Charlotte, North Carolina and approximately 62.0 miles north of Columbia, South Carolina. Following is a description of surrounding land uses:

| East Meeting Street, a well-traveled four-lane road, borders the |
|--|
| site to the north. This street provides direct access to U.S. |
| Highway (Bypass) 521/State Route 9 to the east and U.S. Highway |
| 521/State Route 200 to the west. North of East Meeting Street is |
| densely wooded land. |
| Densely wooded land borders the eastern portion of the subject |
| site. Farther east is the two-lane residential road Pardue Street. |
| Farther east are several small commercial structures located |
| between Pardue Street and US Highway (Bypass) 521/State Route |
| 9. Notable commercial uses in this area include AutoZone, Bi-Lo, |
| and Tractor Supply Company. |
| East Dunlap Street, a lightly traveled two-lane residential road |
| borders the site to the south. Beyond East Dunlap Street are |
| several older single-family homes that are in fair condition, |
| densely wooded land and the Palmetto Place HUD Section 8 |
| project. |
| North Willow Lake Road (sometimes referred to as North |
| Willowlake Road), is a two-lane residential road that borders the |
| subject site to the west. Along the west side of North Willow |
| Lake Road are established single-family homes in fair condition |
| that extend for several street blocks west towards the downtown |
| Lancaster area. |
| |

The subject site is situated on the south side of East Meeting Street, which is well traveled and provides convenient access to major highways and to the downtown Lancaster area. Additionally, East Meeting Street will also provide the subject site with excellent visibility for passer-by traffic. Although there are

single-family homes and wooded land surrounding the site, there are also a significant number of commercial structures near the site that are within walking distance of the site. This is considered beneficial to the targeted general-occupancy population of the subject site and should contribute to its continued marketability.

3. PROXIMITY TO COMMUNITY SERVICES AND INFRASTRUCTURE

The site is served by the community services detailed in the following table:

| Community Services | Name | Driving Distance From Site (Miles) |
|---------------------------|---|---------------------------------------|
| Major Highway(s) | State Route 521 | 0.2 North |
| 3 2 3 7 | Highway 200 | 1.2 West |
| Public Transportation | N/A | N/A |
| Major Employers/ | Walmart Supercenter | 2.5 West |
| Employment Centers | Lancaster County School District | 1.2 Southwest |
| Convenience Store | Valero | 0.2 North |
| | Quick Stop | 0.4 South |
| Grocery | Bi-Lo | 0.4 North |
| , | Food Lion | 1.3 West |
| | Aldi | 1.5 Northwest |
| Discount Department Store | Dollar General | 1.4 Southwest |
| • | Dollar General | 1.4 West |
| | Walmart Supercenter | 2.5 West |
| Schools: | | |
| Elementary | Clinton Elementary School | 0.6 West |
| Middle/Junior High | A. R. Rucker Middle School | 2.0 East |
| Senior High | Lancaster Senior High School | 1.3 West |
| Hospital/Medical Center | Springs Memorial Hospital | 1.8 West |
| | Carolina Urgent and Family Care | 2.2 West |
| Police | Lancaster Police Department | 0.7 Southwest |
| Fire | Lancaster Fire Department | 0.7 Southwest |
| Post Office | U.S. Post Office | 1.0 West |
| Bank | First Palmetto Savings Bank | 0.9 West |
| | First Citizens Bank & Trust | 0.9 West |
| | Branch Trusting & Trust | 1.0 West |
| Gas Station | Valero | 0.2 North |
| | Quick Stop | 0.4 South |
| Pharmacy | Rite Aid | 0.8 Southwest |
| - | Medicine Mart Pharmacy | 0.8 Southwest |
| | CVS Pharmacy | 0.9 Northwest |
| Restaurant | KFC | 0.2 North |
| | Akina | 0.5 North |
| | La Chalupa | 0.5 Northeast |
| Day Care | Kidz Day Care | 1.6 Northwest |
| | Burbee Place | 1.9 West |
| Library | Lancaster County Library | 1.0 Southwest |
| College/University | University Of South Carolina - Lancaster Campus | 2.3 Northwest |
| Recreational Facility | Native American Studies Center | 0.9 Southwest |

(Continued)

| Community Services | Name | Driving Distance From Site (Miles) |
|--------------------|---------------------------------|---------------------------------------|
| | **** | |
| Fitness Center | Curves | 0.6 Northeast |
| | Fitness Revolution Center | 1.5 Northwest |
| Museum | L & C Railroad Museum | 1.4 Southwest |
| Park | Hughes Street Park | 0.4 Southwest |
| | Buckelew Park | 0.8 Southeast |
| | Andrew Jackson State Park | 10 Northwest |
| Church | Greater Frazier AME Zion Church | 0.2 Southeast |
| | Faith Hope & Victory Church | 0.2 Southwest |
| | First Washington Baptist Church | 0.2 Northeast |

Given that the subject site is in close proximity to U.S Highway 521, the commercial corridor of the Lancaster area, most community services are located within 1.5 mile of the subject site, along U.S. Highway 521. Services along U.S. Highway 521 include Bi-Lo, CVS Pharmacy, Walmart Supercenter, Valero gas station and a convenience store as well as several dining establishments. Note, however, that the closest discount department store is Dollar General, which is located approximately 1.4 miles from the site. While most basic community services are located within driving distance to the subject site, many are accessible within walking distance.

The Lancaster School District serves the subject site as all applicable attendance schools, Clinton Elementary School, A.R. Rucker Middle School, and Lancaster Senior High School are all approximately within 2.0 miles of the subject site. Additionally, all public safety services are provided by the Lancaster Police and Fire Departments which are located within 0.7 miles of the site. The nearest full-service hospital is Springs Memorial located approximately 1.8 miles west of the site while Carolina Urgent and Family Care is located within 2.2 west along State Route 521. Overall, the proximity of most basic community services is considered beneficial to the targeted general-occupancy population of the subject site and should contribute to the marketability of the subject site.

4. <u>SITE PHOTOGRAPHS</u>

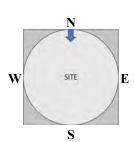

Photographs of the subject site and surrounding land uses are on the following pages.

5. SITE AND COMMUNITY SERVICES MAPS

Maps of the subject site and relevant community services follow.

6. ROAD AND INFRASTRUCTURE IMPROVEMENTS

The subject site is adjacent to North Willow Lake Road and East Meeting Street. According to local planning and zoning officials, no significant road construction or infrastructure improvements are planned for the immediate neighborhood.

7. CRIME ISSUES

The primary source for Crime Risk data is the FBI Uniform Crime Report (UCR). The FBI collects data from each of roughly 16,000 separate law enforcement jurisdictions across the country and compiles this data into the UCR. The most recent update showed an overall coverage rate of 95% of all jurisdictions nationwide with a coverage rate of 97% of all jurisdictions in metropolitan areas.

Applied Geographic Solutions uses the UCR at the jurisdictional level to model each of the seven crime types at other levels of geography. Risk indexes are standardized based on the national average. A Risk Index value of 100 for a particular risk indicates that, for the area, the relative probability of the risk is consistent with the average probability of that risk across the United States.

It should be noted that aggregate indexes for total crime, personal crime and property crime are not weighted, and murder is no more significant statistically in these indexes than petty theft. Thus, caution should be exercised when using them.

Total crime risk (117) for the Site PMA is above the national average with an overall personal crime index of 144 and a property crime index of 113. Total crime risk (108) for Lancaster County is above the national average with indexes for personal and property crime of 134 and 102, respectively.

| | Crime Risk Index | | | | |
|---------------------|------------------|-------------------------|--|--|--|
| | Site PMA | Lancaster County | | | |
| Total Crime | 117 | 108 | | | |
| Personal Crime | 144 | 134 | | | |
| Murder | 111 | 115 | | | |
| Rape | 124 | 120 | | | |
| Robbery | 66 | 63 | | | |
| Assault | 200 | 172 | | | |
| Property Crime | 113 | 102 | | | |
| Burglary | 134 | 127 | | | |
| Larceny | 132 | 111 | | | |
| Motor Vehicle Theft | 55 | 53 | | | |

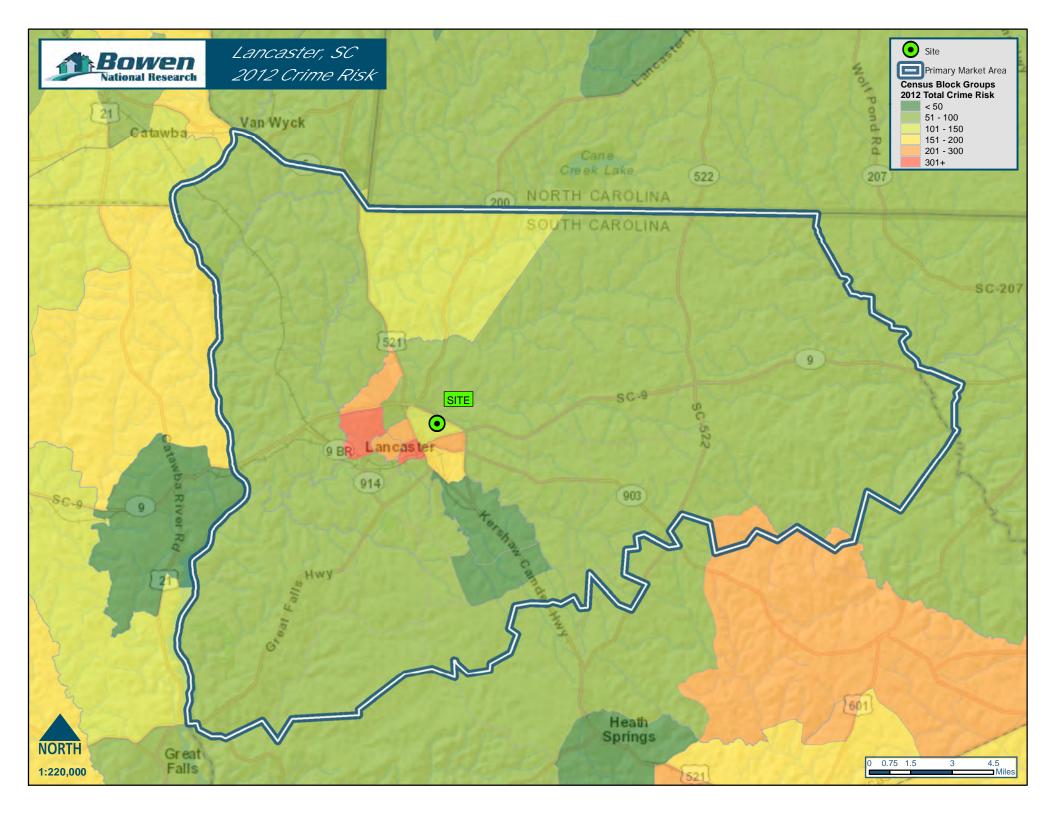

Source: Applied Geographic Solutions

The Site PMA crime index is similar to Lancaster County and national levels and should not have an adverse impact on the proposed subject project's marketability.

A map illustrating crime risk is on the following page.

8. ACCESS AND VISIBILITY

Access to the subject site will be derived primarily from North Willow Lake Road a lightly travelled residential roadway. Ingress and egress are considered easy due to clear lines of site in both directions of traffic. Overall access to the site is considered good due to its convenient access to U.S. Highway 521 and the proximity to State Route 200 as well as a dial-a-ride service available to all residents of County.

Overall visibility of the site is considered good. Unobstructed views of the site are provided in both directions of traffic along North Willow Lake Road and East Meeting Street. The arterial nature of U.S. Highway 521 increases accessibility for the site.

9. VISIBLE OR ENVIRONMENTAL ISSUES

There are power lines bordering the south and west of the site. It is unlikely that these power lines will have a negative impact on the proposed development's marketability.

10. OVERALL SITE CONCLUSIONS

The subject site is located on Willow Lake Road which is a residential roadway. However, it is less than 0.25 miles from U.S. Highway 521 which is a major arterial and the commercial corridor of the Lancaster area. Although there are single-family homes and wooded land surrounding the site, there significant number of commercial structures near the site and therefore most basic community services are within walking distance of the site. This is considered beneficial to low-income households, such as those targeted at the subject project. The site is within a 1.5 mile of most shopping, employment, recreation, entertainment and education opportunities. Social services and public safety services are all within 0.8 miles, and the site has convenient access to major highways. Moreover, the subject project fits in well with surrounding land uses. Visibility and access are considered good. Overall, we expect the site's location and proximity to community services to have a positive impact on its marketability.

D. PRIMARY MARKET AREA DELINEATION

The Site Primary Market Area (PMA) is the geographical area from which comparable properties are located and potential renters for the proposed subject project will originate. It is also the geographic area expected to generate the most demographic support for the subject development. The Lancaster Site PMA was determined through interviews with local property managers, government officials, economic development representatives and the personal observations of our analysts. The personal observations of our analysts include physical and/or socioeconomic differences in the market and a demographic analysis of the area households and population.

Lancaster is the county seat of Lancaster County and has a population of approximately 10,000 according to the 2010 Census. The relatively large size of Lancaster versus surrounding rural towns and its convenient location between two major metropolitan areas makes it an attractive choice for many families. As a result, the proposed subject project should be able to draw support from most of the county.

The Lancaster PMA includes Lancaster, Lancaster Mill, Irwin, Springdale, Elgin and unincorporated areas of Lancaster County. Specifically the boundaries of the Site PMA include Rock Hill Highway 5 and the North Carolina State border to the north; the Lancaster County border to the east; the southern border of zip code 29720 to the south; and the Lancaster County border to the west.

