Re: Market Study for Newberry Arms, located in Newberry, Newberry County, South Carolina

Dear Mr. Glanda:

At your request, Novogradac Consulting LLP has performed a study of the multifamily rental market in the Newberry, Newberry County, South Carolina area relative to the above-referenced proposed affordable housing acquisition/rehabilitation project.

The purpose of this market study is to assess the viability of the acquisition/rehabilitation of Newberry Arms (Subject), an existing 60-unit HUD Section 8 multifamily property located at 186 Newberry Arms Drive, in Newberry, Newberry County, South Carolina. Currently, all 60 units operate with HUD Section 8 rental assistance. Post renovation, all of the units will be LIHTC-restricted to families earning at or below 60 percent of the area median income (AMI). In addition, all 60 LIHTC units will continue to benefit from the Section 8 contract.

We are concurrently preparing an appraisal for the Subject. The following report provides support for the findings of the study and outlines the sources of information and the methodologies used to arrive at these conclusions. The scope of this report meets the requirements of the South Carolina State Housing Finance and Development Agency (SCSHFDA), including the following:

- Inspecting the site of the proposed Subject and the general location.
- Analyzing appropriateness of the proposed Subject's unit mix, rent levels, available amenities and site.
- Estimating market rent, absorption and stabilized occupancy levels for the market area.
- Investigating the health and conditions of the multifamily housing market.
- Calculating income bands, given the proposed Subject rents.
- Estimating the number of income-eligible households.
- Reviewing relevant public records and contacting appropriate public agencies.
- Analyzing the economic and social conditions in the market area in relation to the proposed project.
- Establishing the Subject Primary and Secondary Market Area(s) if applicable.
- Surveying competing projects, both Low-Income Housing Tax Credit (LIHTC) and market rate.

This report contains, to the fullest extent possible and practical, explanations of the data, reasoning, and analyses that were used to develop the opinions contained herein. The report also includes a thorough analysis of the scope of the study, regional and local demographic and economic studies, and market analyses including conclusions. The depth of discussion contained in the report is specific to the needs of the client. Without limiting the general applicability of this paragraph, under no circumstances may the Report be used in advertisements, solicitations and/or any form of securities offering.

The Covid-19 coronavirus has caused an international pandemic and we have seen governments across the globe take dramatic efforts to slow the spread and flatten the infection curve in order to reduce the strain on our health care system. We are already seeing these efforts result in extensive impacts to economic activity. However, governments are also implementing or discussing the implementation of significant economic stimulus packages to help with the economic impact. At this point is it unclear how long it will be before the emergency restrictions are lifted or loosened or how the stimulus packages will blunt the impact from the emergency measures. Further it is unclear as to how these measures will impact the housing market. Our analysis and conclusions are based on the information available as of the date of this report.

EXECUTIVE SUMMARY

Property Summary of Subject

Subject Property Overview:	Newberry Arms (Subject) is an existing 60-unit Section 8 property located at 186 Newberry Arms Drive, Newberry, Newberry County, South Carolina 29108. The Subject offers 12 one, 24 two, 18 three, and six four-bedroom units targeted toward the general population. Improvements consist of 12 two-story townhouse- style and three single-story residential buildings, as well as one single-story management building. All were built in 1980 and are in average condition. Currently, all units operate with HUD Section 8 rental assistance. Based on a rent roll dated June 30, 2020, the Subject was fully occupied and maintains an extensive waiting list. Post renovation, all of the units will be LIHTC-restricted to families earning at or below 60 percent of the area median income (AMI). In addition, all of the units will continue to benefit from the Section 8 contract.
Targeted Tenancy:	For SCHFA purposes, the tenancy is considered general population. The targeted tenancy is not age restricted and will consist of primarily one to six person households. All 60 of the units are subject to Section 8 restrictions.
Proposed Rents, Unit Mix and Utility	The following table details the Subject's proposed rents, utility

Proposed Rents, Unit Mix and Utility The following table details the Subject's proposed rents, utility Allowance: allowances, unit mix, and unit sizes. It should be noted that all 60 units will continue to benefit from Section 8 subsidies, and tenants will continue to contribute 30 percent of income as rent, not to exceed the lesser of the LIHTC rents and contract rents.

Unit Type	Unit Size (SF)	Number of Units	Current Contract Rent	Proposed LIHTC Asking Rent	Utility Allowance (1)	Gross Rent	2020 LIHTC Maximum Allowable Gross Rent	2020 HUD Fair Market Rents
			6	0% (Section 8)

		60						

Scope of Renovations:

According to information provided by the developer, the total renovation hard costs are estimated to be approximately \$2,808,800 or \$46,813 per unit. The Subject's scope of renovation will include, but will not be limited to:

SCOPE OF RENOVATIONS

Unit Renovations	
Bathroom Vanity, medicine cabinet, tub surround, lighting	Flooring replacement
Bathroom fixtures	Central air conditioning
Kitchen cabinets, counters, sinks	Interior doors
Kitchen appliances: stoves, microwaves, range hood, refrigerators	Hot water heaters
Drywall repair, paint	Outlet replacement/lighting
Unit Renovations	
Entry doors	Playground
Roofs	Security
Windows and patio doors	Parking lot repair, seal/stripe
Siding hardi, gutters, fascia	Concrete repair sidewalks/curbs
Landscaping	Mailboxes
Grading	Common area Wi-Fi
Unit Renovations	
Office/laundry upgrade	-

Market Vacancy

The following table illustrates the market vacancy at the comparable properties.

	OVERALL V	ACANCY			
Property Name	Rent Structure	Tenancy	Total Units	Vacant Units	Vacancy Rate
Clinton Green Apartments*	LIHTC	Family	40	0	0.0%
Fountain Hills*	LIHTC	Family	48	0	0.0%
Jacob Press Apartments*	LIHTC/ Market	Family	20	2	10.0%
Meadowbrook Apartments*	LIHTC	Family	48	2	4.2%
Newberry Green	LIHTC	Family	44	2	4.5%
Palmetto Pointe	LIHTC	Family	48	0	0.0%
Highland Park Apartments*	Market	Family	64	3	4.7%
Indian Land Apartments	Market	Family	52	3	5.8%
Magnolia Manor	Market	Family	14	1	7.1%
Oakland Mill	Market	Family	64	5	7.8%
Winter Ridge Apartments*	Market	Family	248	3	1.2%
Total LIHTC			248	6	2.4%
Total Market Rate			442	15	3.4%
Overall Total			690	21	3.0%

*Located outside of the PMA

The comparables reported vacancy rates ranging from zero to 10.0 percent. Jacob Press Apartments is a mixed income property, which reported the highest vacancy rate among the comparables. However, the property

manager at this property would not comment on the vacancy rate. Overall vacancy in the local market is operating at an average 3.0 percent vacancy rate. Managers at three of the LIHTC properties reported being fully occupied. The average vacancy rate reported by the affordable comparables was 2.4 percent, below the 3.4 percent average reported by the market rate properties.

According to the rent roll dated June 30, 2020, the Subject is currently fully occupied and maintains an extensive waiting list. The Subject appears to be in average overall condition with average curb appeal. Post-renovation, the Subject will exhibit good overall condition. Therefore, we believe that the Subject will operate with a total vacancy rate of five percent or less.

It should be noted that a majority of the comparables reported no major issues or negative impact during the COVID-19 pandemic other than units taking longer to lease due to social distancing.

Capture Rates

CAPTURE RATE ANALYSIS CHART - AS PROPOSED								
Total	Supply	Not Domand	Units	Capture Rate				
Demand	Supply	Net Demanu	Proposed					
247	0	247	12	4.9%				
338	0	338	24	7.1%				
325	0	325	18	5.5%				
74	0	74	6	8.1%				
984	0	984	60	6.1%				
	Total Demand 247 338 325 74	Total Demand Supply 247 0 338 0 325 0 74 0	Total Demand Supply Net Demand 247 0 247 338 0 338 325 0 325 74 0 74	Total Demand Supply Net Demand Units Proposed 247 0 247 12 338 0 338 24 325 0 325 18 74 0 74 6				

The following table illustrates the capture rates for the Subject.

CAPTURE RATE ANALYSIS CHART - ABSENT SUBSIDY Units Total **Bedrooms/AMI Level Net Demand Capture Rate** Supply Demand Proposed 1BR @60% 105 0 105 11.4% 12 143 0 143 24 16.7% 2BR @60% 3BR @60% 138 0 138 18 13.0% 4BR @60% 31 0 31 6 19.2% 60 Overall 418 0 418 14.4%

As the analysis illustrates, the Subject's capture rates with subsidy at the 60 percent AMI level will range from 4.9 to 8.1 percent. Absent subsidy, the Subject's capture rates at the 60 percent AMI level will range from 11.4 to 19.2 percent. The overall capture rates for the Subject's units with and without subsidy are 6.1 and 14.4 percent, respectively. The Subject's overall capture rates are within SCSHFDA guidelines, and we believe that there is ample demand for the Subject's units.

Projected Absorption Period

None of the surveyed comparable properties were able to report relevant absorption data. As supplemental data, we have searched the region for LIHTC properties with recent absorption data. Absorption rates at these properties are detailed in the table below.

		ABSORPTION			
Property Name	Rent	Tenancy	Year	Total Units	Absorption (units/month)
The Pointe At Lake Murray	LIHTC	Family	2019	60	12
Willis Trace	LIHTC	Family	2016	28	28
Parkside At Verdae	LIHTC	Family	2012	56	30
Average					23

On average, these properties reported an absorption rate of 23 units per month. With the stable demographic base of low-income families in the PMA and the general limited supply of affordable multifamily housing, we believe the Subject should be able to experience an absorption rate similar to the average. Therefore, based upon the demand calculations presented within this report, which indicate capture rates within SCSHFDA guidelines, and an ample number income-qualified households, we believe that the Subject could absorb approximately 20 units per month upon opening. This equals an absorption period of approximately three months. This is considered largely hypothetical due to the likelihood that all of the Subject's current tenants will continue to be income eligible to remain at the property post-renovation. As such, we believe the Subject will stabilize within one month of rehabilitation completion.

Market Conclusions

Overall vacancy in the local market is performing well with a 3.0 percent vacancy rate among all 11 surveyed stabilized comparable projects. Excluding Jacob Press Apartments, Magnolia Manor and Oakland Mill, which reported that the current vacancy rates are slightly elevated, there are only four vacancies among the remaining 228 LIHTC units, and with the exception of Jacob Press Apartments, all of the LIHTC properties maintain waiting lists. This indicates strong demand for affordable rental housing in the PMA. Market rate comparables are also performing well, with an overall vacancy rate of 3.4 percent among all of the market-rate comparables.

