

**2013 Income & Rent Limits**  
Effective 12/11/2012

**Rural Developments**

The Housing and Economic Recovery Act of 2008 (HR 3221) increased the rent and income limits for tax credit properties located in rural areas to the **greater** of area median gross income or national non-metropolitan median income. To qualify, the project must be located in a rural area as defined in section 520 of the Housing Act of 1949. Projects **utilizing tax-exempt bond financing** are **not eligible** for the national non-metropolitan adjustments.

It is important to check the street address of the project. It is possible that a project located in a rural county may not be located in a rural area.

The USDA link below may be helpful in determining if your property is located in a rural area.

**IMPORTANT : USDA may change their determination of what projects qualify as rural during the course of a year. Please periodically check with USDA to determine the continued eligibility of the project.**

The national non-metropolitan median income and associated rents are identified in the table below. These should be compared with the income limits of the various rural areas to determine the greater income.