The Site PMA is comprised of the following Census Tracts:

| 101 | 102 | 103 | 104 | 105 |
|--------|-----|--------|-----|--------|
| 106 | 107 | 108 | 109 | 110.01 |
| 110.02 | 111 | 112.02 | - | - |

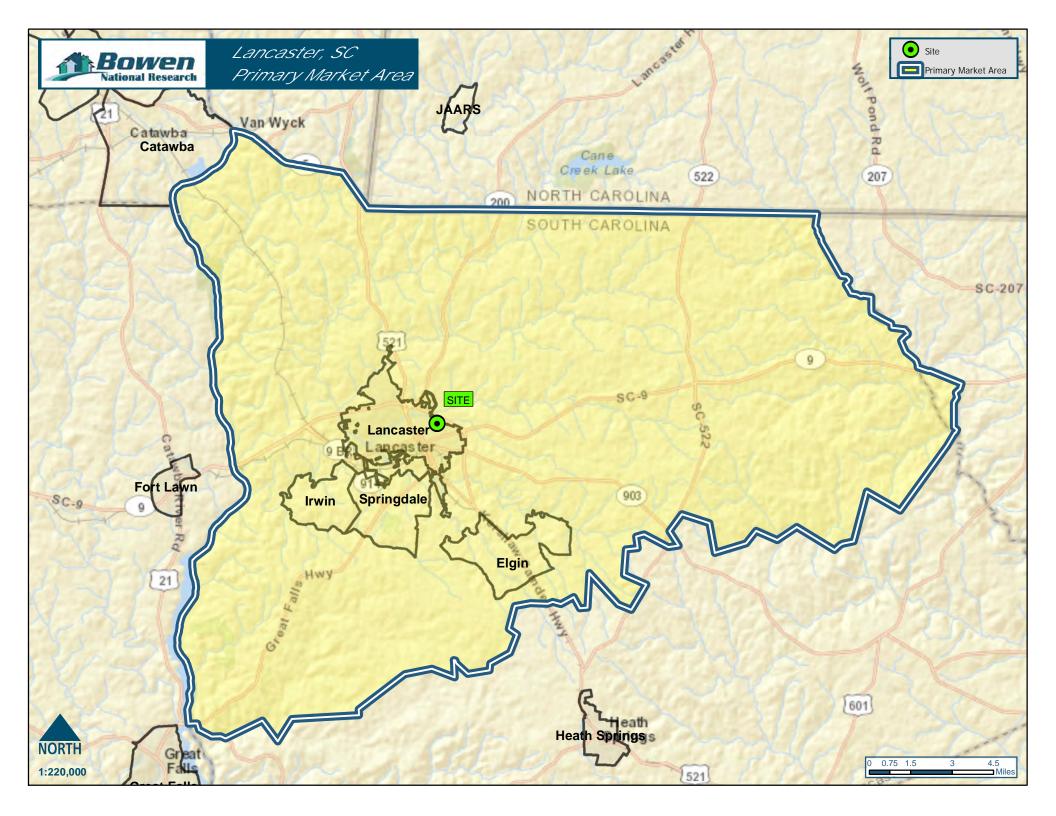

Jan Sanger, Property Manager of Northwest Apartments and Old Hickory Apartments (R.D. 515 projects), stated that the majority of her residents come from the city of Lancaster and from within Lancaster County. She stated that because Lancaster is the largest municipality in the county, county residents are willing to move to Lancaster City because it offers the widest range of community services. Lastly, she stated that she does not get much support from the Rock Hill area. She has had only one person in the last year come from Rock Hill between her two properties.

Marie Johnson, Assistant Property Manager at Palmetto Place (HUD Section 8 project), stated that most of her residents originated from Lancaster city limits and the rest of her residents are from the Lancaster County area. She believes that the Rock Hill area is saturated with affordable options and believes residents of Lancaster County, specifically in the northwest portion of the county, are more apt to move to Rock Hill over Lancaster because it is closer and Rock Hill is more of an affluent municipality.

A map delineating the boundaries of the Site PMA is included on the following page.

E. MARKET AREA ECONOMY

1. EMPLOYMENT BY INDUSTRY

The labor force within the Lancaster Site PMA is based primarily in two sectors. Retail Trade (which comprises 16.3%) and Health Care & Social Assistance comprise over 30% of the Site PMA labor force. Employment in the Lancaster Site PMA, as of 2013, was distributed as follows:

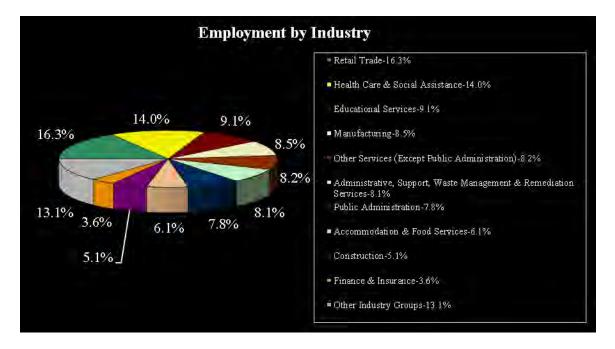

| NAICS Group | Establishments | Percent | Employees | Percent | E.P.E. |
|--|----------------|---------|-----------|---------|--------|
| Agriculture, Forestry, Fishing & Hunting | 38 | 1.9% | 60 | 0.5% | 1.6 |
| Mining | 0 | 0.0% | 0 | 0.0% | 0.0 |
| Utilities | 3 | 0.1% | 77 | 0.6% | 25.7 |
| Construction | 206 | 10.3% | 652 | 5.1% | 3.2 |
| Manufacturing | 71 | 3.5% | 1,085 | 8.5% | 15.3 |
| Wholesale Trade | 54 | 2.7% | 245 | 1.9% | 4.5 |
| Retail Trade | 256 | 12.8% | 2,075 | 16.3% | 8.1 |
| Transportation & Warehousing | 62 | 3.1% | 269 | 2.1% | 4.3 |
| Information | 21 | 1.0% | 258 | 2.0% | 12.3 |
| Finance & Insurance | 73 | 3.6% | 457 | 3.6% | 6.3 |
| Real Estate & Rental & Leasing | 66 | 3.3% | 185 | 1.5% | 2.8 |
| Professional, Scientific & Technical Services | 141 | 7.0% | 421 | 3.3% | 3.0 |
| Management of Companies & Enterprises | 3 | 0.1% | 6 | 0.0% | 2.0 |
| Administrative, Support, Waste Management & Remediation Services | 302 | 15.1% | 1,029 | 8.1% | 3.4 |
| Educational Services | 37 | 1.8% | 1,158 | 9.1% | 31.3 |
| Health Care & Social Assistance | 127 | 6.3% | 1,778 | 14.0% | 14.0 |
| Arts, Entertainment & Recreation | 32 | 1.6% | 140 | 1.1% | 4.4 |
| Accommodation & Food Services | 89 | 4.4% | 772 | 6.1% | 8.7 |
| Other Services (Except Public Administration) | 364 | 18.2% | 1,037 | 8.2% | 2.8 |
| Public Administration | 57 | 2.8% | 994 | 7.8% | 17.4 |

^{*}Source: 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Note: Since this survey is conducted of establishments and not of residents, some employees may not live within the Site PMA. These employees, however, are included in our labor force calculations because their places of employment are located within the Site PMA.

E.P.E. - Average Employees Per Establishment

2. <u>LOW-INCOME EMPLOYMENT OPPORTUNITIES</u>

Typical wages by job category for the Upper Savannah South Carolina Nonmetropolitan Area are compared with those of South Carolina in the following table:

| Typical Wage by Occupation Type | | | | | |
|--|-------------------------------|----------------|--|--|--|
| | Upper Savannah South Carolina | | | | |
| Occupation Type | Nonmetropolitan Area | South Carolina | | | |
| Management Occupations | \$89,000 | \$93,820 | | | |
| Business and Financial Occupations | \$54,060 | \$58,660 | | | |
| Computer and Mathematical Occupations | \$63,240 | \$63,670 | | | |
| Architecture and Engineering Occupations | \$70,310 | \$72,610 | | | |
| Community and Social Service Occupations | \$35,290 | \$38,950 | | | |
| Art, Design, Entertainment and Sports Medicine Occupations | \$37,180 | \$41,300 | | | |
| Healthcare Practitioners and Technical Occupations | \$61,600 | \$64,670 | | | |
| Healthcare Support Occupations | \$23,620 | \$25,010 | | | |
| Protective Service Occupations | \$33,560 | \$33,430 | | | |
| Food Preparation and Serving Related Occupations | \$19,800 | \$19,610 | | | |

| Construction and Extraction Occupations | \$35,290 | \$35,900 | | | |
| Installation, Maintenance and Repair Occupations | \$38,800 | \$40,140 | | | |
| Production Occupations | \$34,540 | \$34,750 | | | |
| Transportation and Moving Occupations | \$29,060 | \$29,620 | | | |

Source: U.S. Department of Labor, Bureau of Statistics

Most annual blue-collar salaries range from \$19,800 to \$38,800 within the Upper Savannah South Carolina Nonmetropolitan Area. White-collar jobs, such as those related to professional positions, management and medicine, have an average salary of \$67,642. The area employment base has a significant number of incomeappropriate occupations from which the proposed subject project will be able to draw renter support.

3. AREA'S LARGEST EMPLOYERS

The 10 largest employers within Lancaster County comprise over 7,400 employees. These employers are summarized as follows:

| Employer Name | Business Type | Total Employed |
|------------------------------------|---|-------------------|
| Red Ventures | Internet Sales & Marketing | 1,600 |
| Lancaster County School District | Education | 1,550 |
| Lancaster County Government | Government | 837 |
| Cardinal Health | Medical, Manufacturing & Distribution | 800 |
| Springs Memorial Hospital | Medical | 700 |
| Continental Tire the Americas, LLC | Headquarters | 430 |
| Proctor & Gamble | Manufacturing | 405 |
| URS Washington Group | Nuclear Energy | 400 |
| Honeywell | Manufacturer of Data Collection Hardware | 460 |
| Thomas & Betts Corp. | Manufacturer of Electrical and Utility Products | 300 |
| | Total | 7,482 |

Source: Lancaster County Economic Development Corporation (January 2014)

Interviews with local economic development representatives indicated that the major employers within Lancaster County are stable and growing. The county has experienced growing interest in the town of Indian Land, which has experienced significant population in the past several years. The following is a list of positive employment announcements:

- In January 2014, Red Ventures, the area's largest employer, announced that the company will expand its workforce at the Indian Land and Charlotte locations by 200 people over the next two months. The company states that it will undergo significant growth over the next three to six months and has already added 700 jobs in 2013. The company will open a 180,000 square-foot expansion at its Indian Land location in May 2014.
- Six Mile Commons, a shopping center located in Indian Land (Lancaster County) opened in 2012. A second phase of this center was announced in January 2014 and the only confirmed tenant is Mattress Firm. The first phase includes small retail stores and a dental office. This center is part of an outparcel development next to a Walmart Supercenter that opened in 2010.

- In December 2013, Keer Group, a Chinese-based textile company, announced that it will establish U.S. operations in Indian Land. The company will construct a \$230 million manufacturing facility that will create 501 permanent jobs over the next five years.
- Electrolux, an appliance manufacturer in nearby Charlotte, North Carolina, announced plans in December 2013 to build an \$85 million expansion that will provide 810 additional jobs by the end of 2,017.
- In March 2013, Thomas & Betts, one of the area's largest employers, announced plans for a \$3 million expansion to its Lancaster location, adding 80 new jobs. This expansion is complete. The company started with just 76 employees in 2009 and has since grown to 300.

Other 2013 economic highlights for Lancaster County include the following:

- Cardinal expansion, investment confidential, 150 jobs
- Accutrex, \$2.5 million expansion, 15 jobs
- Maverick Funding, \$1 expansion, 50 jobs
- DLS Tire, \$2.7 million plant, 53 jobs
- Commercial Tire Retreating, \$250,000 expansion, 5 jobs
- Van Can, \$4 million expansion, 15 jobs
- Nutramax, \$13 million expansion, 50 jobs
- Radco/Surefin, \$2.5 million investment, 20 jobs
- Fancy Pokkett, \$13 million bakery, 68 jobs
- Rebound Behavorial Health, \$6 million investment, 90 jobs
- Duracell expansion, investment confidential, 34 new jobs
- IMS, \$4.5 million expansion, 19 jobs
- Fab Fours, \$1.2 million expansion, 10 jobs

According to the South Carolina Department of Employment and Workforce (SC Works) website, there have been no WARN notices reported for Lancaster since January 2013. According to a representative with Lancaster County Economic Development Corporation, the only job losses within Lancaster County were the result of Humana Insurance cutting 50 job in 2013 and 100 jobs lost due to the closure of Titanium Solutions (a call center) in Indian Land in 2013.

4. EMPLOYMENT TRENDS

The following tables were generated from the U.S. Department of Labor, Bureau of Labor Statistics and reflect employment trends of the county in which the site is located.

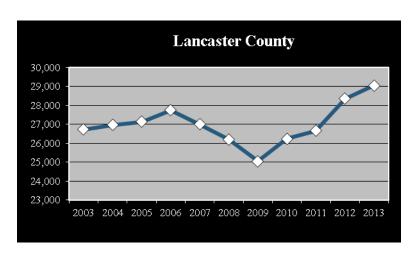

Excluding 2013, the employment base has increased by 8.2% over the past five years in Lancaster County, while the state of South Carolina declined by 1.4%. Total employment reflects the number of employed persons who live within the county.