When compared to the current 60 percent AMI rents at the LIHTC properties, the Subject's proposed 60 percent AMI rents appear reasonable at the maximum allowable levels, and they are 19.1 to 31.7 percent below what we have determined to be the achievable market rents. Overall, we believe that the Subject will be successful in the local market as proposed.

According to the South Carolina Department of Employment and Workforce (DEW), from May 31 to June 6, there were 22,734 people that filed for unemployment for the first time. That was a rise from the week of May 24-30, when 18,986 unemployment claims were made in South Carolina. In that time, the agency reports paying more than \$2.1 billion in a combination of state unemployment benefits, along with CARES Acts funds, Federal Pandemic Unemployment Compensation, Pandemic Unemployment, and Pandemic emergency Unemployment Compensation. The State labor agency said it is handling an unprecedented number of new claims. It's a historic unemployment crisis that is expected to drain the state's unemployment trust fund and require South Carolina to seek a federal loan, officials previously said.

The Covid-19 coronavirus has caused an international pandemic and we have seen governments across the globe take dramatic efforts to slow the spread and flatten the infection curve in order to reduce the strain on our health care system. We are already seeing these efforts result in extensive impacts to economic activity. However, governments are also implementing or discussing the implementation of significant economic stimulus packages to help with the economic impact.

Recommendations

We believe there is ample demand for the Subject in the PMA and the market supports renovations of the Subject development as proposed. The overall capture rates for the Subject's units with and without subsidy are 6.1 and 14.4 percent, respectively, which are within acceptable demand thresholds. Individual capture

rates by bedroom type range from 4.9 to 8.1 percent, with subsidy. Absent subsidy, the Subject's capture rates at the 60 percent AMI level will range from 11.4 to 19.2 percent. Property managers at area apartments in the PMA indicated that approximately ten percent of residents are from outside the PMA. Therefore, we conservatively estimate that approximately ten percent of the Subject's residents will originate from areas outside of the PMA. Since the demand analysis does not account for support from tenants moving from outside the PMA, it is somewhat conservative. In addition, the Subject is in a community (Newberry) that has few affordable housing alternatives. Between 2019 and market entry, the total number of households is expected to increase at a rate of 0.6 percent annually in the PMA. The Subject site is located within 1.5 miles of most community services and facilities that tenants would utilize on a consistent basis. Overall, we believe that the Subject will be successful in the local market as proposed.

Long Term Impact on Existing LIHTC Properties in the PMA

There are 92 total LIHTC units in the PMA that we included in this comparable analysis, of which, there are only six vacant units. Additionally, both of the LIHTC properties in the PMA that we included in this comparable analysis maintain waiting lists. Since the Subject is an existing Section 8 property that is fully occupied, operates with a subsidy and will continue to benefit from the Section 8 contract post-renovation, we do not expect any impact on the existing low-income rental assisted housing in the market.

A. PROJECT DESCRIPTION

PROJECT DESCRIPTION	
Development Location:	The Subject is located at 186 Newberry Arms, Newberry, Newberry County, South Carolina 29108.
Construction Type:	The Subject consists of 12 two-story townhouse-style and three single-story residential buildings, as well as one single-story management building.
Year Built:	The Subject was originally built in 1980 and proposed for renovations.
Occupancy Type:	For SCHFA purposes, the tenancy is considered general population. The targeted tenancy is not age restricted and will consist of primarily one to six person households. All 60 LIHTC units at the property will continue to be subject to Section 8 restrictions.
Target Income Group:	The Subject will continue to target income-qualified family households with one to six persons. Based on the unit mix, the annual household income levels will range from \$23,349 to \$42,180 for the units at the 60 percent AMI level; however, the Subject will offer subsidized rents allowing tenants to pay 30 percent of their income toward rent, which effectively lowers the minimum income to \$0.
Special Population Target:	None.
Number of Units by Unit Type:	The Subject includes 12 one-bedroom units, 24 two-bedroom units, 18 three-bedroom units, and six four-bedroom units.
Number of Buildings and Stories:	The Subject consists of 12 two-story townhouse-style and three single-story residential buildings, as well as one single-story management building.
Unit Mix:	The following table summarizes the Subject's proposed unit sizes.

UNIT MIX AND SQUARE FOOTAGE									
Unit Type	Number of	Unit Size	Net Leasable						
onic type	Units	(SF)	Area

4BR / 2.5BA	6	1,227	7,362						
TOTAL	60		56,838						

Structure Type/Design:

PROJECT DESCRIPTION

The Subject offers two-story townhouse-style and single-story residential buildings, as well as a single-story management building.

Proposed Rents and Utility Allowance:

The following table details the Subject's proposed rents, utility allowances, unit mix, and unit sizes. It should be noted that all 60 units will continue to benefit from Section 8 subsidies, and tenants will continue to contribute 30 percent of income as rent, not to exceed the lesser of the LIHTC rents and contract rents.

Unit Type	Unit Size (SF)	Number of Units	Current Contract Rent	Proposed LIHTC Asking Rent	Utility Allowance (1)	Gross Rent	2020 LIHTC Maximum Allowable Gross Rent	2020 HUD Fair Market Rents
			6	0% (Section 8)				
1BR/1BA	638	12	\$579	\$595	\$105	\$700	\$700	\$558
2BR/1.5BA	919	24	\$675	\$696	\$145	\$841	\$841	\$735
3BR/1.5BA	1,098	18	\$730	\$792	\$180	\$972	\$972	\$999
4BR/2.5BA	1,227	6	\$844	\$878	\$206	\$1,084	\$1,084	\$1,137
		60						

Utility Structure/Allowance:

The landlord is responsible for cold water, sewer, trash, and common area expenses. The tenant is responsible for all electric expenses including air conditioning, cooking, heating, water heating, and general electric. Post-renovation, the utility structure will remain the same. The Subject's utility allowance is based upon the utility allowance provided by the developer. For adjustment purposes, we have utilized the utility allowance provided by SC Housing (Midlands Region), effective January 1, 2020.

Existing or Proposed Project-Based
Rental Assistance:All 60 of the Subject's LIHTC units will continue to operate with
project-based rental assistance subsidy.

Community AmenitiesThe Subject will feature a central laundry, off-street parking, and
on-site management. Additionally, the Subject will include patrol,
perimeter fencing, and video surveillance as security features.
Post renovation, the Subject will add a playground and community
Wi-Fi.

Unit Amenities The Subject's unit amenities will include blinds, central air conditioning, coat closet, vinyl flooring, and washer and dryers hookups in the two and three-bedroom units. Appliances will include a range and refrigerator. Post renovation, the Subject will add a microwave.

Current Occupancy/Rent Levels:

The property currently offers 60 revenue-generating units, targeted toward the general population, which consist of one, two, three, and four-bedroom units in 12 two-story townhouse-style and three single-story residential buildings. Of the 60 units at the property, all are subject to Section 8 restrictions. According to the rent roll dated June 30, 2020, the Subject is currently fully occupied and maintains an extensive waiting list. The following table summarizes current tenant-paid rents at the Subject.

CURRENT TENANT PAID RENTS*

Unit Type	Number of Units	Vacant Units	Occupancy Rate	Minimum Paid Rent	Maximum Paid Rent	Average Tenant Paid Rent	Current Contract Rents
1BR/1BA	12	0	100.0%	\$0	\$179	\$70	\$579
2BR/1BA	24	0	100.0%	\$0	\$380	\$58	\$675
3BR/1BA	18	0	100.0%	\$0	\$570	\$76	\$730
4BR/1BA	6	0	100.0%	\$0	\$382	\$64	\$844

Source: Rent Roll dated 6/30/2020

*The property is fully subsidized; all tenants pay 30 percent of their income towards rent

Scope of Renovations:

According to information provided by the developer, the total renovation hard costs are estimated to be approximately \$2,808,800 or \$46,813 per unit. The Subject's scope of renovation will include, but will not be limited to:

SCOPE OF RENOVATIONS

Unit Renovations					
Bathroom Vanity, medicine cabinet, tub surround, lighting	Flooring replacement				
Bathroom fixtures	Central air conditioning				
Kitchen cabinets, counters, sinks	Interior doors				
Kitchen appliances: stoves, microwaves, range hood, refrigerators	Hot water heaters

B. SITE DESCRIPTION

SITE DESCRIPTION

The neighborhood surrounding an apartment property often impacts the property's status, image, class, and style of operation, and sometimes its ability to attract and properly serve a particular market segment. This section investigates the property's neighborhood and evaluates any pertinent location factors that could affect its rent, its occupancy, and overall profitability. Additionally, the site description discusses the physical features of the site, as well as the layout, access issues, and traffic flow. A map of the Subject's neighborhood follows, with general boundaries as indicated:

Main Street

North:

Date of Site Visit:

Physical Features of Site:

June 30, 2020.

The site contains approximately 6.00 acres. It is irregular in shape and generally level. The site has frontage along the west side of Wilson Road (US Highway 76), while Newberry Arms serves as a private driveway to the Subject's parking areas. According to Ward Braswell with the City of Newberry planning and development services department, the Subject is zoned Residential Mix Use (RMX),

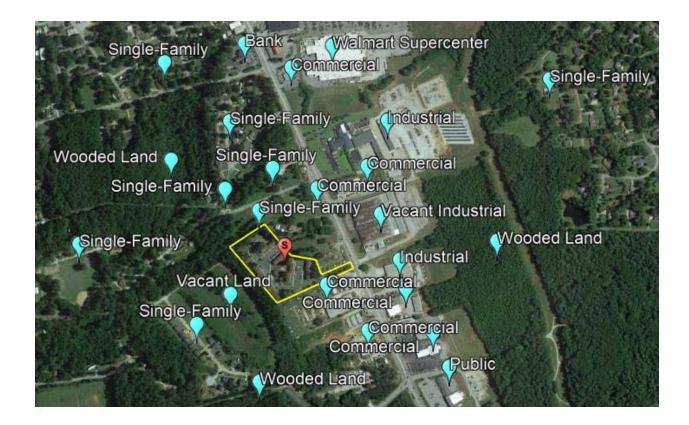

which purpose is to accommodate a mixture of a wide range of residential types at medium densities including single-family detached units, duplexes, multi-family developments, townhouses, and compatible non-residential uses. Multifamily residential density limits and parking requirements are established on a case-by-case basis with the context of its location by the City of Newberry.

Location/Surrounding Uses: The Subject is located in a mixed use neighborhood consisting of commercial, industrial, and public uses, single-family homes in average to good condition, and wooded land. Immediately north and west of the Subject is wooded land followed by single-family homes. Further north are various commercial uses along Main Street and Wilson Road. Immediately east and south of the Subject are commercial and industrial uses, including a vacant industrial building, boat dealers, and small commercial uses. Further east, south, and west are wooded land and single-family homes. Retail in the area is in generally fair to average condition and appeared to be approximately 80 percent occupied. Overall, the Subject site is considered an adequate site for rental housing.

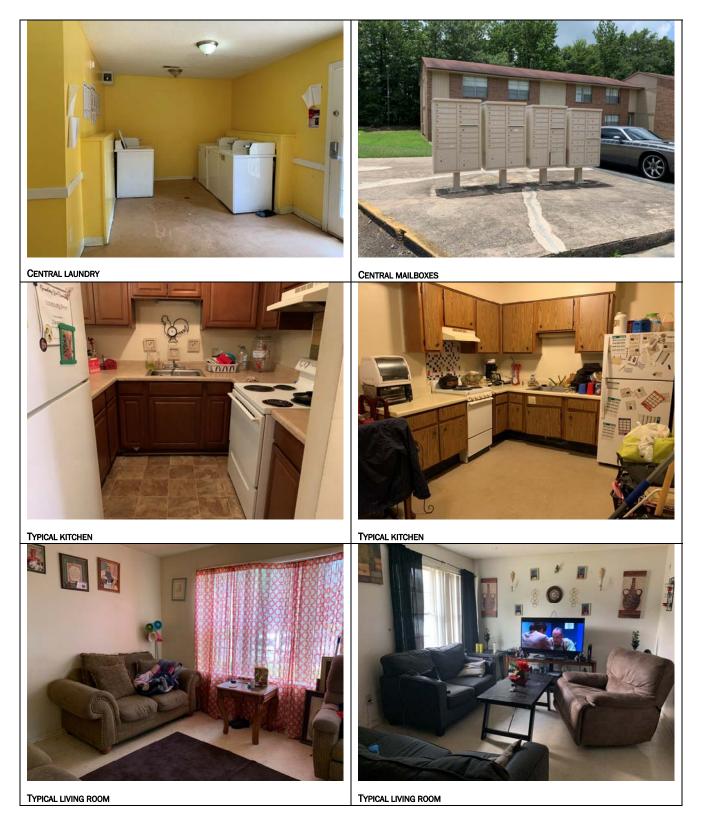

Surrounding Land Uses:

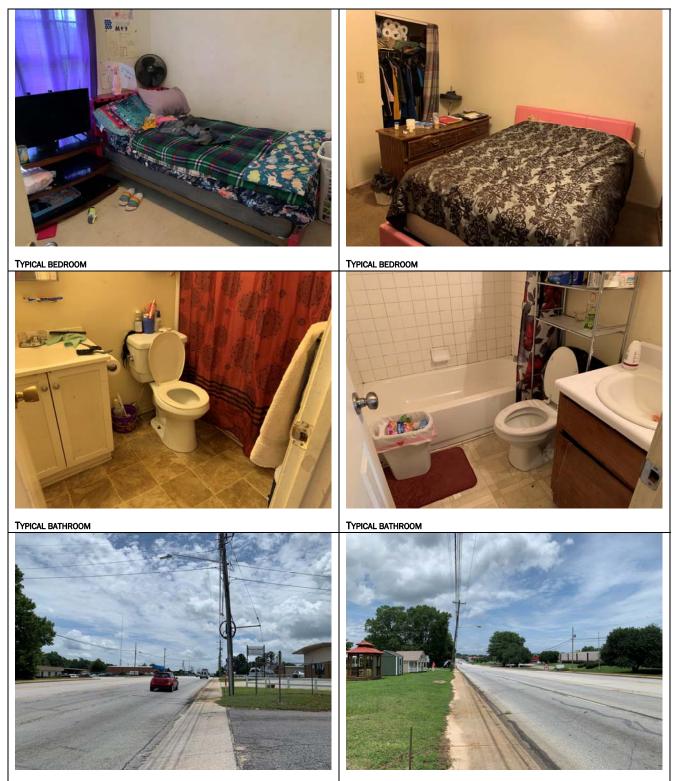

The following map and pictures illustrate the surrounding land uses.

VIEW FROM SUBJECT LOOKING SOUTH ON HIGHWAY 76

VIEW FROM SUBJECT LOOKING NORTH ON HIGHWAY 76

TYPICAL SINGLE-FAMILY HOME IN SUBJECT NEIGHBORHOOD

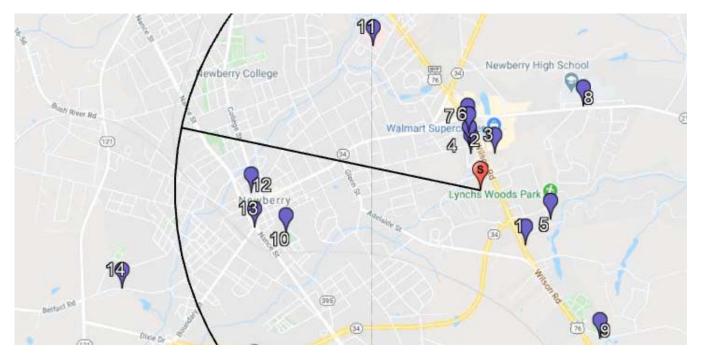

TYPICAL SINGLE-FAMILY HOME IN SUBJECT NEIGHBORHOOD

Visibility/Views: The Subject is located in a mixed use neighborhood consisting of commercial uses, industrial uses, single-family homes, public uses, and wooded land. Immediately north and west of the Subject is wooded land followed by single-family homes. Immediately east and south of the Subject are commercial and industrial uses, including a vacant industrial building, boat dealers, and small commercial uses. Overall, visibility is fair and views are considered average.

Detrimental Influence: At the time of the site inspection, there were no detrimental influences observed by the appraiser that would adversely impact the marketability of the Subject.

Proximity to Local Services: The Subject is located in reasonable proximity to local services including a police station, fire department, Walmart Supercenter, bank, park, gas station, pharmacy, high school, YMCA, elementary school, hospital, post office, and library. The following table details the Subject's distance from key locational amenities. A Locational Amenities Map, corresponding to the table below, is following.

LOCATIONAL AMENITIES						
#	Service or Amenity	Distance	#	Service or Amenity	Distance	
1	Newberry County Sheriff Office	0.4 miles	8	Newberry High School	1.0 miles	
2	Newberry City Fire Department	0.4 miles	9	Newberry YMCA	1.1 miles	
3	Walmart Supercenter	0.4 miles	10	Boundary Street Elementary	1.3 miles	
4	South State Bank	0.4 miles	11	Newberry Hospital	1.3 miles	
5	Lynchs Woods Park	0.5 miles	12	United States Postal Service	1.5 miles	
6	Shell Gas Station	0.5 miles	13	Hal Kohn Memorial Library	1.5 miles	
7	CVS Pharmacy	0.6 miles	14	Newberry Middle School	2.4 miles	

Availability of Public Transportation:	There is not currently any fixed-route public transportation available in the city of Newberry or surrounding Newberry County. Dial-a-ride services are offered to Newberry County residents age 60 and older through service provider Newberry County Council on Aging.
Road/Infrastructure Proposed Improvements:	We witnessed no current road improvements within the Subject's immediate neighborhood.
Crime Rates:	Based upon our site inspection, there appeared to be no crime issues

in the Subject's neighborhood and property managers did not report having issues with crime. The following table illustrates crime statistics in the Subject's PMA compared to the SMA.

	РМА	Newberry, SC Micropolitan Statistical Area
Total Crime*	90	84
Personal Crime*	130	113
Murder	130	84
Rape	77	67
Robbery	55	46
Assault	172	152
Property Crime*	85	80
Burglary	106	86
Larceny	80	81
Motor Vehicle Theft	69	65

2019 CRIME INDICES

Source: Esri Demographics 2019, Novogradac Consulting LLP, July 2020

*Unweighted aggregations

Total crime risk indices in the PMA are below the national average and slightly above the MSA. Both geographic areas feature crime risk indices below the overall nation. The Subject's security features include perimeter fencing, video surveillance, and a security patrol. The upcoming Supply Section of this report provides a more detailed analysis of crime risk indices on a 0.5 mile basis.

Access and Traffic Flow: The Subject is accessible from the west side of Wilson Road (US Highway 76), a four-lane arterial road. Wilson Road provides access to Main Street (State Highway 219), approximately 0.4 miles to the north, and Columbia, SC, approximately 36.8 miles to the southeast. Main Street provides access to downtown Newberry, approximately 1.5 miles to the west, and Interstate 26, approximately 2.9 miles to the east. Interstate 26 connects with Interstate 385, approximately 22.0 miles to the northwest. Interstate 385 provides access to Greenville, approximately 59.5 miles to the northwest. Overall, access and traffic flow are considered good.

Positive/Negative Attributes: The Subject's neighborhood appears to be an adequate location for an existing affordable multifamily development. Most desirable locational amenities are located within 1.5 miles from the Subject property including a police station, fire department, Walmart

Supercenter, bank, park, gas station, pharmacy, high school, YMCA, elementary school, hospital, post office, and library. The Subject is located in a mixed-use neighborhood and is a compatible use within the existing neighborhood. We did not observe any negative attributes pertaining to the Subject site during our inspection.

C. MARKET AREA

PRIMARY MARKET AREA

For the purpose of this study, it is necessary to define the market area, or the area from which potential tenants for the project are likely to be drawn. In some areas, residents are very much "neighborhood oriented" and are generally very reluctant to move from the area where they have grown up. In other areas, residents are much more mobile and will relocate to a completely new area, especially if there is an attraction such as affordable housing at below market rents.

The PMA is defined as Newberry County. We confirmed the PMA with property managers in the area, including the Subject's property manager. We anticipate that the Subject will experience some "leakage" from outside of the PMA and we estimated that 10 percent of the Subject's tenants will come from outside of these boundaries. Therefore, we anticipate that the majority of the Subject's tenants will come from within the boundaries of the PMA. Approximate distances to the farthest boundaries of the PMA in each direction are as follows:

North:	18 miles
East:	16 miles
South:	15 miles
West:	21 miles

The PMA includes all or part of the following census tracts:

CENSUS T	RACTS
450719501.00	450719505.02
450719502.01	450719506.01
450719502.02 (Subject)	450719506.02
450719503.00	450719507.00

The primary market area has been identified based upon conversations with management at market rate and LIHTC properties in the area as well as other market participants in addition to demographic characteristics of census tracts within the area. Although we believe that neighborhood characteristics and geographic/infrastructure barriers are typically the best indicators of PMA boundaries, we have also examined demographic characteristics of census tracts in and around the Newberry area in an effort to better identify the Subject's PMA. It is important to note however that we do not base our PMA determinations on census tract information alone as these boundaries are rarely known to the average person.

The secondary market area (SMA) for the Subject is considered to be Newberry, Fairfield, Richland, Lexington, Saluda, Greenwood, Laurens, and Union County.

As per SCSHFDA guidelines, we have provided a table that illustrates the racial characteristics of the PMA, as well as data for the SMA.