The following illustrates the total employment base for Lancaster County, South Carolina and the United States.

| | Total Employment | | | | | | | | |
|-------|------------------|-----------|-----------|----------|-------------|---------|--|--|--|
| | Lancaste | er County | South C | Carolina | United | States | | | |

^{*}Through December

Lancaster County experienced a decline in its employment base starting in 2007 and was exacerbated by the national recession, as evidenced by the 4.4% decline in the County in 2009. However, the economy began a rapid recovery, starting with an increase in the employment base of 4.8% in 2010. The employment base has expanded each of the past four years and now has more persons employed than the period prior to the pre-recession downturn.

The following table illustrates the percent change in employment for Lancaster County and South Carolina.

Unemployment numbers and rates for Darlington County, South Carolina and the United States are illustrated as follows:

| | Total Unemployed | | | | | | | | |
|-------|------------------|------------|---------|------------|------------|---------------|--|--|--|
| | Lancaste | r County | South C | Carolina | United | United States | | | |
| Year | Number | Percentage | Number | Percentage | Number | Percentage | | | |
| 2003 | 2,610 | 8.9% | 133,257 | 6.7% | 8,896,479 | 5.8% | | | |
| 2004 | 2,619 | 8.9% | 138,430 | 6.8% | 8,261,839 | 6.0% | | | |

*Through December

After reaching a 10-year high of 17.7% in 2009, the Lancaster County unemployment rate has declined each of the past four years.

The following table illustrates the monthly unemployment rate in Lancaster County for the most recent 18-month period for which data is currently available.

The unemployment rate in Lancaster County has generally declined over the past 18 months.

In-place employment reflects the total number of jobs within the county regardless of the employee's county of residence. The following illustrates the total in-place employment base for Lancaster County.

| | In-Place Employment Lancaster County | | | | | | | |
|-------|--------------------------------------|--------|----------------|--|--|--|--|--|
| Year | Employment | Change | Percent Change | | | | | |
| 2003 | 17,580 | = | - | | | | | |
| 2004 | 17,507 | -73 | -0.4% | | | | | |
| 2005 | 17,369 | -138 | -0.8% | | | | | |
| 2006 | 17,488 | 119 | 0.7% | | | | | |
| 2007 | 16,619 | -869 | -5.0% | | | | | |
| 2008 | 15,787 | -832 | -5.0% | | | | | |
| 2009 | 14,979 | -808 | -5.1% | | | | | |
| 2010 | 15,765 | 786 | 5.2% | | | | | |
| 2011 | 16,212 | 447 | 2.8% | | | | | |
| 2012 | 17,781 | 1,569 | 9.7% | | | | | |
| 2013* | 19,186 | 1,405 | 7.9% | | | | | |

Source: Department of Labor, Bureau of Labor Statistics

*Through June

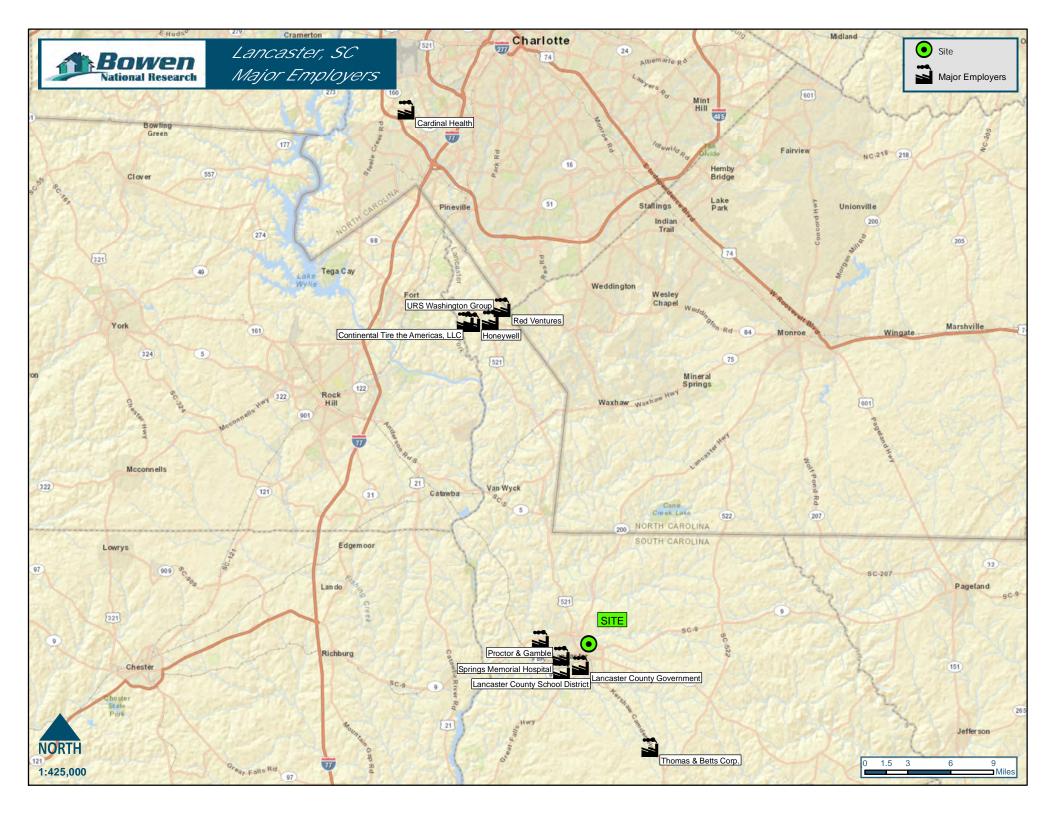

Data for 2012, the most recent year that year-end figures are available, indicates in-place employment in Lancaster County to be 62.7% of the total Lancaster County employment. This means that Lancaster County has a large number of people who live and work in the county.

5. <u>EMPLOYMENT CENTERS MAP</u>

A map illustrating the location of the area's largest employers is included on the following page.

6. COMMUTING PATTERNS

Based on the American Community Survey (2006-2010), the following is a distribution of commuting patterns for Site PMA workers age 16 and over:

| | Workers Age 16+ | | | |
|------------------------|-----------------|---------|--|--|
| Mode of Transportation | Number | Percent | | |
| Drove Alone | 14,164 | 82.6% | | |
| Carpooled | 2,269 | 13.2% | | |
| Public Transit | 9 | 0.1% | | |
| Walked | 131 | 0.8% | | |
| Other Means | 328 | 1.9% | | |
| Worked at Home | 256 | 1.5% | | |
| Total | 17,156 | 100.0% | | |

Source: American Community Survey (2006-2010); ESRI; Urban Decision Group; Bowen National Research

Nearly 83% of all workers drove alone, 13.2% carpooled and only 0.05% used public transportation.

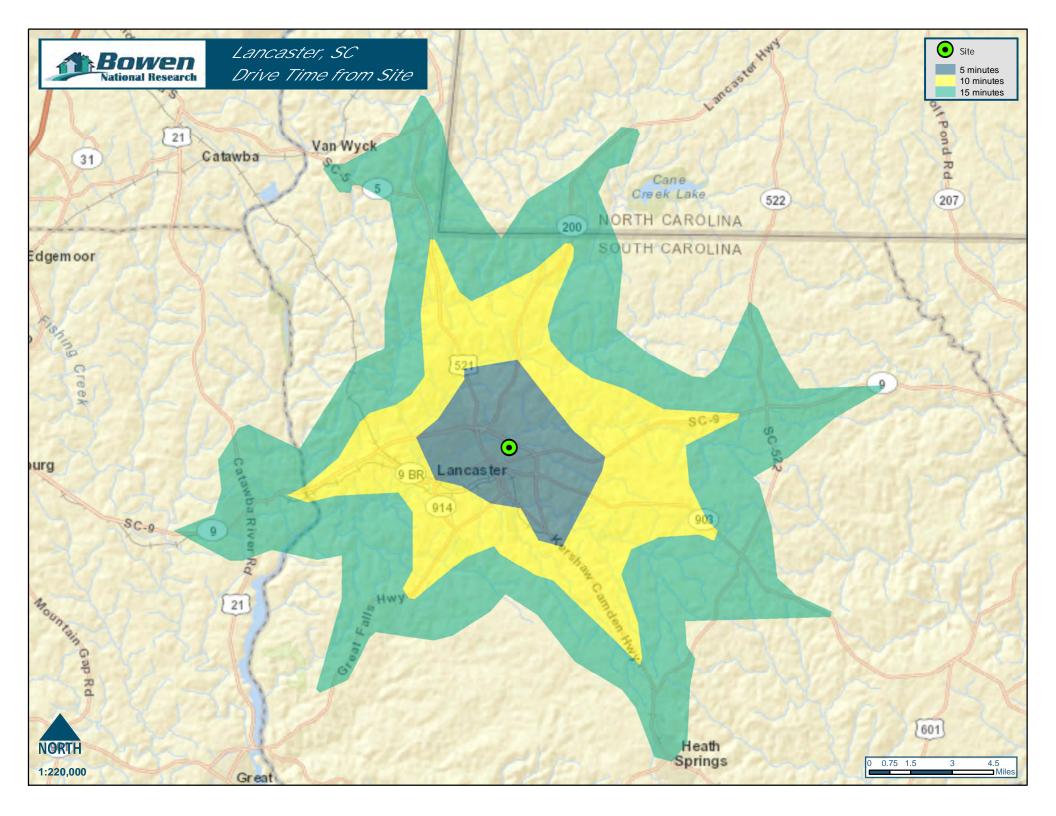

Typical travel times to work for the Site PMA residents are illustrated as follows:

| | Workers Age 16+ | | |
|----------------------|-----------------|---------|--|
| Travel Time | Number | Percent | |
| Less Than 15 Minutes | 4,604 | 26.8% | |
| 15 to 29 Minutes | 5,795 | 33.8% | |
| 30 to 44 Minutes | 2,749 | 16.0% | |
| 45 to 59 Minutes | 2,089 | 12.2% | |
| 60 or More Minutes | 1,664 | 9.7% | |
| Worked at Home | 256 | 1.5% | |
| Total | 17,156 | 100.0% | |

Source: American Community Survey (2006-2010); ESRI; Urban Decision Group; Bowen National Research

The largest share of area commuters has typical travel times to work ranging from 15 to 29 minutes. The subject site is within a 30-minute drive to most of the area's largest employers, which should contribute to the project's marketability. A drive-time map for the subject site is on the following page.

7. ELDERLY EMPLOYMENT OPPORTUNITIES

The subject project will not be age-restricted; therefore, an analysis of employment opportunities for seniors is not required for this report.

8. ECONOMIC FORECAST AND HOUSING IMPACT

The Lancaster County is relatively balanced, with no single industry dominating the market. The County was adversely impacted by the national recession, when the area employment base declined by more than 10% between 2006 and 2010 and the unemployment reached a 10-year high of 17.7% in 2009. However, the County's economic recovery has been rapid, with job growth occurring at a rapid annual rate and unemployment rates declining each of the past four years. With several job expansions planned for the area, we anticipate that the area will continue to experience positive growth over the foreseeable future. Regardless, with the latest (2013) annual unemployment rate of near 10%, the economy still remains fragile and the large base of unemployed people indicate the there remains a significant need for affordable housing within the market.

F. COMMUNITY DEMOGRAPHIC DATA

The following demographic data relates to the Site PMA. It is important to note that not all 2016 projections quoted in this section agree because of the variety of sources and rounding methods used. In most cases, the differences in the 2016 projections do not vary more than 1.0%.

1. POPULATION TRENDS

a. Total Population

The Site PMA population bases for 2000, 2010, 2013 (estimated) and 2016 (projected) are summarized as follows:

| | Year | | | | | | | |
|-------------------|----------|----------|-------------|-------------|--|--|--|--|
| | 2000 | 2010 | 2013 | 2016 | | | | |
| | (Census) | (Census) | (Estimated) | (Projected) | | | | |
| Population | 42,244 | 43,971 | 44,914 | 46,354 | | | | |
| Population Change | - | 1,727 | 943 | 1,440 | | | | |
| Percent Change | - | 4.1% | 2.1% | 3.2% | | | | |

Source: 2000, 2010 Census; ESRI; Urban Decision Group; Bowen National Research

The Lancaster Site PMA population base increased by 1,727 between 2000 and 2010. This represents a 4.1% increase over the 2000 population, or an annual rate of 0.4%. Between 2010 and 2013, the population increased by 943, or 2.1%. It is projected that the population will increase by 1,440, or 3.2%, between 2013 and 2016.

Based on the 2010 Census, the population residing in group-quarters is represented by 1.3% of the Site PMA population, as demonstrated in the following table:

| | Number | Percent |
|----------------------------------|--------|---------|
| Population in Group Quarters | 565 | 1.3% |
| Population not in Group Quarters | 43,406 | 98.7% |
| Total Population | 43,971 | 100.0% |

Source: 2010 Census

b. Population by Age Group

The Site PMA population bases by age are summarized as follows:

| Population 2010 (Census) | | 2013 (Es | 2013 (Estimated) | | 2016 (Projected) | | Change 2013-2016 | |
|--------------------------|--------|----------|------------------|---------|------------------|---------|------------------|---------|
| by Age | Number | Percent | Number | Percent | Number | Percent | Number | Percent |
| 19 & Under | 11,962 | 27.2% | 11,662 | 26.0% | 11,864 | 25.6% | 202 | 1.7% |
| 20 to 24 | 2,743 | 6.2% | 2,865 | 6.4% | 2,699 | 5.8% | -166 | -5.8% |
| 25 to 34 | 5,065 | 11.5% | 5,496 | 12.2% | 5,827 | 12.6% | 331 | 6.0% |
| 35 to 44 | 5,952 | 13.5% | 5,726 | 12.7% | 5,657 | 12.2% | -69 | -1.2% |
| 45 to 54 | 6,280 | 14.3% | 6,295 | 14.0% | 6,294 | 13.6% | -1 | 0.0% |
| 55 to 64 | 5,639 | 12.8% | 5,915 | 13.2% | 6,175 | 13.3% | 260 | 4.4% |
| 65 to 74 | 3,620 | 8.2% | 4,080 | 9.1% | 4,667 | 10.1% | 587 | 14.4% |
| 75 & Over | 2,711 | 6.2% | 2,875 | 6.4% | 3,171 | 6.8% | 296 | 10.3% |
| Total | 43,972 | 100.0% | 44,914 | 100.0% | 46,354 | 100.0% | 1,440 | 3.2% |

Source: 2010 Census; ESRI; Urban Decision Group; Bowen National Research

As the preceding table illustrates, over 52% of the population is expected to be between 25 and 64 years old in 2013. This age group is the prime group of potential renters for the subject site and will likely represent a significant number of the tenants.

c. Elderly and Non-Elderly Population

The subject project is not age-restricted; therefore, all person with appropriate incomes will be eligible to live at the subject development. As a result, we have not included an analysis of the PMA's senior and non-senior population.

d. Special Needs Population

The subject project will not offer special needs units. Therefore, we have not provided any population data regarding special needs populations.