	PN	1A	SN	SMA		USA

Source: Esri Demographics 2019, Novogradac Consulting LLP, July 2020

Employment in the PMA is concentrated in the manufacturing, healthcare/social assistance, and retail trade industries, which collectively comprise 41.2 percent of local employment. The large share of PMA employment in manufacturing and retail trade is notable as both industries are historically volatile, and prone to contraction during recessionary periods. However, the PMA also has a significant share of employment in the healthcare industry, which is historically known to exhibit greater stability during recessionary periods. Relative to the overall nation, the PMA features comparatively greater employment in the manufacturing, agric/forestry/fishing/hunting, and admin/support/waste mgmt srvcs industries. Conversely, the PMA is underrepresented in the prof/scientific/tech services, healthcare/social assistance. and transportation/warehousing industries.

The following table illustrates the changes in employment by industry from 2000 to 2019, in the Subject's PMA.

2000-2019 CHANGE IN EMPLOYMENT - PMA						
	<u>20</u>	00	<u>20</u>	<u>19</u>	<u>2000</u>	<u>)-2019</u>

2000-2019 CHANGE IN EMPLOYMENT - PMA

Source: Esri Demographics 2019, Novogradac Consulting LLP, July 2020

*Industry data current as of 2010. Other projections current as of 2019.

* Change in percentage is calculated as a rate of change by industry.

Total employment in the PMA increased at an annualized rate of 0.7 percent between 2000 and 2019. The industries which expanded most substantially during this period include healthcare/social assistance, admin/support/waste mgmt srvcs, and other services. Conversely, the manufacturing, utilities, and retail trade sectors experienced the least growth. Overall, we view the lessening reliance on the volatile manufacturing sector, and concurrent rise in healthcare-related employment as a positive aspect of the local economy.

Major Employers

The following table details major employers in Newberry County.

MAJOR EMPLOYERS – NEWBERRY COUNTY						
#	Employer Name	Industry	Number of Employees			
1	Kraft-Heinz	Manufacturing	2,700			
2	Newberry County School District	Educational Services	830			
3	Samsung	Manufacturing	800			
4	Newberry County Memorial Hospital	Healthcare/Social Assistance	474			
5	Shakespeare Composite Structures	Manufacturing	200			
6	Newberry County	Public Administration	200			
7	Trucast	Manufacturing	175			
8	Pioneer Frozen Foods	Manufacturing	160			
9	Newberry College	Educational Services	150

11	ISE America	Manufacturing	140			
12	Maclean Fiberglass	Manufacturing	117			
13	Packaging Corp of America	Manufacturing	100			
14	Komatsu	Manufacturing	100			
15	Metal Masters Inc	Manufacturing	85			
16	Kiswire	Manufacturing	75			
17	Graphic Packaging International	Manufacturing	50			
18	Georgia-Pacific	Manufacturing	12			
	Totals		6,518			

Source: Central SC Alliance, January 2020

The major employers within Newberry County are heavily concentrated in the manufacturing sector, which accounts for 74.6 percent of the major employers. Additional employment concentrations are in the educational services, healthcare/social assistance, and public administration sectors, which account for 15.0, 7.3, and 3.1 percent of major employers, respectively. The manufacturing sector is prone to cyclical employment cycles, while the educational services, healthcare/social assistance, and public administration sectors are relatively stable during economic downturns. Overall, the major employers represent diverse industry sectors and account for a significant amount of the area's employment; however, the heavy concentration in the manufacturing sector could result in economic volatility during periods of economic growth or recession.

Expansions/Contractions

Business Expansions

According to the Central SC Alliance, there have been several business openings and expansions in Newberry County since 2016. The following table illustrates these openings and expansions.

BUSINESS OPENINGS AND EXPANSIONS - NEWBERRY COUNTY					
Company	Industry	Туре	Date Announced	Capital Investment	Jobs Added
KRA Operations LLC	Manufacturing	New	12/23/2019	\$11,500,000	57
lecate Energy West Newberry LL	Utilities	New	12/19/2019	\$5,000,000	N/A
MM Technics	Manufacturing	Expansion	10/3/2019	\$6,000,000	35
Big Gun Robotics	Manufacturing	Expansion	8/28/2019	\$3,600,000	16
Trucast	Manufacturing	Expansion	11/1/2017	\$3,000,000	10
Samsung	Manufacturing	New	6/28/2017	\$380,000,000	800
MM Technics	Manufacturing	New	12/14/2016	\$12,600,000	65
West Fraser Timber	Manufacturing	Expansion	10/18/2016	\$33,000,000	N/A
Falcon Boats	Manufacturing	Expansion	3/24/2016	\$1,500,000	35
Total	-			\$456,200,000	1,018

Source: Central SC Alliance, January 2020

As illustrated, there were nine significant business opening and expansions in Newberry County between 2016 and 2020 year-to-date. Eight of the projects were in the manufacturing sector, while the remaining was in the utilities sector (solar energy). Between 2016 and 2020 year-to-date, there were 1,018 new jobs created and \$456,200,000 in capital investment.

WARN Notices

According to the South Carolina Department of Employment and Workforce, there was one WARN listing in Newberry County between 2016 and July 2020.

• In April of 2016, Caterpillar announced that it would be closing its Newberry plant; resulting in 10 lost positions.

As illustrated above, there have only been 10 employees in Newberry County impacted by layoffs or closures since 2016. The only closure was in the manufacturing sector.

Employment and Unemployment Trends

The following table details employment and unemployment trends for the Greenville-Anderson-Mauldin, SC SMA from 2003 to October 2019.

EMPLOYMENT & UNEMPLOYMENT TRENDS (NOT SEASONALLY ADJUSTED)

Source: U.S. Bureau of Labor Statistics, July 2020

*2020 data is through October

Since 2012, job growth in the MSA generally exceeded the nation. As of April 2020, MSA employment is below record levels; and is declining at an annualized rate of 10.1 percent, compared to a 14.9 percent decline across the overall nation. The recent decline in employment and increase in unemployment rates are likely due to COVID-19.

Since 2012, the MSA generally experienced a lower unemployment rate compared to the overall nation. According to the most recent labor statistics, the unemployment rate in the MSA is 8.8 percent, lower than the current national unemployment rate of 14.4 percent.

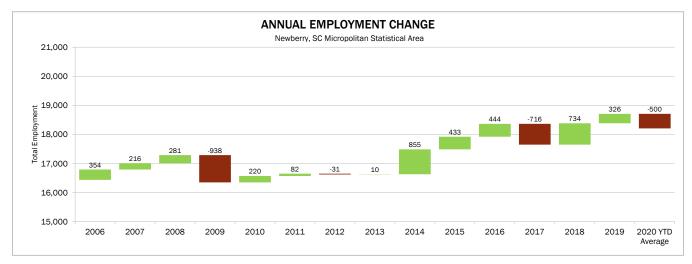

According to the South Carolina Department of Employment and Workforce (DEW), from May 31 to June 6, there were 22,734 people that filed for unemployment for the first time. That was a rise from the week of May

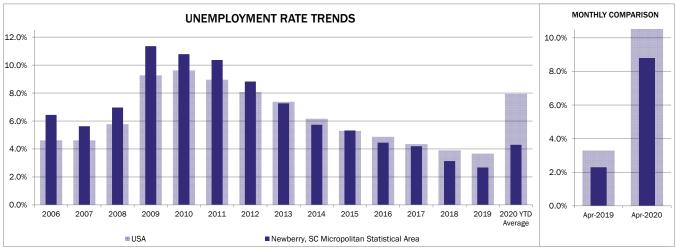

24-30, when 18,986 unemployment claims were made in South Carolina. In that time, the agency reports paying more than \$2.1 billion in a combination of state unemployment benefits, along with CARES Acts funds, Federal Pandemic Unemployment Compensation, Pandemic Unemployment, and Pandemic emergency Unemployment Compensation. The State labor agency said it is handling an unprecedented number of new claims. It's a historic unemployment crisis that is expected to drain the state's unemployment trust fund and require South Carolina to seek a federal loan, officials previously said.

The Covid-19 coronavirus has caused an international pandemic and we have seen governments across the globe take dramatic efforts to slow the spread and flatten the infection curve in order to reduce the strain on our health care system. We are already seeing these efforts result in extensive impacts to economic activity. However, governments are also implementing or discussing the implementation of significant economic stimulus packages to help with the economic impact.

The following tables provide more illustration of the changes in employment and unemployment rate trends in the MSA.

Housing and Economy

According to RealtyTrac's May 2020 estimates, the city experienced a foreclosure rate of one in every 4,316 housing units. Newberry County experienced a similar foreclosure rate compared to the city, and experienced a foreclosure rate of one in every 4,316 housing units in May 2020. The state of South Carolina had a

foreclosure rate of one in every 10,667 housing units, a rate much lower when compared to the city and county of Newberry.

COMMUTING PATTERNS

As shown in the preceding table, the weighted average commute time in the PMA is approximately 27 minutes. More than 59 percent of PMA commuters travel under 24 minutes, indicating many households work in the local area. The average commute time across the overall nation is approximately 28 minutes.

COMMUTING PATTERNS								
ACS Commuting Time to Work Number of Commuters Percentage								
Travel Time < 5 min	642	4.1%						
Travel Time 5-9 min	2,010	12.8%						
Travel Time 10-14 min	2,642	16.9%						
Travel Time 15-19 min	1,949	12.4%						
Travel Time 20-24 min	2,131	13.6%						
Travel Time 25-29 min	1,150	7.3%

CONCLUSION

Employment in the PMA is concentrated in the manufacturing, healthcare/social assistance, and retail trade industries, which collectively comprise 41.2 percent of local employment. The large share of PMA employment in manufacturing and retail trade is notable as both industries are historically volatile, and prone to contraction during recessionary periods. However, the PMA also has a significant share of employment in the healthcare industry, which is historically known to exhibit greater stability during recessionary periods. Since 2012, job growth in the MSA generally exceeded the nation. As of April 2020, MSA employment is below record levels; and is declining at an annualized rate of 10.1 percent, compared to a 14.9 percent decline across the overall nation. Since 2012, the MSA generally experienced a lower unemployment rate compared to the overall nation. According to the most recent labor statistics, the unemployment rate in the MSA is 8.8 percent, lower than the current national unemployment rate of 14.4 percent. The recent decline in employment and rise in unemployment rates is likely due to COVID-19. However, the MSA seems to be outperforming the overall nation.

The Covid-19 coronavirus has caused an international pandemic and we have seen governments across the globe take dramatic efforts to slow the spread and flatten the infection curve in order to reduce the strain on our health care system. We are already seeing these efforts result in extensive impacts to economic activity. However, governments are also implementing or discussing the implementation of significant economic stimulus packages to help with the economic impact.