2. HOUSEHOLD TRENDS

a. Total Households

Household trends within the Lancaster Site PMA are summarized as follows:

| | | Year | | | | | | | |
|------------------|------------------|------------------|---------------------|---------------------|--|--|--|--|--|
| | 2000 (Census) | 2010 (Census) | 2013 (Estimated) | 2016 (Projected) | | | | | |
| Households | 16,265 | 17,082 | 17,523 | 18,106 | | | | | |
| Household Change | - | 817 | 441 | 583 | | | | | |
| Percent Change | - | 5.0% | 2.6% | 3.3% | | | | | |
| Household Size | 2.60 | 2.57 | 2.53 | 2.53 | | | | | |

Source: 2000, 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Within the Lancaster Site PMA, households increased by 817 (5.0%) between 2000 and 2010. Between 2010 and 2013, households increased by 441 or 2.6%. By 2016, there will be 18,106 households, an increase of 583 households, or 3.3% over 2013 levels. This is an increase of approximately 194 households annually over the next two years.

b. Household by Tenure

Households by tenure are distributed as follows:

| | 2010 (Census) | | 2013 (Estimated) | | 2016 (Projected) | |
|-----------------|---------------|---------|------------------|---------|------------------|---------|
| Tenure | Number | Percent | Number | Percent | Number | Percent |
| Owner-Occupied | 11,696 | 68.5% | 11,621 | 66.3% | 11,995 | 66.2% |
| Renter-Occupied | 5,386 | 31.5% | 5,902 | 33.7% | 6,111 | 33.8% |
| Total | 17,082 | 100.0% | 17,523 | 100.0% | 18,106 | 100.0% |

Source: 2010 Census; ESRI; Urban Decision Group; Bowen National Research

In 2013, homeowners occupied 66.3% of all occupied housing units, while the remaining 33.7% were occupied by renters. The share of renters is relatively high and the 5,902 renters represent a good base of potential support in the market for the subject development.

c. Households by Income

The distribution of households by income within the Lancaster Site PMA is summarized as follows:

| Household | 2010 (C | ensus) | 2013 (Estimated) | | 2016 (Projected) | |
|------------------------|------------|---------|------------------|---------|------------------|---------|
| Income | Households | Percent | Households | Percent | Households | Percent |
| Less Than \$10,000 | 2,348 | 13.7% | 3,102 | 17.7% | 3,409 | 18.8% |
| \$10,000 to \$19,999 | 2,446 | 14.3% | 3,057 | 17.4% | 3,283 | 18.1% |
| \$20,000 to \$29,999 | 2,651 | 15.5% | 3,273 | 18.7% | 3,562 | 19.7% |
| \$30,000 to \$39,999 | 2,232 | 13.1% | 2,199 | 12.6% | 2,167 | 12.0% |
| \$40,000 to \$49,999 | 1,649 | 9.7% | 1,433 | 8.2% | 1,563 | 8.6% |
| \$50,000 to \$59,999 | 1,468 | 8.6% | 1,480 | 8.4% | 1,409 | 7.8% |
| \$60,000 to \$74,999 | 1,641 | 9.6% | 1,265 | 7.2% | 1,155 | 6.4% |
| \$75,000 to \$99,999 | 1,423 | 8.3% | 1,045 | 6.0% | 968 | 5.3% |
| \$100,000 to \$124,999 | 711 | 4.2% | 395 | 2.3% | 350 | 1.9% |
| \$125,000 to \$149,999 | 219 | 1.3% | 110 | 0.6% | 99 | 0.5% |
| \$150,000 to \$199,999 | 166 | 1.0% | 121 | 0.7% | 103 | 0.6% |
| \$200,000 & Over | 131 | 0.8% | 42 | 0.2% | 39 | 0.2% |
| Total | 17,082 | 100.0% | 17,523 | 100.0% | 18,106 | 100.0% |
| Median Income | \$34,9 | 917 | \$27, | 951 | \$26,0 | 529 |

Source: 2010 Census; ESRI; Urban Decision Group; Bowen National Research

In 2010, the median household income was \$34,917. This declined by 20.0% to \$27,951 in 2013. By 2016, it is projected that the median household income will be \$26,629, a decline of 4.7% over 2013.

d. Average Household Size

Information regarding average household size is considered in 2. a. Total Households of this section.

e. Households by Income by Tenure

The following tables illustrate renter household income by household size for 2000, 2010, 2013 and 2016 for the Lancaster Site PMA:

| Renter | 2000 (Census) | | | | | | | | |
|------------------------|---------------|----------|----------|----------|-----------|-------|--|--|--|
| Households | 1-Person | 2-Person | 3-Person | 4-Person | 5-Person+ | Total | | | |
| Less Than \$10,000 | 524 | 199 | 43 | 223 | 124 | 1,113 | | | |
| \$10,000 to \$19,999 | 459 | 227 | 99 | 41 | 134 | 960 | | | |
| \$20,000 to \$29,999 | 193 | 257 | 384 | 169 | 132 | 1,136 | | | |
| \$30,000 to \$39,999 | 161 | 187 | 172 | 67 | 61 | 649 | | | |
| \$40,000 to \$49,999 | 43 | 112 | 18 | 16 | 35 | 224 | | | |
| \$50,000 to \$59,999 | 70 | 60 | 87 | 95 | 55 | 367 | | | |
| \$60,000 to \$74,999 | 6 | 110 | 125 | 36 | -6 | 271 | | | |
| \$75,000 to \$99,999 | 21 | 30 | 13 | 39 | 47 | 150 | | | |
| \$100,000 to \$124,999 | 25 | 25 | -20 | -1 | 26 | 55 | | | |
| \$125,000 to \$149,999 | 5 | 9 | -4 | 9 | 6 | 25 | | | |
| \$150,000 to \$199,999 | -2 | 14 | 2 | 7 | -2 | 19 | | | |
| \$200,000 & Over | -2 | 11 | 1 | 8 | 8 | 26 | | | |
| Total | 1,504 | 1,241 | 920 | 708 | 622 | 4,995 | | | |

Source: Ribbon Demographics; ESRI; Urban Decision Group

The population and household growth within the Site PMA between 2000 and 2013 has been very rapid. These trends are projected to increase by 1,440, or 3.2%, between 2013 and 2016. At the same time, the number of households will increase by 583, or 3.3% over 2013 levels. This is an increase of approximately 194 households annually over the next two years. The 2013 base of renter households of 5,902 represents a large base of potential support in the market for the subject development. This base is projected to grow through at least 2016, increasing the demand for rental housing in the market. This will have a positive impact on the demand for all rental housing, including affordable rental housing.

G. PROJECT-SPECIFIC DEMAND ANALYSIS

1. <u>INCOME RESTRICTIONS</u>

The number of income-eligible households necessary to support the project from the Site PMA is an important consideration in evaluating the subject project's potential.

Under the Low-Income Housing Tax Credit (LIHTC) program, household eligibility is based on household income not exceeding the targeted percentage of Area Median Household Income (AMHI), depending upon household size.

The subject site is within the Lancaster County, South Carolina, which is a non-metropolitan statistical area. The Lancaster County four-person median household income is \$52,600. The subject property will be restricted to households with incomes of up to 50% and 60% of AMHI. The following table summarizes the maximum allowable income by household size at various levels of AMHI.

| | Maximum Allowable Income | | | | | |
|----------------|--------------------------|----------|--|--|--|--|
| Household Size | 50% | 60% | | | | |
| One-Person | \$18,400 | \$22,080 | | | | |
| Two-Person | \$21,000 | \$25,200 | | | | |
| Three-Person | \$23,650 | \$28,380 | | | | |
| Four-Person | \$26,250 | \$31,500 | | | | |
| Five-Person | \$28,350 | \$34,020 | | | | |
| Six-Person | \$30,450 | \$36,540 | | | | |

The largest proposed units (three-bedroom) at the subject site are expected to house up to five-person households. As such, the maximum allowable income at the subject site is \$34,020.

2. AFFORDABILITY

Leasing industry standards typically require households to have rent-to-income ratios of 25% to 30%. Pursuant to SCSHFDA market study guidelines, the maximum rent-to-income ratio permitted for a family project is 35% and for a senior project is 40%.

The proposed LIHTC units will have a lowest gross rent of \$471 (at 50% AMHI). Over a 12-month period, the minimum annual household expenditure (rent plus tenant-paid utilities) at the subject site is \$5,652. Applying a 35% rent-to-income ratio to the minimum annual household expenditure yields a minimum annual household income requirement for the Tax Credit units of \$16,150.

Based on the preceding analyses, the income-appropriate ranges required for residency at the subject project with units built to serve households at 50% and 60% of AMHI are included in the following table:

| | Income Range | | |
|-------------------------------------|--------------|----------|--|
| Unit Type | Minimum | Maximum | |
| Tax Credit (Limited To 50% Of AMHI) | \$16,150 | \$28,350 | |
| Tax Credit (Limited To 60% Of AMHI) | \$18,035 | \$34,020 | |
| Overall Project | \$15,910 | \$34,020 | |

3. DEMAND COMPONENTS

The following are the demand components as outlined by the South Carolina State Housing Finance and Development Authority:

a. **Demand for New Households.** New units required in the market area due to projected household growth should be determined using 2013 Census data estimates and projecting forward to the anticipated placed-in-service date of the project (2016) using a growth rate established from a reputable source such as ESRI. The population projected must be limited to the age and income cohort and the demand for each income group targeted (i.e. 50% of median income) must be shown separately.

In instances where a significant number (more than 20%) of proposed rental units are comprised of three- and four-bedroom units, analysts must refine the analysis by factoring in the number of large households (generally four-person +). A demand analysis that does not consider this may overestimate demand.

- b. **Demand from Existing Households:** The second source of demand should be determined using 2000 and 2010 Census data (as available), ACS 5 year estimates or demographic estimates provided by reputable companies. All data in tables should be projected from the same source:
 - 1) Rent overburdened households, if any, within the age group, income cohorts and tenure (renters) targeted for the subject development. In order to achieve consistency in methodology, all analysts should assume that the rent-overburdened analysis includes households paying greater than 35%, or in the case of elderly 40%, of their gross income toward gross rent rather than some greater percentage. If an analyst feels strongly that the rent-overburdened analysis should focus on a greater percentage, they must give an indepth explanation why this assumption should be included. Any such additional indicators should be calculated separately and be easily added or subtracted from the required demand analysis.

Based on Table B25074 of the American Community Survey (ACS) 2006-2010 5-year estimates, approximately 34.6% to 43.7% (depending upon the targeted income level) of senior households within the market were rent overburdened. These households have been included in our demand analysis.

2) Households living in substandard housing (units that lack complete plumbing or those that are overcrowded). Households in substandard housing should be adjusted for age, income bands and tenure that apply. The analyst should use their own knowledge of the market area and project to determine if households from substandard housing would be a realistic source of demand. The market analyst is encouraged to be conservative in their estimate of demand from both households that are rent-overburdened and/or living in substandard housing.

Based on the 2010 ACS 5-Year Estimates Table B25016, 8.4% of all households within the market were living in substandard housing (lacking complete indoor plumbing and overcrowded households/1+ persons per room).

3) Elderly Homeowners likely to convert to rentership: The Authority recognizes that this type of turnover is increasingly becoming a factor in the demand for elderly Tax Credit housing. A narrative of the steps taken to arrive at this demand figure should be included.

The subject project is not age-restricted, therefore, this demand component does not apply to the subject project.

4) Other: Please note, the Authority does not, in general, consider household turnover rates other than those of elderly to be an accurate determination of market demand. However, if an analyst firmly believes that demand exists which is not being captured by the above methods, she/he may be allowed to consider this information in their analysis. The analyst may also use other indicators to estimate demand if they can be fully justified (e.g. an analysis of an under-built or over-built market in the base year). Any such additional indicators should be calculated separately and be easily added or subtracted from the demand analysis described above.

4. METHODOLOGY

Please note that the Authority's stabilized level of occupancy is 93.0%

- a. **Demand:** The two overall demand components (3a and 3b) added together represent total demand for the project.
- b. **Supply:** Comparable/competitive units funded, under construction, or placed in service in 2012 must be subtracted to calculate net demand. Vacancies in projects placed in service prior to 2012 which have not reach stabilized occupancy must also be considered as part of the supply.
- c. **Capture Rates:** Capture rates must be calculated for each targeted income group and each bedroom size proposed as well as for the project overall.
- d. **Absorption Rates:** The absorption rate determination should consider such factors as the overall estimate of new renter household growth, the available supply of comparable/competitive units, observed trends in absorption of comparable/competitive units, and the availability of subsidies and rent specials.