E. COMMUNITY DEMOGRAPHIC DATA

COMMUNITY DEMOGRAPHIC DATA

The following sections will provide an analysis of the demographic characteristics within the market area. Data such as population, households and growth patterns will be studied to determine if the Primary Market Area (PMA) and Secondary Market Area (SMA), are areas of growth or contraction. The discussions will also describe typical household size and will provide a picture of the health of the community and the economy. The following demographic tables are specific to the populations of the PMA, SMA, and nation.

Population Trends

The following tables illustrate (a) Total Population, (b) Population by Age Group, and (c) Population Growth.

		POP	ULATION			
Year	l	PMA		SC Micropolitan tical Area	USA

Source: Esri Demographics 2019, Novogradac Consulting LLP, July 2020

The PMA experienced declining population growth between 2000 and 2010, as did the surrounding MSA. Population growth in the PMA accelerated between 2010 and 2019, and grew at a rate similar to the MSA. According to ESRI demographic projections, annualized PMA growth is expected to remain relatively stable at 0.4 percent through 2024, similar to the MSA and below the nation.

The population in the PMA in 2019 was concentrated most heavily in the age groups of 60 to 64, 55 to 59, and 65 to 69. Combined, these age groups represent 21.2 percent of the total population in the PMA. Through market entry, the age groups of 60 to 64, 55 to 59, and 65 to 69 will continue to have the highest representation in the PMA.

The PMA experienced negative household growth between 2000 and 2010 and was similar to the surrounding MSA, but lagged behind the nation as a whole, which reported faster growth over the same time period. Household growth in the PMA increased between 2010 and 2019, and again was similar to the surrounding MSA and lagged behind the nation as a whole during the same time period. The average household sizes are expected to remain relatively stable for all areas of analysis. The number of persons in group quarters increased in the PMA between 2000 and 2019. Note that forecasted data for the population in group quarters

is not available as growth in this population is more often a result of changes to local facilities than macro demographic trends.

Households by Tenure

The table below depicts household growth by tenure from 2000 through 2024.

The preceding table details household tenure patterns in the PMA since 2000. The percentage of renter households in the PMA remained relatively stable between 2000 and 2019, and is estimated to be 28.3 percent as of 2019. This is similar to the estimated 33 percent of renter households across the overall nation. According to ESRI demographic projections, the percentage of renter households in the PMA is expected to remain relatively stable through 2024.

Household Income Distribution

The following table depicts household income in the PMA from 2019 to 2024.

HOUSEHOLD INCOME PMA						
PMA

As proposed, the Subject will target households earning between \$0 and \$43,380 as proposed, and between \$24,000 and \$43,380 absent subsidy. As the table above depicts, approximately 46.1 percent of households in the PMA earned between \$0 and \$39,999 in 2019.

Renter Household Income Distribution

The following tables depict renter household incomes in the PMA in 2019, market entry, and 2024.

RENTER HOUSEHOLD INCOME DISTRIBUTION - PMA						
Income Cohort	2019		Projected Mkt Entry September 2021		2024

RENTER HOUSEHOLD INCOME DISTRIBUTION - PMA

Source: HISTA Data / Ribbon Demographics 2019, Novogradac Consulting LLP, July 2020

Renter households with incomes between \$0 and \$39,999 represent 64.9 percent of the renter households in the PMA in 2019, and this share is expected to decline slightly through market entry.

Renter Households by Number of Persons in the Household

The following table illustrates household size for renter households in the PMA.

	Projected Mkt Entry September							
Household Size	2019		2021		2024			
	Number	Percentage	Number	Percentage	Number	Percentage		
1 Person	1,647	37.6%	1,663	37.8%	1,683	38.0%		
2 Persons	1,072	24.5%	1,072	24.3%	1,072	24.2%

5+ Persons	494	11.3%	495	11.2%	497	11.2%		
Total Households	4,380	100%	4,403	100%	4,433	100%		

RENTER HOUSEHOLDS BY NUMBER OF PERSONS - PMA

Source: HISTA Data / Ribbon Demographics 2019, Novogradac Consulting LLP, July 2020

Approximately 62.1 percent of renter households resided in a one to two-person household in the PMA in 2019. Over the next five years, this percentage is projected to remain stable.

Conclusion

The PMA experienced declining population between 2000 and 2010 and was similar to the surrounding MSA, but lagged behind the nation as a whole, which reported a higher growth over the same time period. Population growth in the PMA increased between 2010 and 2019, and grew at a similar pace when compared to the MSA. According to ESRI demographic projections, annualized PMA growth is expected to remain relatively stable at 0.4 percent through 2024, similar to the MSA and below the overall nation. The average household sizes are expected to remain relatively stable for all areas of analysis. Renter households with incomes between \$0 and \$39,999 represent 64.9 percent of the renter households in the PMA in 2019, and this share is expected to decline slightly through market entry. Many of these households would income-qualify at the Subject.

F. PROJECT-SPECIFIC DEMAND ANALYSIS

PROJECT SPECIFIC DEMAND ANALYSIS

The following demand analysis evaluates the potential amount of qualified households, which the Subject would have a fair chance at capturing. The structure of the analysis is based on the guidelines provided by SCSHFDA.

1. Income Restrictions

LIHTC rents are based upon a percentage of the Area Median Gross Income (AMI), adjusted for household size and utilities. South Carolina State Housing Finance and Development Agency (SCSHFDA) will estimate the relevant income levels, with annual updates. The rents are calculated assuming that the maximum gross rent a family household will pay is 35 percent of its household income at the appropriate AMI level and the maximum gross rent a senior household will pay is 40 percent of its household income at the appropriate AMI level.

According to SCSHFDA, household size is assumed to be 1.5 persons per bedroom for LIHTC rent calculation purposes. For example, for one-bedroom units we assume the average income limits of a one- and two-person household and for three-bedroom units we assume the average income limits for a four- and five-person household. This applies to family projects. For elderly projects, we have used a maximum income based on two-person households.

To assess the likely number of tenants in the market area eligible to live in the Subject, we use Census information as provided by ESRI Business Information Solutions to estimate the number of potential tenants who would qualify to occupy the Subject as a LIHTC project.

The maximum income levels are based upon information obtained from the Rent and Income Limits Guidelines Table as accessed from Novogradac Consulting's website.

2. Affordability

As discussed above, the maximum income for LIHTC units is set by SCSHFDA while the minimum is based upon the minimum income needed to support affordability. This is based upon a standard of 35 percent. Lower and moderate-income families typically spend greater that 30 percent of their income on housing. These expenditure amounts can range higher than 50 percent depending upon market area. However, the 30 to 40 percent range is generally considered a reasonable range of affordability. SCSHFDA guidelines utilize 35 for families and 40 percent for senior households, which we will use to set the minimum income levels for the demand analysis.

3. Minimum and Maximum Income Levels

The following tables illustrate the minimum and maximum allowable income levels for the Subject's units, as proposed with rental assistance and as proposed absent subsidy.

	FAMILT INCOME LIMITS - AS PROPOSED							
	Minimum	Maximum						
Unit Type	Allowable	Allowable						
	Income	Income						
	@60% (Section 8)							
1BR	\$0	\$29,880						
2BR	\$O	\$33,660						
3BR	\$O	\$40,380						
4BR	\$O	\$43,380						

FAMILY INCOME LIMITS - AS PROPOSED

Unit Type	Minimum Allowable Income	Maximum Allowable Income
	@6	60%
1BR	\$24,000	\$29,880
2BR	\$28,834	\$33,660
3BR	\$33,326	\$40,380
4BR	\$37,166	\$43,380

FAMILY INCOME LIMITS - ABSENT SUBSIDY

4. Demand

The demand for the Subject will be derived from two sources: existing households and new households. These calculations are illustrated on the attached table.

4a. Demand from New Renter Households

The number of new households entering the market is the first level of demand calculated. SCSHFDA has requested that we utilize 2019 as the base year for the analysis, with demographic projections to 2021. This is considered the gross potential demand for the Subject property. This number is adjusted for income eligibility and renter tenure.

4b. Demand from Existing Households

Demand for existing households is estimated by summing three sources of potential tenants. (a) The first source is tenants who are rent overburdened. These are households who are paying over 35 percent of their income in housing costs for general occupancy housing or over 40 percent of their income in housing costs for elderly housing. This number is estimated using census 2010 or American Community Survey (ACS) data. (b) The second source is households living in substandard housing. This number is estimated using 2000 Census data. (c) The third source is those seniors likely to move from their own homes into rental housing. Data from the American Housing Survey and interviews with area senior apartment property managers regarding the number or share of current renters who originated from homeownership must be used to refine the analysis. The Subject is rural and generally not likely to attract homeowners seeking to downsize into a family rental unit. (d) The fourth potential "Other" source of demand is demand which may exist that is not captured by the above methods, which may be allowed if the factors used can be fully justified.

4c. Additions to Supply

SCSHFDA guidelines indicate that units in all competing projects that were allocated, under construction, placed in service, or funded in 2019 as well as those units at properties that have not reached a stabilized occupancy of 93 percent should be removed from the demand analysis. There are no such properties in the PMA.

5. Method – Capture Rates

The above calculations and derived capture rates are illustrated in the following table.

60% AMI -	With Subsidy

Conclusions

We have conducted such an analysis to determine a base of demand for the Subject as a tax credit property. Several factors affect the indicated capture rates and are discussed following.

- The number of households in the PMA is expected to increase 0.6 percent between 2019 and projected market entry 2021.
- This demand analysis does not measure the PMA's or Subject's ability to attract additional or latent demand into the market from elsewhere by offering an affordable option. Property managers at area apartments in the PMA indicated that approximately ten percent of residents are from outside the PMA. Therefore, we conservatively estimate that approximately ten percent of the Subject's residents will originate from areas outside of the PMA. Since the demand analysis does not account for support from tenants moving from outside the PMA, it is somewhat conservative.

The following table illustrates demand and net demand for the Subject's units. Note that these capture rates are not based on appropriate bedroom types, as calculated previously.

DEMAND AND NET DEMAND										
	HH at @60% AMI With Subsidy (\$0 to \$43,380)	HH at @60% AMI Absent Subsidy (\$24,000 to \$43,380)								
Demand from New Households (Age and Income Appropriate)	-38	-2								
PLUS	+	+								
Demand from Existing Renter Households – Rent Overburdened Households	951	380								
PLUS	+	+								
Demand from Existing Renter Households – Substandard Housing	50	20								
=	=	=								
Sub Total	963	397								
Demand from Existing Households – Elderly Homeowner Turnover	0	0								
Equals Total Demand	963	397								
Less	-	-								
New Supply	0	0								
Equals Net Demand	963	397								

Note that the above *Demand and Net Demand* estimates include all income-eligible renter households. These estimates are then adjusted to reflect only the size-appropriate households by bedroom type in the following *Capture Rate Analysis*.

CAPTU	CAPTURE RATE ANALYSIS CHART - AS PROPOSED										
Rodrooms / AMI Loval	Total	Supply	Net Demand	Units	Capture Rate						
Bedrooms/AMI Level	Demand	Supply	Net Demanu	Proposed	Capture Rate						
1BR @60%	247	0	247	12	4.9%						
2BR @60%	338	0	338	24	7.1%						
3BR @60%	325	0	325	18	5.5%						
4BR @60%	74	0	74	6	8.1%						
Overall	984	0	984	60	6.1%						

CAPTUF	CAPTURE RATE ANALYSIS CHART - ABSENT SUBSIDY											
Bedrooms/AMI Level	Total	Supply	Net Demand	Units	Capture Rate							
Beurooms/ Aivii Lever	Demand	Supply	NetDemanu	Proposed	Capture Rate							
1BR @60%	105	0	105	12	11.4%							
2BR @60%	143	0	143	24	16.7%							
3BR @60%	138	0	138	18	13.0%							
4BR @60%	31	0	31	6	19.2%							
Overall	418	0	418	60	14.4%							

As the analysis illustrates, the Subject's capture rates with subsidy at the 60 percent AMI level will range from 4.9 to 8.1 percent. Absent subsidy, the Subject's capture rates at the 60 percent AMI level will range from 11.4 to 19.2 percent. The overall capture rates for the Subject's units with and without subsidy are 6.1 to 14.4 percent, respectively. The Subject's overall capture rates are within SCSHFDA guidelines, and we believe that there is ample demand for the Subject's units.

Absorption Rate

None of the surveyed comparable properties were able to report relevant absorption data. As supplemental data, we have searched the region for LIHTC properties with recent absorption data. Absorption rates at these properties are detailed in the table below.

		ABSORPTION			
Property Name	Rent	Tenancy	Year	Total Units	Absorption (units/month)
The Pointe At Lake Murray	LIHTC	Family	2019	60	12
Willis Trace	LIHTC	Family	2016	28	28
Parkside At Verdae	LIHTC	Family	2012	56	30
Average					23

On average, these properties reported an absorption rate of 23 units per month. With the stable demographic base of low-income families in the PMA and the general limited supply of affordable multifamily housing, we believe the Subject should be able to experience an absorption rate similar to the average. Therefore, based upon the demand calculations presented within this report, which indicate capture rates within SCSHFDA guidelines, and an ample number income-qualified households, we believe that the Subject could absorb approximately 20 units per month upon opening. This equals an absorption period of approximately three months. This is considered largely hypothetical due to the likelihood that all of the Subject's current tenants will continue to be income eligible to remain at the property post-renovation. As such, we believe the Subject will stabilize within one month of rehabilitation completion.

G. SUPPLY ANALYSIS

SURVEY OF COMPARABLE PROJECTS

Comparable properties are examined on the basis of physical characteristics, i.e. building type, age/quality, level of common amenities, absorption, as well as similarity in rent. We attempted to compare the Subject to complexes from the competing market to provide a broader picture of the health and available supply in the market. We surveyed many properties that we chose not to use in the survey because they were not as comparable to the Subject as others that were selected.

Description of Property Types Surveyed/Determination of Number of Tax Credit Units

We interviewed numerous properties to determine which ones were considered "true" competition for the Subject. Several properties in the market area were interviewed and not included because of their dissimilarity or other factors. Fully subsidized properties were excluded due to differing rent structures from the Subject without a subsidy; however, it should be noted that subsidized properties in the market area were found to have stable occupancies.

Property Name	Rent Structure	Tenancy	Reason for Exclusion
Pineridge Apartments	LIHTC	Family	Unable to Contact

Holly Hall Apartments	Market	Family	Unable to Contact

The following table illustrates the excluded properties within the Subject's PMA.

LIHTC Competition

According to the SCSHFDA allocation list one projects was awarded tax credits in the PMA since 2016.

Indian Hills Apartments is a family development that was allocated tax credits in 2017 for the acquisition and rehabilitation of an existing LIHTC/USDA development that was placed in service in 2001. This property is fully-occupied. It should be noted, we did not utilize the development as a comparable due to subsidized rents.

Pipeline Construction

We were unable to reach a contact with the city of Newberry Planning Department regarding planned, proposed, or under construction developments in the PMA. Therefore, we conducted online research and utilized a CoStar new construction report. According to our online research and the CoStar database, there are no new or planned developments in the construction pipeline within Newberry County.

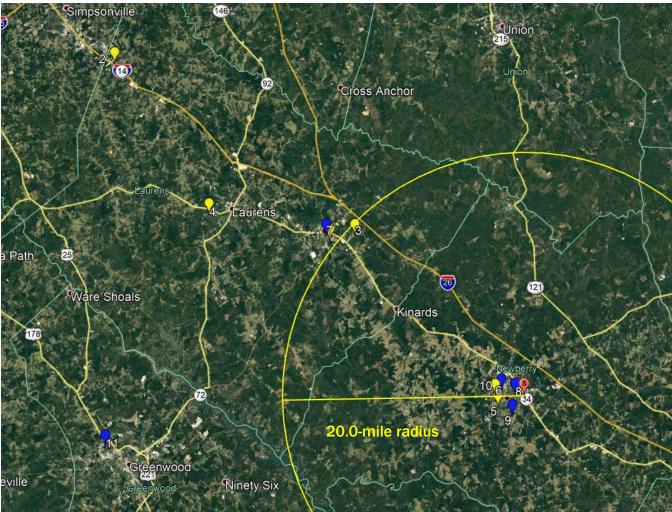

Comparable Properties

Property managers and realtors were interviewed for information on unit mix, size, absorption, unit features and project amenities, tenant profiles, and market trends in general. To evaluate the competitive position of the Subject, 690 units in 11 rental properties were surveyed in depth. We included six affordable comparables and five market rate comparables that offer similar unit mixes; five of which are located in the PMA and six are located outside of the PMA. The affordable comparables were constructed or renovated between 2001 and 2010 and the market rate comparables were constructed or renovated between 2006 and 2020. Overall, the availability of LIHTC and market rate data is considered adequate to support our conclusions.

A detailed matrix describing the individual competitive properties as well as the proposed Subject is provided on the following pages. A Comparable Properties Map, illustrating the location of the Subject in relation to comparable properties is also provided on the following page. The properties are further profiled in the writeups following. The property descriptions include information on vacancy, turnover, absorption, age, competition, and the general health of the rental market, when available. Throughout the course of performing this analysis of the local rental market, many apartment managers, realtors, leasing agents, and owners were contacted in person, or through the telephone or email.

Comments

The contact reported stable occupancy so far in 2020. Rents increased in May bringing up the units at 50 percent AMI to the 2020 maximum allowable rates. Rents increased on the units at 60 percent AMI but those are still under the max rates since most households would be overburdened paying the max. The contact noted there has been no negative impact on the property from COVID-19 and no major job losses amongst tenants although some have had reduced work hours in some instances. She added there have been no issues with rent collection during the past four months during the pandemic.

Trend: Comments

4Q09 The property is a proposed combination LIHTC and HOME development, targeted toward families. The units will be contained in five garden-style apartment buildings, with Hardi-Plank siding and brick (40%) exterior. There will be a separate leasing/community building. There will be 81 parking spaces provided.

- 1Q18 The contact at this development began working here in 2011 and was unable to provide the absorption pace.
- 1020 No additional comments.
- 3020 The contact reported stable occupancy so far in 2020. Rents increased in May bringing up the units at 50 percent AMI to the 2020 maximum allowable rates. Rents increased on the units at 60 percent AMI but those are still under the max rates since most households would be overburdened paying the max. The contact noted there has been no negative impact on the property from COVID-19 and no major job losses amongst tenants although some have had reduced work hours in some instances. She added there have been no issues with rent collection during the past four months during the pandemic.

Trend: Comments

4Q12 Management reported that they currently have zero vacancies but that they have three units slated to move out over the course of the month, but that they already have them filled with tenants who are have been qualified. Management stated they maintain a wait list or callback list that is approximately 400 to 500 people long and see a strong demand for LIHTC properties in Laurens County, but did not know about anything about surrounding Newberry County.

The local police department patrols the complex four to five times daily.

1Q19 The property is not currently achieving the maximum allowable LIHTC rents. However, the manager indicated that higher rents are achievable in the market, and the property has been gradually increasing rents closer to the maximum allowable rents. The manager indicated that there is strong demand for affordable housing in the market.

The local police department patrols the complex four to five times daily.

1020 No additional comments.

3020 The contact reported there has been no negative impact on the property due to COVID-19 and the ensuing economic downturn. No major issues with job losses amongst tenancy or rent collection were reported but there are a small number for both during the past four months of the pandemic.

Trend: (Comments
4009	The contact reported that management has had difficulty leasing the one vacant unit, which has been vacant since August 2009. The leasing agent stated that there is greater demand for market rate units due to Presbyterian College and the contact anticipates that demand for market rate units will increase as the college is building a new pharmacy school. Professors occupy the property's four market rate units.

1Q14 The contact could not provide the property's annual turnover rate. The contact noted one of the units has been sitting on the market since January 3rd. He indicated that many families in the area choose to live in single family homes, accounting for the high vacancy rate in the LIHTC units.

1020 The contact could not provide the property's annual turnover rate. The contact reported that the current vacancy rate is elevated due to four leases ending the same month. Generally, occupancy is around 95 percent.

3Q20 The contact provided limited data and would not comment on the effects of the COVID-19 pandemic on the property.

Trend: Comments

4Q06 Meadowbrook Apartments is a subsidized property offering a total of 48 one-, two- and three-bedroom units. The rents presented are basic rents quoted by the manager. The manager also provided note rents which are \$486 for the one-bedroom units, \$537 for the two-bedroom units, and \$609 for the three-bedroom units. The manager noted approximately 24 households pay the basic rents, 12 households utilize Section 8 vouchers, and the remaining 12 households pay 30 percent of income towards the rent. There are currently six vacancies and the property does not maintain a waiting list at this time.

2008 Contact stated that the property just completed renovation to the property. There was a seven percent increase on the one and two-bedroom units, and a six percent increase on the three-bedroom units.

1020 None of the units receive Rental Assistance, but 11 units are occupied by Housing Choice Voucher holders. The contact reported that all four of the vacant leases are pre-leased from the waiting list.

3020 None of the units receive Rental Assistance, but 11 units are occupied by Housing Choice Voucher holders. The contact reported that both of the vacant units are pre-leased from the waiting list. There have been no major issues or negative impact on the property relating to COVID-19.

Trend: Comments

4Q12 Management reported that they currently have zero vacancies but do not currently have a waiting list. Management estimated to have ten units vacate annually for their annual turnover rate.