5. <u>DEMAND/CAPTURE RATE CALCULATIONS</u>

Within the Site PMA, we identified four general occupancy LIHTC properties. Of these properties, however, only one (Cottages of Azalea) was funded and/or built during the projection period (2013 to current). This project is expected to compete with the subject. It should be noted that this project is fully occupied and management maintains a wait list of five households for the next available unit. We did not identify any projects that were placed in service prior to 2013 that have not reached a stabilized occupancy. The unit mix for the Cottages at Azalea is summarized as follows:

| | | Units At Ta | rgeted AMHI | | |
|------|--------------------|-------------|-------------|-----------|------------|
| Map | | Year | LIHTC | | |
| I.D. | Project Name | Built | Units | 50% AMHI | 60% AMHI |
| | | | | 1-Br. = 2 | 1-Br. = 6 |
| 5 | Cottages at Azalea | 2013 | 48 | 2-Br. = 6 | 2-Br. = 18 |
| | | | | 3-Br. = 4 | 3-Br. = 12 |

The units by bedroom type and AMHI level are included in the following demand estimates.

The following is a summary of our demand calculations:

| | Percent Of Median Household Income | | | | | | |
|---|------------------------------------|---------------------------------|-----------------------------|--|--|--|--|
| Demand Component (Households Age 55+) | 50% AMHI (\$16,150-\$28,350) | 60% AMHI (\$18,035-\$34,020) | Overall (\$16,150-\$34,020) | | | | |
| Demand From New Renter Households | | | | | | | |
| (Age- And Income-Appropriate) | 1,710 - 1,660 = 50 | 1,918 - 1,877 = 41 | 2,159 - 2,110 = 49 | | | | |
| + | | | | | | | |
| Demand From Existing Households | | | | | | | |
| (Rent Overburdened) | 1,660 X 43.7% = 725 | 1,877 X 34.6% = 649 | 2,110 X 38.9% = 821 | | | | |
| + | | | | | | | |
| Demand From Existing Households | | | | | | | |
| (Renters In Substandard Housing) | $1,660 \times 8.4\% = 139$ | 1,877 X 8.4% = 158 | $2,110 \times 8.4\% = 177$ | | | | |
| + | | | | | | | |
| Demand From Existing Households | | | | | | | |
| (Senior Homeowner Conversion) | N/A | N/A | N/A | | | | |
| = | | | | | | | |
| Total Demand | 914 | 848 | 1,047 | | | | |
| - | | | | | | | |
| Supply (Directly Comparable Units Built And/Or Funded | | | | | | | |
| Since 2013) | 12 | 36 | 48 | | | | |
| = | | | | | | | |
| Net Demand | 902 | 812 | 999 | | | | |
| | | | | | | | |
| Proposed Units | 14 | 42 | 56 | | | | |
| | | | | | | | |
| Proposed Units/ Net Demand | 14 / 902 | 42 / 812 | 56 / 999 | | | | |
| | | | | | | | |
| Capture Rate | = 1.5% | = 5.2% | = 5.6% | | | | |

The capture rates by income level are low, ranging from 1.5% to 5.2%. The overall capture rate of 5.6% is also low and indicates that there is sufficient support for the proposed subject project.

Based on the distribution of persons per household and the share of rental units in the market, we estimate the share of demand by bedroom type within the Site PMA as follows:

| Estimated Demand By Bedroom | | | | | | | |
|-----------------------------|---------|--|--|--|--|--|--|
| Bedroom Type | Percent | | | | | | |
| One-Bedroom | 25% | | | | | | |
| Two-Bedroom | 50% | | | | | | |
| Three-Bedroom | 25% | | | | | | |
| Total | 100.0% | | | | | | |

Applying the preceding shares to the income-qualified households yields demand and capture rates of the proposed units by bedroom type as illustrated in the following tables:

| Units Targeting 50% Of AMHI (914 Units Of Demand) | | | | | | | | |
|---|---|---|-----|---|------|--|--|--|
| Bedroom Size Total Net Demand By Proposed Capture Rate By | | | | | | | | |
| (Share Of Demand) | Demand Supply* Bedroom Type Subject Units Bedroom T | | | | | | | |
| One-Bedroom (25%) | 229 | 2 | 227 | 4 | 1.7% | | | |
| Two-Bedroom (50%) | 457 | 6 | 451 | 7 | 1.6% | | | |
| Three-Bedroom (25%) | 229 | 4 | 225 | 3 | 1.3% | | | |

^{*}Directly comparable units built and/or funded in the project market over the projection period.

| Units Targeting 60% Of AMHI (848 Units Of Demand) | | | | | | | | |
|---|--|----|-----|----|------|--|--|--|
| Bedroom Size Total Net Demand By Proposed Capture Rate By | | | | | | | | |
| (Share Of Demand) | Demand Supply* Bedroom Type Subject Units Bedroom Ty | | | | | | | |
| One-Bedroom (25%) | 212 | 6 | 206 | 12 | 5.8% | | | |
| Two-Bedroom (50%) | 424 | 18 | 406 | 17 | 4.2% | | | |
| Three-Bedroom (25%) | 212 | 12 | 200 | 13 | 6.5% | | | |

^{*}Directly comparable units built and/or funded in the project market over the projection period.

The capture rates by bedroom type range from 1.3% to 6.5%. These capture rates indicate that sufficient support exists for the 56 proposed subject units at each targeted level of AMHI and by bedroom type.

6. ABSORPTION PROJECTIONS

For the purpose of this analysis, we assume the absorption period at the site begins as soon as the first units are available for occupancy. Since all demand calculations in this report follow Agency guidelines that assume a 2016 opening date for the site, we also assume that the first completed units at the site will be available for rent sometime in 2016.

It is our opinion that the proposed 56 LIHTC units at the subject site will reach a stabilized occupancy of 93.0% within six months of opening. This absorption period is based on an average monthly absorption rate of 10 units. Our absorption projections assume that household growth will continue rapidly and that no other large projects targeting a similar income group are developed during the projection period.

H. RENTAL HOUSING ANALYSIS (SUPPLY)

1. <u>COMPETITIVE DEVELOPMENTS</u>

The subject project will include one- to three-bedroom units and will target households with incomes of up to 50% and 60% of AMHI. We identified four LIHTC projects within the Site PMA that are considered comparable to the subject development because they target households with incomes similar to those that will be targeted at the subject site. These competitive properties and the subject development are summarized below:

| Map I.D. | Project Name | Year Built | Total Units | Occ. Rate | Distance to Site | Waiting List | Target Market |
|-------------|------------------------|------------|----------------|--------------|---------------------|--------------|-----------------------------|
| Site | Willow Lake Apartments | 2016 | 56 | - | - | - | Families; 50% & 60% AMHI |
| 5 | Cottages at Azalea | 2013 | 48 | 100.0% | 1.4 Miles | 5 H.H. | Families; 50% & 60% AMHI |
| 3 | Cottages at Azarea | 2013 | 70 | 100.070 | 1.4 1411103 | 3 11.11. | Families; 50% & 60% |
| 7 | Miller Grove | 2007 | 48 | 100.0% | 1.5 Miles | 7 H.H. | AMHI |
| 8 | Millers Ridge Apts. | 2001 | 56* | 100.0% | 1.4 Miles | 35 H.H. | Families; 50% & 60% AMHI |
| | - | | | | | | Families; 50% & 60% |
| 15 | Sycamore Run | 2003 | 48 | 100.0% | 1.5 Miles | None | AMHI |

OCC. – Occupancy H.H. - Households *Tax Credit units only

The four LIHTC projects have a combined occupancy rate of 100.0%. Three of the four projects maintain wait lists of up to 35 households. We consider 100% occupancy rates and wait lists as strong indications of the pent up demand for affordable housing in the market. The newest LIHTC project, Cottages at Azalea (Map ID 5), opened in August of 2013 and reached a 100% occupancy rate by October of 2013. Assuming the project began preleasing units at least one month prior to opening yields a monthly absorption rate of 12 units. This is a good absorption rate and indicates that the market has responded well to affordable housing.

The following table identifies the properties that accept Housing Choice Vouchers as well as the approximate number of units occupied by residents utilizing Housing Choice Vouchers.

| Map I.D. | Project Name | Total Units | Number of Vouchers | Share of Vouchers |
|-------------|---------------------|----------------|-----------------------|----------------------|
| 5 | Cottages at Azalea | 48** | N/A | = |
| 7 | Miller Grove | 48 | 3 | 6.3% |
| 8 | Millers Ridge Apts. | 56* | 4 | 7.1% |
| 15 | Sycamore Run | 48 | 6 | 12.5% |
| | Total | 152 | 13 | 8.6% |

^{*}Tax Credit units only

As the preceding table illustrates, there are a total of approximately 13 voucher holders residing at the comparable properties within the market. This comprises 8.6% of the 152 total non-subsidized LIHTC units. Given that these projects are 100% occupied, it can be concluded that the gross rents at these properties are achievable and serve as a good base of comparison for the proposed subject project. According to a representative with the Housing Authority of Lancaster, there are approximately 220 Housing Choice Voucher holders within the housing authority's jurisdiction, and it is unknown as to how many people are currently on the waiting list for additional Vouchers. This reflects the continuing need for Housing Choice Voucher assistance.

The gross rents for the competing projects and the proposed rents at the subject site, as well as their unit mixes and vacancies by bedroom are listed in the following table:

| | | Gross Rent/Percent of AMHI (Number of Units/Vacancies) | | | | | | | | | | |
|-------------|---------------------------|--|--------------------------------------|-------------------------------------|-----------------|--|--|--|--|--|--|--|
| Map I.D. | Project Name | One- Br. | Two- Br. | Three- Br. | Rent Special | | | | | | | |
| Site | Willow Lake Apartments | \$471/50% (4) \$526/60% (12) | \$564/50% (7) \$601/60% (17) | \$648/50% (3) \$726/60% (13) | - | | | | | | | |

The proposed units sizes (square feet) and number of bathrooms for the proposed one- to three-bedroom units are appropriate for the target market. Additionally, the proposed development will be competitive with the existing LIHTC projects in the market based on unit size (square footage) and the number of baths offered.

The following tables compare the amenities of the subject development with the other LIHTC projects in the market.

Survey Date: February 2014

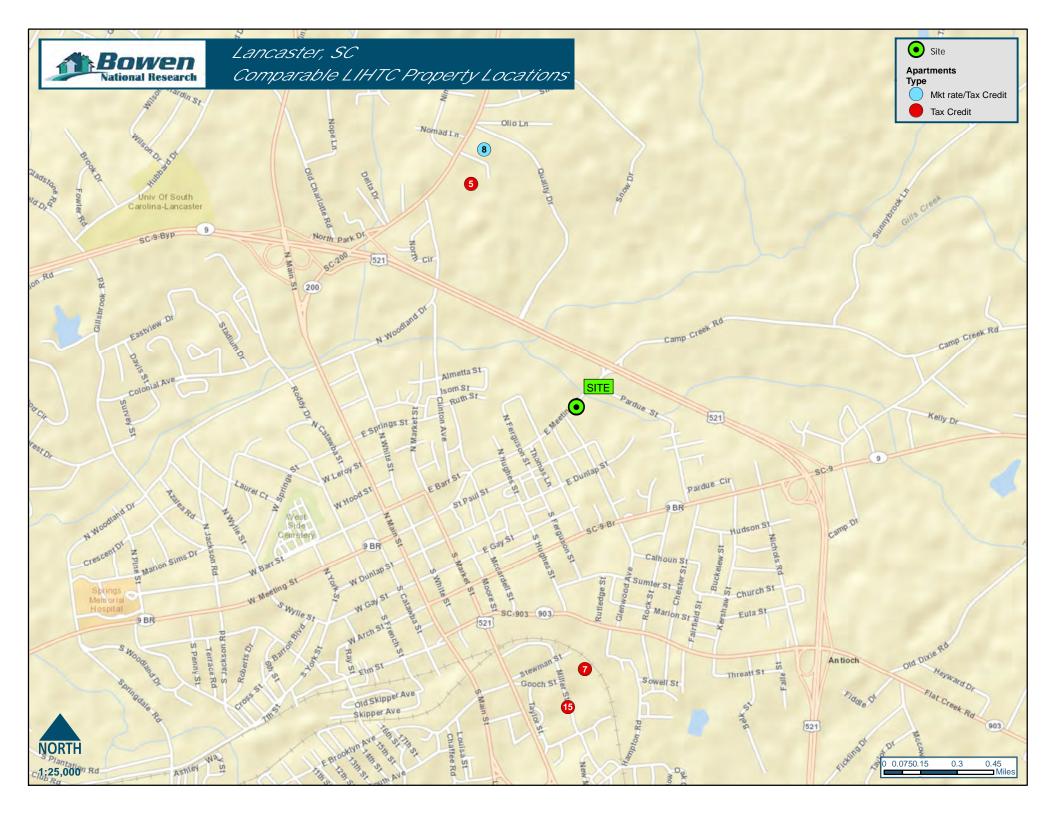

The proposed units and project amenities at the subject development will be comprehensive and should appeal to the targeted low-income family market. As such, the amenity packages included at the subject development will be very competitive with those of the competing low-income projects. The subject development does not appear to lack any amenities that would hinder its ability to operate as a Tax Credit project.

Based on our analysis of the rents, unit sizes (square footage), amenities, location, quality and occupancy rates of the existing low-income properties within the market, it is our opinion that the subject development will be competitive with these properties.