The property currently does not accept housing choice vouchers. The property has perimeter fencing around the community and has local police patrol twice daily

1Q18 The contact reported that the property is currently undergoing major renovations. These renovations include updating all of the appliances in the rooms as well as refurbishing the exterior and installing new sheet rock. The contact indicated that the construction is the reason for the elevated vacancy rate, as this development is typically at or near full occupancy. Note that the rents listed in this profile are all for non-upgraded units.

The property currently does not accept Housing Choice Vouchers. The property has perimeter fencing around the community and has local police patrol twice daily.

Trend: Comments

4Q06 Magnolia Manor is the first larger scale market rate apartment property to be built in Newberry in over 25 years. It consists of 14, two-bedroom townhouse units. The first units were completed in September 2006 and the entire project is scheduled for completion in October 2006. To date, 13 of the 14 units have been leased, which indicates strong demand in this market.

4Q12 Management indicated that they currently have one vacancy at the property. We asked management about their initial lease-up absorption, and they commented that it took longer than normal and provided the following explanation as to why their absorption figures would not accurately reflect absorption. According to management, initially the property was slated to rent seven of the units, and sell the other seven units. The property opened and leasing began in October of 2011. Management stated the initial seven units rented quickly, but the other units for sale sat for a while. Approximately 10 months after October, management decided to lease the remaining seven units, instead of letting them sit and not gain any revenue off of them.

Management commented that the Newberry area definitely needs additional LIHTC housing. The property currently has three residents utilizing housing choice vouchers.

Management estimated approximately one move out annually and stated the majority of their tenancy has been their since they opened as they offer some of the nicer housing in town.

Management stated all units have washer and dryers hook ups, and 11 of the total 14 have washer and dryer included with rent.

- 1Q18 The contact indicated the property typically maintains a waiting list but no list is maintained at this time.
- 3020 The contact stated the property typically stays fully occupied. No major issues with COVID-19 reported as far as rent collection and job losses.

COMPARABLE PROPERTY ANALYSIS

Following are relevant characteristics of comparable properties surveyed:

Location

The following table illustrates the Subject and comparable property household incomes, median rent, and median home values.

LOCATION COMPARISON								
No. Property Name		Zip Code	Median	Median	Median	Rent		
NO.	Froperty Name	Zip Coue	Income	Rent	Home Value	Differential		
S	Newberry Arms Apartments	29108	\$36,614	\$734	\$83,200	-		
1	Clinton Green Apartments*	29325	\$36,466	\$754	\$87,100	2.7%		
2	Fountain Hills*	29644	\$57,111	\$786	\$135,600	6.6%		
3	Jacob Press Apartments*	29325	\$36,466	\$754	\$87,100	2.7%		
4	Meadowbrook Apartments*	29360	\$37,431	\$658	\$92,800	-11.6%		
5	Newberry Green	29108	\$36,614	\$734	\$83,200	0.0%

7	Highland Park Apartments	29325	\$36,466	\$754	\$87,100	2.7%		
8	Indian Land Apartments	29108	\$36,614	\$734	\$83,200	0.0%		
9	Magnolia Manor	29108	\$36,614	\$734	\$83,200	0.0%		
10	Oakland Mill	29108	\$36,614	\$734	\$83,200	0.0%		
11	Winter Ridge Apartments*	29649	\$46,331	\$713	\$148,200	-2.9%		

*Located outside of the PMA

The Subject is located in a mixed-use neighborhood in Newberry. Five of the 11 comparables are located in Newberry, within 2.5 miles of the Subject. Indian Land Apartments, Magnolia Manor, and Oakland Mill are all located in Newberry, in average locations, similar to the Subject. Highland Park Apartments is located in Clinton in an average location, similar to the Subject. Winter Ridge Apartments is located in Greenwood, SC in what is considered a slightly superior location. Therefore we applied a negative \$25 adjustment to this comparable in the rent grids. Winter Ridge Apartments is located in an inferior market and we applied a positive \$25 adjustment. The remaining comparables are located in average locations, similar to the Subject.

Unit Size

The following table summarizes unit sizes in the market area, and provides a comparison of the Subject's unit size and the surveyed average unit sizes in the market.

UNIT SIZE COMPARISON								
Bedroom Type	1BR	2BR	3BR	4BR				
Subject	638	919	1,098	1,227				
Average	781	1,097	1,320	0				
Min	665	790	960	0				
Max	948	2,232	2,427	0				
Advantage/Disadvantage	-18%	-16%	-17%	-17%				

The Subject's unit sizes are smaller than the average among the comparables, but within the comparable range, except for the Subject's one-bedroom units, which are below the range of the comparables. It should be noted that none of the comparables offer four-bedroom units. The Subject's unit sizes should continue to be well accepted in the market as an affordable property. However, we considered the Subject's proposed unit sizes in our determination of achievable rents.

Vacancy

The following table illustrates the market vacancy at the comparable properties.

OVERALL VACANCY							
Property Name	Rent Structure	Tenancy	Total Units	Vacant Units	Vacancy Rate		
Clinton Green Apartments*	LIHTC	Family	40	0	0.0%		
Fountain Hills*	LIHTC	Family	48	0	0.0%		
Jacob Press Apartments*	LIHTC/ Market	Family	20	2	10.0%		
Meadowbrook Apartments*	LIHTC	Family	48	2	4.2%		
Newberry Green	LIHTC	Family	44	2	4.5%		
Palmetto Pointe	LIHTC	Family	48	0	0.0%		
Highland Park Apartments*	Market	Family	64	3	4.7%		
Indian Land Apartments	Market	Family	52	3	5.8%		
Magnolia Manor	Market	Family	14	1	7.1%		
Oakland Mill	Market	Family	64	5	7.8%		
Winter Ridge Apartments*	Market	Family	248	3	1.2%		
Total LIHTC			248	6	2.4%		
Total Market Rate			442	15	3.4%		
Overall Total			690	21	3.0%		

*Located outside of the PMA

The comparables reported vacancy rates ranging from zero to 10.0 percent. It should be noted that Jacob Press Apartments is a mixed income development and has the highest vacancy rate among the comparables. However, this development offers only two vacant units. Overall vacancy in the local market is operating at an average 3.0 percent vacancy rate. Managers at three of the six LIHTC properties reported being fully occupied. The average vacancy rate reported by the affordable comparables was 2.4 percent, below the 3.4 percent average reported by the market rate properties. It should be noted that the Jacob Press Apartments small number of units affects the vacancy rate.

According to the rent roll dated June 30, 2020, the Subject is currently fully occupied and maintains an extensive waiting list. The Subject appears to be in average overall condition with average curb appeal. Post-renovation, the Subject will exhibit good overall condition. Therefore, we believe that the Subject will operate with a total vacancy rate of four percent or less.

It should be noted that a majority of the comparables reported no major issues or negative impact during the COVID-19 pandemic other than units taking longer to lease due to social distancing.

LIHTC Vacancy – All LIHTC Properties in PMA

There are 92 total LIHTC units in the PMA that we included in this comparable analysis, of which, there are only two vacant units. Additionally, both of the LIHTC properties in the PMA that we included in this comparable analysis maintain waiting lists. This indicates strong demand for affordable rental housing in the PMA.

REASONABILITY OF RENTS

This report is written to SCSHFDA guidelines. Therefore, the conclusions contained herein may not be replicated by a more stringent analysis. We recommend that the sponsor understand the guidelines of all those underwriting the Subject development to ensure the proposed rents are acceptable to all.

Rents provided by property managers at some properties may include all utilities while others may require tenants to pay all utilities. To make a fair comparison of the Subject rent levels to comparable properties, rents at comparable properties are typically adjusted to be consistent with the Subject. Adjustments are made using the SC Regional Housing Authority No. 1 utility allowance, effective January 1, 2020, the most recent available. The rent analysis is based on net rents at the Subject as well as surveyed properties.

The following table summarizes the Subject's proposed 60 percent AMI net rents compared to the maximum allowable 60 percent AMI rents in the MSA where comparables are located and the net 60 percent AMI rents at the comparables.

Property Name	County	Tenancy	1BR	2BR	3BR	4BR	Rents at Max?
Newberry Arms Apartments	Newberry	Family	\$595	\$696	\$792	\$878	YES
LIHTC Maximum Rent (Net)	Newberry		\$595	\$696	\$792	\$878	
LIHTC Maximum Rent (Net) - Held Harmless	Newberry		\$523	\$609	\$690	\$766	
Clinton Green Apartments	Laurens	Family	-	\$599	\$685	-	NO
Fountain Hills	Laurens	Family	-	\$749	\$858	-	YES
Jacob Press Apartments	Laurens	Family	\$492	\$574	\$627	-	NO
Meadowbrook Apartments	Laurens	Family	\$552	\$631	\$729	-	NO
Palmetto Pointe	Newberry	Family	\$461	\$571	\$720	-	NO
Average			\$502	\$625	\$724	-	
Achievable LIHTC Rent			\$595	\$696	\$792	\$878	

The Subject's proposed 60 percent AMI rents are set at the 2020 maximum allowable levels. Fountain Hills reported achieving the 2020 LIHTC maximum allowable rents at 60 percent AMI. Newberry Green reported achieving the 2019 LIHTC maximum allowable rents at 50 percent AMI, but has yet to increase to the 2020 maximum allowable rents due to the uncertainty of COVID-19. Additionally, Meadowbrook Apartments and Palmetto Pointe reported achieving rents just below the 2020 LIHTC maximum allowable level. The proposed Subject is considered most similar to Meadowbrook Apartments and Palmetto Pointe, both of which offer a similar unit mix and similar unit sizes.

Meadowbrook Apartments is a 48-unit, development located 30.2 miles northwest of the Subject site, in a neighborhood considered superior relative to the Subject's location. This property was constructed in 1979 and renovated in 2009, and currently exhibits similar condition relative to the proposed Subject, which was built in 1980 and is proposed for renovations. The manager at Meadowbrook Apartments reported a low vacancy rate of 4.2 percent, indicating the current rents are well accepted in the market. The in-unit and property amenity packages offered by Meadowbrook Apartments are similar and slightly inferior relative to the Subject, respectively. In overall terms, we believe the Subject will be a similar product relative to Meadowbrook Apartments.

Palmetto Pointe is a 48-unit garden-style development located 2.5 miles west of the Subject site, in a neighborhood considered similar relative to the Subject's location. This property was constructed in 2007 and currently exhibits similar condition relative to the proposed Subject, which was built in 1980 and is proposed for renovations. The manager at Palmetto Pointe reported the property as fully occupied, indicating the current rents are well accepted in the market. The in-unit and property amenity packages offered by Palmetto Pointe are similar relative to the Subject. In overall terms, we believe the Subject will be a similar product relative to Meadowbrook Apartments.

It should be noted that none of the comparables offer four-bedroom units. However, given the significant rent advantage presented below, we believe maximum rents are achievable for the Subject's four-bedroom units.

Based on the rents being achieved at the most comparables LIHTC developments, the Subject's proposed newly renovated condition, and generally superior amenities, we believe max allowable 60 percent AMI rents are achievable, or \$595, \$696, \$792, and \$878 for its one, two, three, and four-bedroom units, respectively.

Achievable Market Rents

Based on the quality of the surveyed comparable properties and the anticipated quality of the proposed Subject, we conclude that the Subject's rental rates are below the achievable market rates for the Subject's area. We have prepared Section 8 rent adjustment grids in the Addenda to this report. The following table shows both adjusted market rent comparisons and achievable market rents.

	COMPAR	ABLE PROPERT	Y RENT SUM	MARY - AFTE		IENT	
Unit Type	Size	Subject Proposed Rent	Surveyed Min	Surveyed Max	Surveyed Average	Achievable Market Rent	Subject Rent Advantage
1BR / 1BA	638	\$595	\$636	\$838	\$719	\$775	23.2%
2BR / 1.5BA	919	\$696	\$700	\$1,035	\$858	\$860	19.1%
3BR/1.5BA	1098	\$792	\$745	\$1,240	\$1,038	\$1,120	29.3%
4BR / 2.5BA	1227	\$878	\$895	\$1,395	\$1,205	\$1,285	31.7%

The Subject's achievable LIHTC rents are well below the achievable market rents, and below to within the range of the market rate comparables. The Subject's achievable LIHTC rents represent a rent advantage of 19.1 to 31.7 percent over the achievable market rents.

In conclusion, we believe that the Subject's achievable market rents are \$775, \$860, \$1.120, and \$1.285 for its one, two, three, and four-bedroom units, respectively. Our concluded market rents result in a rent advantage of 19.1 to 31.7 percent for the Subject's achievable LIHTC rents.

Impact of Subject on Other Affordable Units in Market

The average vacancy rate reported by the affordable comparables was 2.4 percent, and excluding Jacob Press Apartments, 1.7 percent. Additionally, three of the six LIHTC comparables reported being fully occupied and five of the six maintain waiting lists. Since the Subject operates with a subsidy and will upon completion of renovations, we do not expect any impact on the existing low-income rental assisted housing in the market.

Availability of Affordable Housing Options

There is a limited supply of LIHTC units in the PMA. There are only six vacant LIHTC units among the six LIHTC comparables surveyed, and five of the LIHTC comparables maintain waiting lists. Therefore, the availability of LIHTC housing targeting low and moderate incomes is considered inadequate given the demographic growth of the PMA. The renovation of the Subject would improve the existing housing stock in the PMA for affordable housing.

SUMMARY EVALUATION OF THE PROPOSED PROJECT

Overall vacancy in the local market is performing well with a 3.0 percent vacancy rate among all 11 surveyed stabilized comparable projects. Additionally, there are only six vacancies among the 244 LIHTC units, and with the exception of Jacob Press Apartments, all of the LIHTC properties maintain waiting lists. This indicates strong demand for affordable rental housing in the PMA. Market rate comparables are also performing well, with an overall vacancy rate of 3.4 percent among all of the market-rate comparables.

When compared to the current 60 percent AMI rents at the LIHTC properties, the Subject's proposed 60 percent AMI rents appear reasonable at the maximum allowable levels, and they are 19.1 to 31.7 percent below what we have determined to be the achievable market rents. Overall, we believe that the Subject will be successful in the local market as proposed.

H. INTERVIEWS

INTERVIEWS

The following section details interviews with local market participants regarding the housing market.

Planning

We were unable to reach a contact with the city of Newberry Planning Department regarding planned, proposed, or under construction developments in the PMA. Therefore, we conducted online research and utilized a CoStar new construction report. According to our online research and the CoStar database, there are no new or planned developments in the construction pipeline within Newberry County.

Section 8/Public Housing

We spoke with Carrie Epting, Section 8 Coordinator, with the Newberry Housing Authority. According to Ms. Epting, the Newberry Housing Authority administers 235 Housing Choice Vouchers within Newberry County. Of the total 235 vouchers, 186 are currently in use. Prior to the recent opening of the waiting list in January 2020, the waiting list for Housing Choice Vouchers was closed since the summer of 2016. The list opening is conducted using a random lottery system. We were unable to get the payment standards from the Newberry Housing Authority; however, as the Subject operates as a fully subsidized development, Housing Choice Vouchers will not be necessary for the Subject's tenants.

Property Managers

The results from our interviews with property managers are included in the comments section of the property profile reports.

I. RECOMMENDATIONS

Recommendations

We believe there is ample demand for the Subject in the PMA and the market supports renovations of the Subject development as proposed. The overall capture rates for the Subject's units with and without subsidy are 6.1 and 14.4 percent, respectively, which are within acceptable demand thresholds. Individual capture rates by bedroom type range from 4.9 to 8.1 percent, with subsidy. Absent subsidy, the Subject's capture rates at the 60 percent AMI level will range from 19.1 to 31.7 percent. Property managers at area apartments in the PMA indicated that approximately ten percent of residents are from outside the PMA. Therefore, we conservatively estimate that approximately ten percent of the Subject's residents will originate from areas outside of the PMA. Since the demand analysis does not account for support from tenants moving from outside the PMA, it is somewhat conservative. In addition, the Subject is in a community (Newberry) that has few affordable housing alternatives. Between 2019 and market entry, the total number of households is expected to increase at a rate of 0.6 percent annually in the PMA. The Subject site is located within 1.5 miles of most community services and facilities that tenants would utilize on a consistent basis. Overall, we believe that the Subject will be successful in the local market as proposed.

J. SIGNED STATEMENT REQUIREMENTS

I affirm that I have made a physical inspection of the market and surrounding area and the information obtained in the field has been used to determine the need and demand for new rental LIHTC units. I understand that any misrepresentation of this statement may result in denial of further participation in the South Carolina State Housing Finance and Development Authority's programs. I also affirm that I have no financial interest in the project or current business relationship with the ownership entity and my compensation is not contingent on this project being funded. This report was written according to the SCSHFDA's market study requirements. The information included is accurate and can be relied upon by SCSHFDA to present a true assessment of the low-income housing rental market.

Respectfully submitted, Novogradac Consulting LLP

VI. Real Estate Assignments

A representative sample of Due Diligence, Consulting or Valuation Engagements includes:

- On a national basis, conduct market studies and appraisals for proposed Low-Income Housing Tax Credit properties. Analysis includes preliminary property screenings, market analysis, comparable rent surveys, demand analysis based on the number of income qualified renters in each market, supply analysis and operating expense analysis to determine appropriate cost estimates.
- On a national basis, conduct market studies and appraisals of proposed new construction and existing properties under the HUD Multifamily Accelerated Processing program. This includes projects under the 221(d)3, 221(d)4, 223(f), and 232 programs.
- Completed numerous FannieMae and FreddieMac appraisals of affordable and market rate multifamily properties for DUS Lenders.
- Managed and completed numerous Section 8 Rent Comparability Studies in accordance with HUD's Section 9 Renewal Policy and Chapter 9 for various property owners and local housing authorities.
- Developed a Flat Rent Model for the Trenton Housing Authority. Along with teaming partner, Quadel Consulting Corporation, completed a public housing rent comparability study to determine whether the flat rent structure for public housing units is reasonable in comparison to similar, market-rate units. THA also requested a flat rent schedule and system for updating its flat rents. According to 24 CFR 960.253, public housing authorities (PHAs) are required to establish flat rents, in order to provide residents a choice between paying a "flat" rent, or an "income-based" rent. The flat rent is based on the "market rent", defined as the rent charged for a comparable unit in the private,

unassisted market at which a PHA could lease the public housing unit after preparation for occupancy. Based upon the data collected, the consultant will develop an appropriate flat rent schedule, complete with supporting documentation outlining the methodology for determining and applying the rents. We developed a system that THA can implement to update the flat rent schedule on an annual basis.

- As part of an Air Force Privatization Support Contractor team (PSC) to assist the Air Force in its privatization efforts. Participation has included developing and analyzing housing privatization concepts, preparing the Request for Proposal (RFP), soliciting industry interest and responses to housing privatization RFP, Evaluating RFP responses, and recommending the private sector entity to the Air Force whose proposal brings best value to the Air Force. Mr. Weinberg has participated on numerous initiatives and was the project manager for Shaw AFB and Lackland AFB Phase II.
- Conducted housing market analyses for the U.S. Army in preparation for the privatization of military housing. This is a teaming effort with Parsons Corporation. These analyses were done for the purpose of determining whether housing deficits or surpluses exist at specific installations. Assignment included local market analysis, consultation with installation housing personnel and local government agencies, rent surveys, housing data collection, and analysis, and the preparation of final reports.
- Developed a model for the Highland Company and the Department of the Navy to test feasibility of developing bachelor quarters using public-private partnerships. The model was developed to test various levels of government and private sector participation and contribution. The model was used in conjunction with the market analysis of two test sites to determine the versatility of the proposed development model. The analysis included an analysis of development costs associated with both MILCON and private sector standards as well as the potential market appeal of the MILSPECS to potential private sector occupants.

REAL ESTATE ASSIGNMENTS

A representative sample of work on various types of projects:

- Managed and completed hundreds of market studies and appraisals for proposed new construction and existing Low Income Housing Tax Credit, USDA Rural Development, Section 8 and market rate multifamily and age-restricted developments. This included property screenings, market and demographic analysis, comparable rent surveys, supply and demand analysis, determination of market rents, expense comparability analysis, and other general market analysis. Property types include proposed multifamily, acquisition with rehabilitation, historic rehabilitation, adaptive reuse, and single-family development.
- Complete agency and HUD appraisals using the cost approach, income capitalization approach, and sales comparison approach for Low Income Housing Tax Credit, USDA Rural Development, and Section 8 properties. Additional assignments also include

partnership valuations and commercial land valuation.

- Prepared HUD Market-to-Market rent comparability studies for Section 8 multifamily developments.
- Perform valuations of General and/or Limited Partnership Interest in a real estate transaction, as well as LIHTC Year 15 valuation analysis.
- Prepare Fair Market Value analyses for solar panel installations in connection with financing and structuring analyses performed for various clients. The reports are used by clients to evaluate with their advisors certain tax consequences applicable to ownership. Additionally, these reports can be used in connection with application for the Federal grant identified as Section 1603 American Recovery & Reinvestment Act of 2009 and the ITC funding process.
- Perform market studies and appraisals for proposed and existing multifamily properties under the HUD MAP program. These reports meet the requirements outlined in Chapter 7 of the HUD MAP Guide for the 221(d)4, 223(f), and the LIHTC Pilot Program.
- Consult with lenders and developers and complete valuation assignments for developments converting under the RAD program.
- Prepare valuations for unique redevelopment sites with mixed uses including a variety of commercial, multifamily, and recreational uses. Further, performing analysis and valuations for assisted living facilities for potential acquisition, hold or trade purposes.