2. COMPARABLE TAX CREDIT PROPERTIES MAP

A map illustrating the location of the comparable properties we surveyed is on the following page.

3. RENTAL HOUSING OVERVIEW

The distributions of the area housing stock within the Lancaster Site PMA in 2010 and 2013 (estimated) are summarized in the following table:

| | 2010 (0 | Census) | 2013 (Estimated) | | | |
|-----------------|---------|---------|------------------|---------|--|--|
| Housing Status | Number | Percent | Number | Percent | | |
| Total-Occupied | 17,082 | 91.0% | 17,523 | 90.7% | | |
| Owner-Occupied | 11,696 | 68.5% | 11,621 | 66.3% | | |
| Renter-Occupied | 5,386 | 31.5% | 5,902 | 33.7% | | |
| Vacant | 1,697 | 9.0% | 1,794 | 9.3% | | |
| Total | 18,779 | 100.0% | 19,317 | 100.0% | | |

Source: 2010 Census; ESRI; Urban Decision Group; Bowen National Research

Based on a 2013 update of the 2010 Census, of the 19,317 total housing units in the market, 9.3% were vacant. In 2013, it was estimated that homeowners occupied 66.3% of all occupied housing units, while the remaining 33.7% were occupied by renters. The share of renters is considered high and the 5,902 renter households represent a large base of potential support in the market for the subject development.

We identified and personally surveyed 18 conventional housing projects containing a total of 1,013 units within the Site PMA. This survey was conducted to establish the overall strength of the rental market and to identify those properties most comparable to the subject site. These rentals have a combined occupancy rate of 98.8%, a very high rate for rental housing. Among these projects, nine are non-subsidized (market-rate and Tax Credit) projects containing 478 units. These non-subsidized units are 99.8% occupied. There are no additional units under construction in the Site PMA. The remaining nine projects contain 535 government-subsidized units, which are 97.9% occupied.

The following table summarizes project types identified in the Site PMA:

| Project Type | Projects Surveyed | Total Units | Vacant Units | Occupancy Rate |
|----------------------------------|----------------------|----------------|-----------------|-------------------|
| Market-rate | 3 | 209 | 1 | 99.5% |
| Market-rate/Tax Credit | 2 | 89 | 0 | 100.0% |
| Tax Credit | 4 | 180 | 0 | 100.0% |
| Tax Credit/Government-Subsidized | 4 | 186 | 11 | 94.1% |
| Government-Subsidized | 5 | 349 | 0 | 100.0% |
| Total | 18 | 1,013 | 12 | 98.8% |

All of housing segments are performing well, with occupancy rates of 94.1% or higher. With only 12 identified vacancies among the more than 1,000 rental units in the market, there are limited housing options available to prospective renters. There do not appear to be any weaknesses in the rental market.

The following table summarizes the breakdown of market-rate and Tax Credit units surveyed within the Site PMA.

| | Market-rate | | | | | | | | | | | |
|---------------|-------------|-------|--------------------|-----------|----------|----------------------|--|--|--|--|--|--|
| Bedroom | Baths | Units | Distribution | Vacancy | % Vacant | Median Gross Rent | | | | | | |

| Total Market- | rate | 229 | 100.0% | 1 | 0.4% | = | | | | | | |
| | | | Tax Credit, Non-Su | ıbsidized | | | | | | | | |
| | | | | | | Median Gross | | | | | | |
| Bedroom | Baths | Units | Distribution | Vacancy | % Vacant | Rent | | | | | | |
| One-Bedroom | 1.0 | 56 | 22.5% | 0 | 0.0% | \$491 | | | | | | |
| Two-Bedroom | 1.0 | 17 | 6.8% | 0 | 0.0% | \$602 | | | | | | |
| Two-Bedroom | 2.0 | 118 | 47.4% | 0 | 0.0% | \$617 | | | | | | |
| Three-Bedroom | 2.0 | 58 | 23.3% | 0 | 0.0% | \$768 | | | | | | |
| Total Tax Cr | edit | 249 | 100.0% | 0 | 0.0% | = | | | | | | |

The market-rate units are 99.6% occupied and the Tax Credit units are 100.0% occupied. The non-subsidized supply is in high demand with limited availability.

The following is a distribution of units by year built for the Site PMA:

| Year Built | Projects | Units | Vacancy Rate |
|--------------|----------|-------|--------------|
| Before 1970 | 0 | 0 | 0.0% |
| 1970 to 1979 | 2 | 141 | 0.7% |
| 1980 to 1989 | 1 | 68 | 0.0% |
| 1990 to 1999 | 0 | 0 | 0.0% |
| 2000 to 2005 | 3 | 137 | 0.0% |
| 2006 | 1 | 36 | 0.0% |
| 2007 | 1 | 48 | 0.0% |
| 2008 | 0 | 0 | 0.0% |
| 2009 | 0 | 0 | 0.0% |
| 2010 | 0 | 0 | 0.0% |
| 2011 | 0 | 0 | 0.0% |
| 2012 | 0 | 0 | 0.0% |
| 2013 | 1 | 48 | 0.0% |
| Total | 9 | 478 | 0.2% |

^{*}As of February

Nearly 29% of all apartments surveyed were built prior to 1980. These older apartments have a vacancy rate of 0.7%. The more than 250 non-subsidized units added to the market since 2000 are fully occupied. Further, the newest project that was added to the market in 2013 leased all 48 units within four months, yielding an average absorption rate of 12 units per month. This absorption rate and the 100% occupancy rate among modern rentals indicate the market's strong response to new product.

The Lancaster apartment market offers a wide range of rental product, in terms of price point and quality. The following table compares the gross rent (the collected rent at the site plus the estimated costs of tenant-paid utilities) of the subject project with the rent range of the existing conventional apartments surveyed in the market.

| | Gross Rent | | | | |
|---------------|------------------|------------------|--------------------------|--------------------------|--|
| | | Existing Rentals | | Units (Share) with Rents | |
| Bedroom Type | Proposed Subject | Median | Range | Above Proposed Rents | |
| One-Bedroom | \$476-50% | \$491 | \$482 - \$885 | 83 (100.0%) | |
| | \$531-60% | Φ471 | φ 4 02 - φ003 | 27 (32.5%) | |
| Two-Bedroom | \$572-50% | \$797 | \$573 - \$1,086 | 316 (100.0%) | |
| | \$609-60% | \$191 | \$373 - \$1,080 | 270 (85.4%) | |
| Three-Bedroom | \$660-50% | \$783 | \$689 - \$1,230 | 79 (100.0%) | |
| | \$738-60% | | | 52 (65.8%) | |

The proposed 50% AMHI rents will be the lowest among the non-subsidized product. The proposed 60% AMHI rents will be lower than one-third to more than three-fourths of the non-subsidized rents in the market. The appropriateness of the proposed rents is evaluated in detail in the Achievable Market Rent Analysis section of this report.

We rated each property surveyed on a scale of "A" through "F". All properties were rated based on quality and overall appearance (i.e. aesthetic appeal, building appearance, landscaping and grounds appearance). Following is a distribution by quality rating, units and vacancies.

| Market-rate | | | | | |
|---------------------------|--------------|-------------|--------------|--|--|
| Quality Rating | Projects | Total Units | Vacancy Rate | | |
| A | 1 | 68 | 0.0% | | |
| В | 1 | 54 | 1.9% | | |
| B- | 3 | 107 | 0.0% | | |
| Non-Subsidized Tax Credit | | | | | |
| Quality Rating | Vacancy Rate | | | | |
| A | 1 | 48 | 0.0% | | |
| B+ | 2 | 84 | 0.0% | | |
| В | 1 | 48 | 0.0% | | |
| B- | 2 | 69 | 0.0% | | |

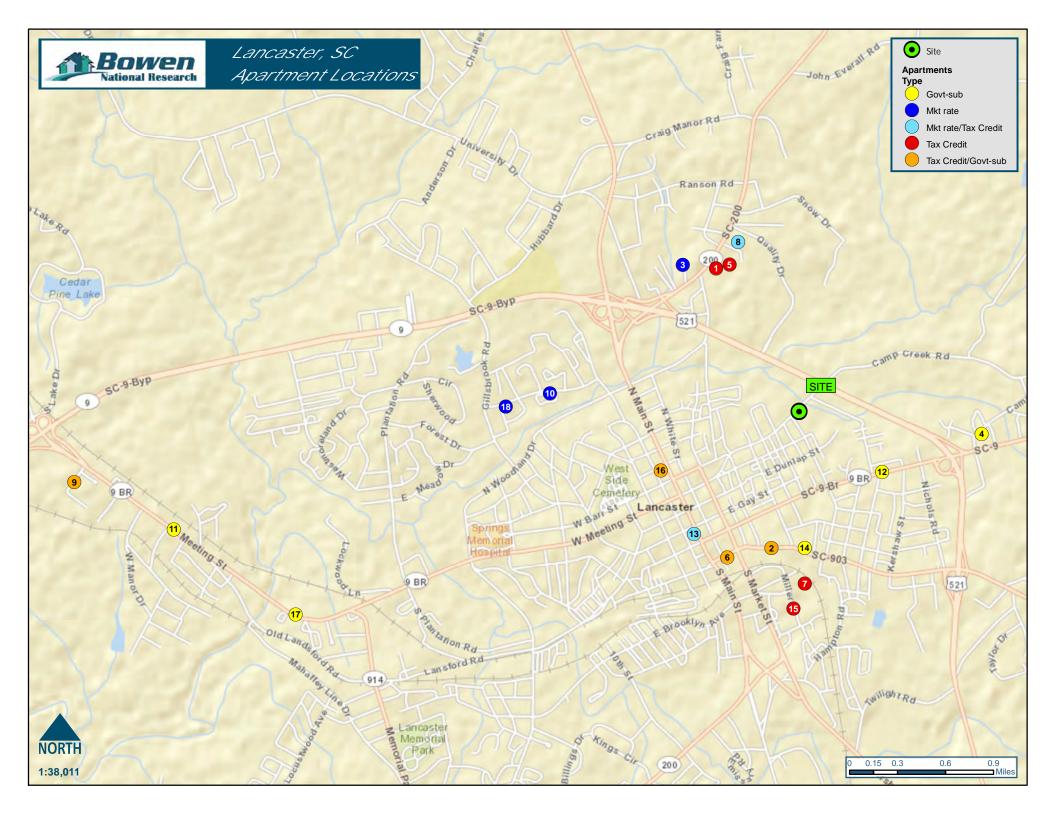

Vacancies are low among all quality levels. The proposed subject project is expected to be of good quality, which will contribute to its marketability.

A complete list of all properties surveyed is included in Addendum A, Field Survey of Conventional Rentals.

4. RENTAL HOUSING INVENTORY MAP

A map identifying the location of all properties surveyed within the Site PMA is on the following page.

5. & 6. PLANNED AND PROPOSED DEVELOPMENTS

According to the planning and building departments of various municipalities in the Lancaster Site PMA, there is one multifamily apartment project in the development pipeline.

• Construction began in November 2013 on the \$31 million Enclave at Bailes Ridge Apartment Homes in Indian Land, in northern Lancaster County. This 246-unit luxury market-rate project will be located at 1004 Bailes Ridge Avenue and will contain 15 two- and three-story buildings on the 21-acre site, which is next to the 300-acre Bailes Business Park. The one-, two- and three-bedroom apartments are expected to range from \$800 to \$1,404 per month and will offer many amenities, including garages, a clubhouse, fitness center and pool. Construction on the first 24 units and the clubhouse is expected to be complete in May 2014.

This project is not expected to compete with the proposed subject project.

7. ADDITIONAL SCSHFDA VACANY DATA

Stabilized Comparables

A component of South Carolina Housing's Exhibit S-2 is the calculation of the occupancy rate among all stabilized comparables, including both Tax Credit and market-rate projects, within the Site PMA. Comparables are identified as those projects that are considered economically comparable in that they target a similar tenant profile with respect to age and income cohorts. Market-rate projects with gross rents that deviate by no more than 10% to the gross rents proposed at the site are considered economically comparable. Market-rate projects with gross rents that deviate by greater than 10% when compared to the gross rents proposed at the site are not considered economically comparable as these projects will generally target a different tenant profile. For this reason, there may be conceptually comparable marketrate projects that were utilized in determining Market Rent Advantages (see section eight Market Rent Advantage of this section) that are excluded as comparable projects as they may not be economically comparable. Conceptual comparability is also considered in this analysis. For example, if the subject development is of multi-story garden walk-up design, we may eliminate those market-rate projects that are of townhouse-style design even if they may be economically comparable. A project's age, overall quality and amenities offered are also considered when evaluating conceptual comparability. Note that the determination of both economic and conceptual comparability is the opinion of the market analyst.

As discussed earlier in this analysis, we identified a total of four comparable LIHTC projects within the Site PMA that have received Tax Credit funding. In addition, we identified a total of two projects offering market-rate units (may include mixed-income projects) which are located in the Site PMA and are considered both economically and conceptually comparable. Our methodology for identifying conceptual comparability are those projects that target a similar age cohort, are of similar design, and offered similar amenity packages. The six stabilized comparable Tax Credit and market-rate projects identified in the Site PMA are detailed as follows:

| Stabilized Comparable Tax Credit and Market-Rate Projects | | | | | | |
|---|------------------------|-------------|---------|-------|-----------|--|
| Map | | Year Built/ | Project | Total | Occupancy | |
| I.D. | Project Name | Renovated | Type | Units | Rate | |

^{*}Includes market-rate and Tax Credit units

The overall occupancy rate of the six stabilized comparable Tax Credit and Market-Rate projects identified in the Site PMA is 100%.

8. MARKET RENT ADVANTAGE

We identified five market-rate properties within or near the Site PMA that we consider most comparable to the subject development. These selected properties are used to derive market rent for a project with characteristics similar to the subject development. It is important to note that for the purpose of this analysis, we only select market-rate properties. Market-rate properties are used to determine rents that can be achieved in the open market for the subject units without maximum income and rent restrictions.

The basis for the selection of these projects includes, but is not limited to, the following factors:

- Surrounding neighborhood characteristics
- Target market (seniors, families, disabled, etc.)
- Unit types offered (garden or townhouse, bedroom types, etc.)
- Building type (single-story, mid-rise, high-rise, etc.)
- Unit and project amenities offered
- Age and appearance of property

TC - Tax Credit

MR - Market-Rate

Since it is unlikely that any two properties are identical, we adjust the collected rent (the actual rent paid by tenants) of the selected properties according to whether or not they compare favorably with the subject development. Rents of projects that have additional or better features than the subject site are adjusted negatively, while projects with inferior or fewer features are adjusted positively. For example, if the subject project does not have a washer and dryer and a selected property does, we lower the collected rent of the selected property by the estimated value of a washer and dryer so that we may derive a *market rent advantage* for a project similar to the subject project.

The rent adjustments used in this analysis are based on various sources, including known charges for additional features within the Site PMA, estimates made by area property managers and realtors, quoted rental rates from furniture rental companies and the prior experience of Bowen National Research in markets nationwide.

The proposed subject development and the five selected properties include the following:

Occ. – Occupancy

900 Series Map ID's are located outside the Site PMA

The five selected market-rate projects have a combined total of 919 units with an overall occupancy rate of 97.8%. None of the comparable properties has an occupancy rate below 96.4%.

The Rent Comparability Grids on the following pages shows the collected rents for each of the selected properties and illustrate the adjustments made (as needed) for various features and location or neighborhood characteristics, as well as quality differences that exist between the selected properties and the subject development.

Once all adjustments to collected rents were made, the adjusted rents for each comparable were used to derive an achievable market rent for each bedroom type. Each property was considered and weighed based upon its proximity to the subject site and its amenities and unit layout compared to the subject site.

Based on the preceding Rent Comparability Grids, it was determined that the current achievable market rent for units similar to the subject development are \$680 for a one-bedroom unit, \$770 for a two-bedroom unit and \$880 for a three-bedroom unit.

The following table compares the proposed collected rents at the subject site with achievable market rent for selected units.

| Bedroom Type | Proposed Collected Rent (% AMHI) | Achievable Market Rent | Market Rent Advantage |
|----------------|-------------------------------------|---------------------------|--------------------------|
| One-Bedroom | \$395 (50%) | | 41.91% |
| One-Bedroom | \$450 (60%) | \$680 | 33.82% |
| Two-Bedroom | \$463 (50%) | | 39.87% |
| I wo-bearoom | \$500 (60%) | \$770 | 35.06% |
| Three-Bedroom | \$522 (50%) | | 40.68% |
| Tillee-Bedroom | \$600 (60%) | \$880 | 31.81% |
| | | Weighted Average | 35.34% |

The proposed rents represent a 31.81% to 41.91% market rent advantage. The weighted market rent advantage at the subject project is 35.34%.

None of the selected properties offer the same amenities as the subject property. As a result, we have made adjustments to the collected rents to reflect the differences between the subject property and the selected properties. The following are explanations (preceded by the line reference number on the comparability grid table) for each rent adjustment made to each selected property.

- 1. Rents for each property are reported as collected rents. This is the actual rent paid by tenants and does not consider tenant-paid utilities. The rent reported is typical and does not consider rent concessions or special promotions. When multiple rent levels were offered, we included an average rent.
- 7. Upon completion of construction, the subject project will be the newest property in the market. As such, we have adjusted the rents at the selected properties by \$1 per year to reflect the age of these properties.

- 8. It is anticipated that the subject project will have a quality finished look and an attractive aesthetic appeal. We have made adjustments for those properties that we consider to have either a superior or an inferior quality to the subject development.
- 12. The number of bathrooms offered at each of the selected properties varies. We have made adjustments of \$15 per half bathroom to reflect the difference in the number of bathrooms offered at the site and the number offered by the competitive properties.
- 13.- 23. The subject project will offer a unit amenity package that is comprehensive but generally similar to the selected properties. We have, however, made adjustments for features lacking at the selected properties, and in some cases, we have made adjustments for features the subject property does not offer.
- 24.-32. The subject project offers a comprehensive project amenities package. We have made monetary adjustments to reflect the difference between the subject project's and the selected properties' project amenities.
- 33.-39. We have made adjustments to reflect the differences between the subject project's and the selected properties' utility responsibility. The utility adjustments were based on the local housing authority's utility cost estimates.

9. AFFORDABLE HOUSING IMPACT

As previously noted, four affordable projects will compete with the subject project. The anticipated occupancy rates of the existing non-subsidized Tax Credit developments during the first year of occupancy at the subject project follow:

| Project | Current Occupancy Rate | Anticipated Occupancy Rate Through 2016 |
|---------------------|---------------------------|--|
| Cottages at Azalea | 100.0% | 95%-100.0% |
| Miller Grove | 100.0% | 95%-100.0% |
| Millers Ridge Apts. | 100.0% | 95%-100.0% |
| Sycamore Run | 100.0% | 95%-100.0% |

Given the 100% occupancy rates and waiting lists at most of these LIHTC projects, and considering the depth of support among low-income households as shown in our capture rate estimates, we believe that the development of the subject project will not have an adverse impact on the occupancy rates of the other affordable housing projects.

10. OTHER HOUSING OPTIONS (BUY VERSUS RENT)

According to ESRI, the median home value within the Site PMA was \$164,270. At an estimated interest rate of 4.7% and a 30-year term (and 95% LTV), the monthly mortgage for a \$164,270 home is \$1,012, including estimated taxes and insurance.

| Buy Versus Rent Analysis | | | | | | | |
|--|-----------|--|--|--|--|--|--|
| Median Home Price - ESRI | \$164,270 | | | | | | |
| Mortgaged Value = 95% of Median Home Price | \$156,057 | | | | | | |
| Interest Rate - Bankrate.com | 4.7% | | | | | | |
| Term | 30 | | | | | | |
| Monthly Principal & Interest | \$809 | | | | | | |
| Estimated Taxes and Insurance* | \$202 | | | | | | |
| Estimated Monthly Mortgage Payment | \$1,012 | | | | | | |

^{*}Estimated at 25% of principal and interest

In comparison, the collected rents for the subject property range from \$395 to \$600 per month. Therefore, the cost of a monthly mortgage for a typical home in the area is at least more than \$400 higher than the cost of renting at the subject site, depending on unit size. While it is possible that some of the tenants in the market would be able to afford the monthly payments required to own a home, the number of tenants who would also be able to afford the down payment on such a home is considered minimal. Therefore, we do not anticipate any competitive impact on or from the homebuyer market.

11. HOUSING VOIDS

As shown earlier in this analysis, with only 12 identified vacancies among the more than 1,000 rental units in the market, there are limited housing options available to prospective renters. A large number of the surveyed projects have wait lists, indicating that there is pent up demand and housing voids in the subject market.

All four of the LIHTC projects are fully occupied and three of the four projects maintain wait lists of up to 35 households. We consider 100% occupancy rates and wait lists as strong indications of the pent up demand for affordable housing in the market. With only a market-rate project in the development pipeline, there will remain a void of housing in the affordable rental housing segment. The development of the subject project will help fill a portion of this void.

I. INTERVIEWS

The following are summaries of interviews conducted with various government and private sector individuals:

Jan Sanger, Property Manager of Northwest Apartments and Old Hickory Apartments, stated that there is a significant need for affordable multifamily housing in the Lancaster area. She elaborated further by stating that the local economy of Lancaster was struck especially hard by the recession because its largest employer, Springs Global, relocated in 2008 and left a significant number of individuals out of work. **Phone: 803-286-4822**

Marie Johnson, Assistant Property Manager at Palmetto Place, stated there is a need for multifamily affordable housing in Lancaster. Since the recession, Lancaster residents have struggled to afford market-rate rents and therefore are seeking more affordable options. She has more than 40 households on her waiting list, with the majority waiting for one-bedroom apartments. **Phone: 803-283-9906**

Carolyn Lucas, a volunteer with a local service provider known as Helping Other People Effectively (HOPE), stated that the need for affordable housing is "skyrocketing" in the area. Due to the area's poor economy and lack of employment opportunities, income-based housing is in even greater demand. The current inventory of affordable homes and apartments in the area has not been well maintained, increasing the need for newer, quality housing. **Phone:** (803) 286-4673

According to Deborah Cunningham, Section 8 Coordinator with the Housing Authority of Lancaster, there are approximately 220 Housing Choice Voucher holders within the housing authority's jurisdiction, and it is unknown as to how many people are currently on the waiting list for additional Vouchers. The waiting list is closed and it is unknown as to when it will reopen. Annual turnover of persons in the Voucher program is unknown at this time. This reflects the continuing need for Housing Choice Voucher assistance. **Phone: 803-285-7214**

J. RECOMMENDATIONS

Based on the findings reported in our market study, it is our opinion that a market exists for the 56 units proposed at the subject site, assuming it is developed as detailed in this report. Changes in the project's site, rents, amenities or opening date may alter these findings.

The project will be competitive within the market area in terms of unit amenities and unit sizes, and the proposed rents will be perceived as a significant value in the marketplace. This is demonstrated in Section IV.

Given the 100% occupancy rate and wait list of affordable developments within the Site PMA, the subject project will offer a housing alternative to low-income households that is not readily available in the area. As shown in the Project Specific Demand Analysis section of this report, with a capture of 5.7% of incomequalified households in the market, there is sufficient support for the subject development. Therefore, it is our opinion that the subject project will have minimal, if any, impact on the existing Tax Credit developments in the Site PMA.

K. SIGNED STATEMENT REQUIREMENT

I affirm that I have made a physical inspection of the market and surrounding area and the information obtained in the field has been used to determine the need and demand for LIHTC units. I understand that any misrepresentation of this statement may result in the denial of further participation in the South Carolina State Housing Finance and Development Authority's programs. I also affirm that I have no interest in the project or relationship with the ownership entity and my compensation is not contingent on this project being funded. This report was written according to the SCSHFDA's market study requirements. The information included is accurate and can be relied upon by SCSHFDA to present a true assessment of the low-income housing rental market.

L. Qualifications

The Company

Bowen National Research employs an expert staff to ensure that each market study is of the utmost quality. Each staff member has hands-on experience evaluating sites and comparable properties, analyzing market characteristics and trends, and providing realistic recommendations and conclusions. The Bowen National Research staff has the expertise to provide the answers for your development.

The Staff

Patrick Bowen is the President of Bowen National Research. He has prepared and supervised thousands of market feasibility studies for all types of real estate products, including affordable family and senior housing, multifamily market-rate housing and student housing, for 15 years. He has also prepared various studies for submittal as part of HUD 221(d)(3) & (4), HUD 202 developments and applications for housing for Native Americans. He has also conducted studies and provided advice to city, county and state development entities as it relates to residential development, including affordable and market rate housing, for both rental and for-sale housing. Mr. Bowen has worked closely with many state and federal housing agencies to assist them with their market study guidelines. Mr. Bowen has his bachelor's degree in legal administration (with emphasis on business and law) from the University of West Florida.

Benjamin J. Braley, Market Analyst, has conducted market research for over six years in more than 550 markets throughout the United States. He is experienced in preparing feasibility studies for a variety of applications, including those that meet standards required by state agency and federal housing guidelines. Additionally, Mr. Braley has analyzed markets for single-family home developments, commercial office and retail space, student housing properties and senior housing (i.e. nursing homes, assisted living, continuing care retirement facilities, etc.). Mr. Braley is a member of the National Council of Housing Market Analysts (NCHMA) and graduated from Otterbein College with a bachelor's degree in Economics.

Jack Wiseman, Market Analyst, with Bowen National Research, has conducted extensive market research in over 200 markets throughout the United States. He provides thorough evaluation of site attributes, area competitors, market trends, economic characteristics and a wide range of issues impacting the viability of real estate development. He has evaluated market conditions for a variety of real estate alternatives, including affordable and market-rate apartments, retail and office establishments, educational facilities, marinas and a variety of senior residential alternatives. Mr. Wiseman has a Bachelor of Arts degree in Economics from Miami University.

Craig Rupert, Market Analyst with Bowen National Research, has conducted market research in both urban and rural markets throughout the United States. He provides thorough evaluation of site attributes, area competitors, market trends and economic characteristics. Specifically, he has evaluated market conditions for a variety of real estate alternatives, including affordable and market-rate apartments, Indian housing, senior rental housing facilities and student housing facilities. Mr. Rupert has a Bachelor of Science degree in Hospitality Management from Youngstown State University.

Heather Moore, Market Analyst, has been with Bowen National Research since the fall of 2010. She has evaluated the rental market in cities throughout the United States and is able to provide detailed site-specific analysis. Ms. Moore has a Bachelors of Arts in Marketing from Urbana University.

Greg Gray, Market Analyst, has more than twelve years of experience conducting site-specific analysis in markets throughout the country. He is especially trained in the evaluation of condominium and senior living developments. Mr. Gray has the ability to provide detailed site-specific analysis as well as evaluate market and economic trends and characteristics.

Christine Atkins, Market Analyst, has more than three years of experience in the property management industry and has managed a variety of rental housing types. With experience in conducting site-specific analysis, she has the ability to analyze market and economic trends and conditions. Ms. Atkins holds a Bachelor of Arts in Communication from the University of Cincinnati.

Lisa Wood, Market Analyst, has conducted site-specific analyses in both rural and urban markets throughout the country. She is also experienced in the day-to-day operation and financing of Low-Income Housing Tax Credit and subsidized properties, which gives her a unique understanding of the impact of housing development on current market conditions.

Chuck Ewing, Market Analyst, has been conducting site-specific analysis throughout the United States since 2009. He has experience in the evaluation of a variety of real estate developments that include affordable and market-rate apartments, senior living facilities, student housing, supportive and disabled veteran housing, farm worker housing and regional rental supply analysis. Mr. Ewing has a Bachelor of Arts degree in Economics from the Ohio State University.

Marlon Boone, Market Analyst, has conducted site-specific analyses in both metro and rural areas throughout the country. He is familiar with multiple types of rental housing programs, the day-to-day interaction with property managers and leasing agents and the collection of pertinent property details. Mr. Boone graduated from The Ohio State University with a Bachelor of Science in City and Regional Planning, with a concentration in Housing, Development and Real Estate.

Tyler Bowers, Market Analyst, has travelled the country and studied the housing industry in both urban and rural markets. He is able to analyze both the aesthetics and operations of rental housing properties, particularly as they pertain to each particular market. Mr. Bowers has a Bachelor Degree of Arts in History from Indiana University.

Kyle Ludlow, Market Analyst, has conducted site-specific analysis in both rural and urban markets throughout the country. He has experience in interviewing property managers and leasing agents to collect specific property data, is familiar with multiple rental housing programs and is specialized in the collection of detailed data on housing conditions in a variety of markets. A graduate of The Ohio State University, Mr. Ludlow holds a Bachelor of Arts in History.

Amy Tyrrell is a Project Director for Bowen National Research and is based out of Washington, DC. She has 16 years experience in the real estate and construction industries, with 11 years specializing in the research field. She has researched, analyzed, and prepared reports on a variety of trends, industries, and property types, including industrial, office, medical office, multifamily apartments and condominiums, and senior housing. Prior to her focus on research, Ms. Tyrrell performed financial analysis for retail developments throughout the United States. She holds a Masters in Business Administration with concentrations in real estate and marketing from the University of Cincinnati and a Bachelor of Arts in economics with a minor in mathematics from Smith College.

Stephanie Viren is the Research Director at Bowen National Research. Ms. Viren focuses on collecting detailed data concerning housing conditions in various markets throughout the United States. Ms. Viren has extensive interviewing skills and experience and also possesses the expertise necessary to conduct surveys of diverse pools of respondents regarding population and housing trends, housing marketability, economic development and other socioeconomic issues relative to the housing industry. Ms. Viren's professional specialty is condominium and senior housing research. Ms. Viren earned a Bachelor of Arts in Business Administration from Heidelberg College.

Desireé Johnson is the Field Support Coordinator at Bowen National Research. Ms. Johnson is involved in the day-to-day management of the field support department, as well as preparing jobs for field and phone analysis. She has been involved in extensive market research in a variety of project types for more than five years. Ms. Johnson has the ability to research, find, analyze and manipulate data in a multitude of ways. Ms. Johnson has an Associate of Applied Science in Office Administration from Columbus State Community College.

June Davis, Office Manager of Bowen National Research, has 24 years experience in market feasibility research. Ms. Davis has overseen production on over 15,000 market studies for projects throughout the United States.

M. Methodologies, Disclaimers & Sources

This market feasibility analysis complies with the requirements established by the South Carolina State Housing Finance and Development Authority (SCSHFDA) and conforms to the standards adopted by the National Council of Housing Market Analysts (NCHMA). These standards include the acceptable definitions of key terms used in market studies for affordable housing projects and model standards for the content of market studies for affordable housing projects. The standards are designed to enhance the quality of market studies and to make them easier to prepare, understand and use by market analysts and end users.

1. METHODOLOGIES

Methodologies used by Bowen National Research include the following:

• The Primary Market Area (PMA) generated for the proposed site is identified. The PMA is generally described as the smallest geographic area expected to generate most of the support for the proposed project. PMAs are not defined by a radius. The use of a radius is an ineffective approach because it does not consider mobility patterns, changes in the socioeconomic or demographic character of neighborhoods or physical landmarks that might impede development.

PMAs are established using a variety of factors, including, but not limited to:

- A detailed demographic and socioeconomic evaluation
- Interviews with area planners, realtors and other individuals who are familiar with area growth patterns
- A drive-time analysis for the site
- Personal observations of the field analyst
- A field survey of modern apartment developments is conducted. The intent of the field survey is twofold. First, the field survey is used to measure the overall strength of the apartment market. This is accomplished by an evaluation of the unit mix, vacancies, rent levels and overall quality of product. The second purpose of the field survey is to establish those projects that are most likely directly comparable to the proposed property.
- Two types of directly comparable properties are identified through the field survey. They include other Section 42 LIHTC developments and marketrate developments that offer unit and project amenities similar to those of the proposed development. An in-depth evaluation of these two property types provides an indication of the potential of the proposed development.

- Economic and demographic characteristics of the area are evaluated. An economic evaluation includes an assessment of area employment composition, income growth (particularly among the target market), building statistics and area growth perceptions. The demographic evaluation uses the most recently issued Census information and projections that determine what the characteristics of the market will be when the proposed project opens and achieves a stabilized occupancy.
- Area building statistics and interviews with officials familiar with area development provide identification of the properties that might be planned or proposed for the area that will have an impact on the marketability of the proposed development. Planned and proposed projects are always in different stages of development. As a result, it is important to establish the likelihood of construction, the timing of the project and its impact on the market and the proposed development.
- An analysis of the proposed project's market capture of income-appropriate renter households within the PMA is conducted. This analysis follows SCSHFDA's methodology for calculating potential demand. The resulting capture rates are compared with acceptable market capture rates for similar types of projects to determine whether the proposed development's capture rate is achievable.
- Achievable market rent for the proposed subject development is determined.
 Using a Rent Comparability Grid, the features of the proposed development
 are compared item by item to the most comparable properties in the market.
 Adjustments are made for each feature that differs from that of the proposed
 subject development. These adjustments are then included with the
 collected rent resulting in an achievable market rent for a unit comparable to
 the proposed unit. This analysis is done for each bedroom type proposed for
 the site.

Please note that non-numbered items in this report are not required by SCSHFDA; they have been included, however, based on Bowen National Research's opinion that it is necessary to consider these details to effectively address the development potential of proposed projects.

2. REPORT LIMITATIONS

The intent of this report is to collect and analyze significant levels of data to forecast the market success of the subject property within an agreed to time period. Bowen National Research relies on a variety of sources of data to generate this report. These data sources are not always verifiable; Bowen National Research, however, makes a significant effort to ensure accuracy. While this is not always possible, we believe our effort provides an acceptable standard margin of error. Bowen National Research is not responsible for errors or omissions in the data provided by other sources.

The reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions and are our personal, unbiased professional analyses, opinions and conclusions. We have no present or prospective interest in the property that is the subject of this report, and we have no personal interest or bias with respect to the parties involved. Our compensation is not contingent on an action or event (such as the approval of a loan) resulting from the analyses, opinions, conclusions in or the use of this study.

Any reproduction or duplication of this report without the express approval of Bowen National Research is strictly prohibited.

3. SOURCES

Bowen National Research uses various sources to gather and confirm data used in each analysis. These sources, which are cited throughout this report, include the following:

- The 2000 and 2010 Census on Housing
- American Community Survey
- ESRI
- Urban Decision Group (UDG)
- Applied Geographic Solutions
- Area Chamber of Commerce
- U.S. Department of Labor
- U.S. Department of Commerce
- Management for each property included in the survey
- Local planning and building officials
- Local housing authority representatives
- South Carolina State Housing Finance and Development Authority
- HISTA Data (household income by household size, tenure and age of head of household) by Ribbon Demographics

ADDENDUM A: FIELD SURVEY OF CONVENTIONAL RENTALS

LANCASTER, SOUTH CAROLINA

The following section is a field survey of conventional rental properties. These properties were identified through a variety of sources including area apartment guides, yellow page listings, government agencies, the Chamber of Commerce, and our own field inspection. The intent of this field survey is to evaluate the overall strength of the existing rental market, identify trends that impact future development, and identify those properties that would be considered most comparable to the subject site.

The field survey has been organized by the type of project surveyed. Properties have been color coded to reflect the project type. Projects have been designated as market-rate, Tax Credit, government-subsidized, or a combination of the three project types. The field survey is organized as follows:

- A color-coded map indicating each property surveyed and the project type followed by a list of properties surveyed.
- Properties surveyed by name, address, telephone number, project type, year built or renovated (if applicable), number of floors, total units, occupancy rate, quality rating, rent incentives, and Tax Credit designation. Housing Choice Vouchers and Rental Assistance are also noted here. Note that projects are organized by project type.
- Distribution of non-subsidized and subsidized units and vacancies in properties surveyed.
- Listings for unit and project amenities, parking options, optional charges, utilities (including responsibility), and appliances.
- Collected rent by unit type and bedrooms.
- Unit size by unit type and bedrooms.

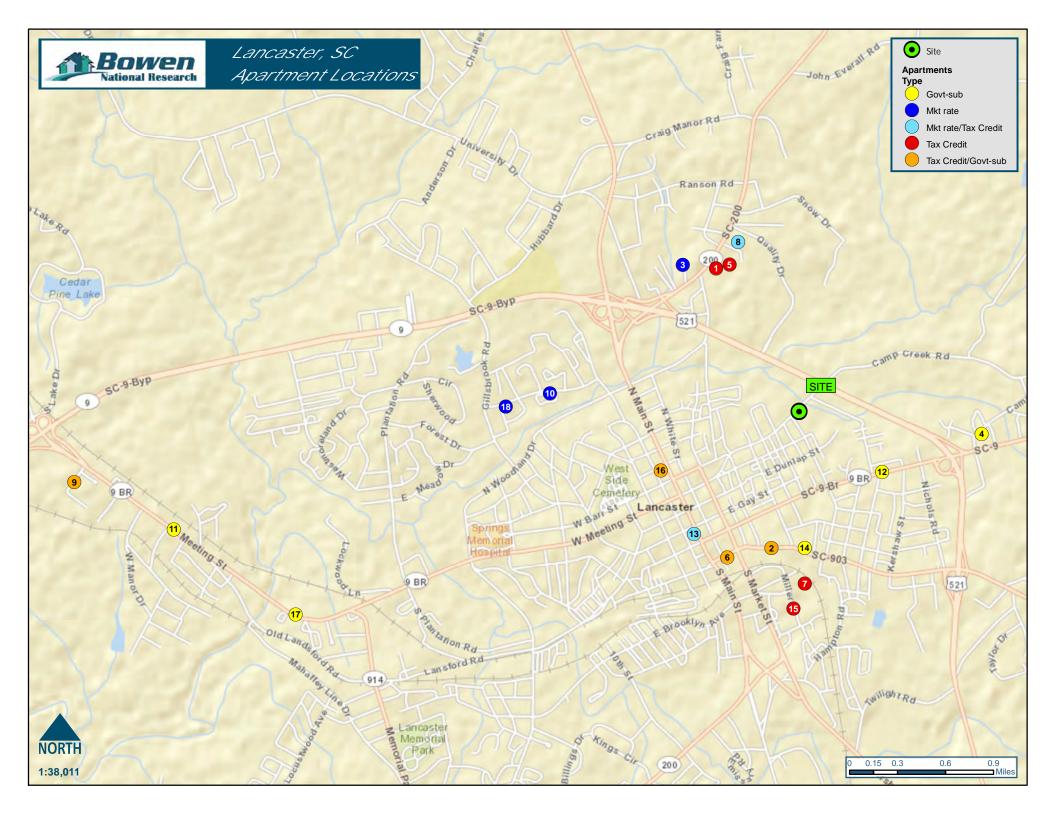

- Calculations of rent per square foot (all utilities are adjusted to reflect similar utility responsibility). Data is summarized by unit type.
- An analysis of units, vacancies, and median rent. Where applicable, non-subsidized units are distributed separately.
- An analysis of units added to the area by project construction date and, when applicable, by year of renovation.
- Aggregate data and distributions for all non-subsidized properties are provided for appliances, unit amenities and project amenities.

- A rent distribution is provided for all market-rate and non-subsidized Tax Credit units by unit type. Note that rents are adjusted to reflect common utility responsibility.
- Aggregation of projects by utility responsibility (market-rate and non-subsidized Tax Credit only).
- A utility allowance worksheet.

Note that other than the property listing following the map, data is organized by project types. Market-rate properties (blue designation) are first followed by variations of market-rate and Tax Credit properties. Non-government subsidized Tax Credit properties are red and government-subsidized properties are yellow. See the color codes at the bottom of each page for specific project types.

ADDENDUM-MARKET STUDY INDEX

A. <u>INTRODUCTION</u>

Members of the National Council of Housing Market Analysts provide a checklist referencing all components of their market study. This checklist is intended to assist readers on the location content of issues relevant to the evaluation and analysis of market studies.

B. <u>DESCRIPTION AND PROCEDURE FOR COMPLETING</u>

The following components have been addressed in this market study. The section number of each component is noted below. Each component is fully discussed in that section. In cases where the item is not relevant, the author has indicated 'N/A' or not applicable. Where a conflict with or variation from client standards or client requirements exists, the author has indicated a 'VAR' (variation) with a comment explaining the conflict.

C. CHECKLIST

| | | Section (s) | | | | | |
|-----|--|-------------|--|--|--|--|--|
| | Executive Summary | | | | | | |
| 1. | Executive Summary (Exhibit S-2) | A | | | | | |
| | Project Description | | | | | | |
