Section 1: Introduction

Market Analyst Professionals, LLC (MAP) has prepared the following report to determine the market feasibility of an affordable housing project located in Johns Island, South Carolina. The subject proposal is described in detail in Section 3. The study assumes Low Income Housing Tax Credits will be utilized in financing the subject property. The market study was prepared in accordance with South Carolina State Housing Finance and Development Authority (SCSHFDA) guidelines and industry accepted practices. Information contained within the report is assumed to be trustworthy and reliable. Recommendations and conclusions in the report are based on professional opinion. MAP does not guarantee the data nor assume any liability for any errors in fact, analysis or judgment resulting from the use of the report.

Section 2: Executive Summary

- Based on the analysis within this report, the proposal will be successful as is; no changes are deemed necessary from a market standpoint. The proposal is the construction of new senior units operating with a project based subsidy covering all units. The site is located in an attractive location in close proximity to Charleston, near existing residential, amenities and services. Capture rates for the proposal indicate sufficient market depth to absorb the proposal. Local economic conditions have shown job gains the last 10 full years. However, at the time of completion of this report, the United States and global economy are experiencing a tumultuous period marked by increasing unemployment claims as a result of shelter in place orders in various states. The impact of this will likely be significant in the near term despite government efforts to mitigate the impact through stimulus and other preventative measures. Analysis throughout this report is based on economic conditions returning to growth and greater stability at the time of market entry for the proposal—however residual impacts may be felt in markets with rental housing in high supply relative to demand and in particular for projects positioned aggressively. Since the proposal operates with project based subsidy covering all units, it is largely insulated from economic instability. Households in the PMA have expanded in the past decade in the PMA and are forecasted to increase through 2025. As a result of the analysis within the report, the development of the proposal to more adequately serve the PMA's population is recommended.
- ➤ Between 2000 and 2010 population increased in all areas. The rate of change in the PMA over this period was slower relative to the state as a whole which increased at a moderate annual rate and also slower relative to the county which increased over this period. Between 2020 and 2025 ESRI forecasts that population will increase in all areas. Between 2020 and 2025 ESRI forecasts that households will increase in all areas. Between 2020 and 2025 ESRI forecasts that senior population will increase in all areas.
- The site is located in Johns Island, southwest of Charleston. The site is a wooded lot on the southeast side of Maybank Highway in a residential area. To the southeast of the site is an office complex. The site is surrounded by woods to the northeast and southwest. Multi-family residential is located northwest of the site across Maybank Hwy. To the southwest is a single-family residence that abuts St. John's Parish Church. To the southwest is Sea Island Apartments

- a LIHTC project detailed in a latter section of this report. Farther removed from the site development drops off to the west and south, with a commercial concentration, including the nearest grocery, to the northeast at Main Road and Maybank Highway. No negative attributes of the site were apparent; existing residential near the site indicates the site's viability for residential use.
- based subsidy covering all units, with tenants paying 30 percent of income to rent. Within the survey only Ashley Arms offers subsidized units, with 76 of 100 units operating with a project based subsidy—this project reported 100 percent occupancy and a 200 person wait-list offering strong evidence of demand for projects operating with a project based subsidy. Since the subject will operate with a project based subsidy, LIHTC rents are only applicable in the unlikely event the subject was to lose its project based subsidy. The subject is analyzed as it would operate both with and without the project based subsidy in place. Under a LIHTC scenario the most comparable projects to the proposal include units operating under income restriction guidelines within or near the market area and serving a senior tenancy. MAP has selected the most comparable projects based on proximity, unit type and appeal/condition—these projects comprise the competitive set. The overall occupancy rate for the most comparable projects is 100 percent with all projects reporting wait-lists for occupancy indicating very strong demand within the area.
- In terms of unit appeal, it is assumed the subject will be comparable or superior to existing competitive set projects with a competitive amenity package, unit size, quality of construction and design. The proposal's site is assessed as comparable to competitive set projects. No premium was evident for senior projects, so no adjustment for senior only tenancy was made. Based on the above analysis, rents for the proposal would be above programmatic limits under a LIHTC scenario but given 50 percent AMI targeting maximum gross rents would be easily achievable within the market under a LIHTC scenario. High occupancy among both surveyed and comparable projects offer support for the proposal.
- ➤ The subject will operate with a project based subsidy open to tenants ages 62 years and older.

 Demand calculations for the subject operating both with and without the project based subsidy are

presented. Since rents are over programmatic limits, demand calculations under a LIHTC scenario are based on maximum allowable gross. A capture rate of 10.0 percent for the project operating with the project based subsidy was determined based on the demand calculations outlined in the following pages (including renter household growth, substandard units and overburdened rental housing potential). The capture rate is within the threshold rate of 30 percent. Under a LIHTC scenario (with rents at maximum gross) the capture rate for the project is also within threshold rates. The capture rate for the proposal should be considered to provide further evidence of potential demand for the subject.

- ➤ Oakside Apartments indicated absorption of 19 units per month for 38 units. However, this is a general occupancy LIHTC project relative to the proposal's senior targeting and with all units under subsidy. MAP has utilized movership ratios from the American Housing Survey as well as estimated "capture" rates among these income eligible households to estimate absorption. With the project based subsidy in place the subject should be absorbed within 6 months of market entry. Under a LIHTC scenario the subject would not be fully absorbed within 12 months of market entry absent a reduction of rents.
- > Strong demand is evident among affordable housing within the area. The market study supports that the subject will fill a housing void for affordable housing within the market. High demand for comparable housing as well as demand statistics offer support for the proposal.

Section 3: Project Description

Name: Esau Jenkins Village

Address: 3627 Maybank Highway

Johns Island, SC 29455

Target Population: Special Needs/Elderly

Total Units: 72
Subsidized Units: 72
LIHTC Units: 72
Unrestricted Units: 0

Utilities Included in Rent

Heat: No
Electric: No
Water: Yes
Sewer: Yes
Trash: Yes
Heat Type: Gas

	Assisted Living		Organized Activities		Housekeeping
	Nursing		Library		Healthcare Services
			24 Hour On Site Management		Transportation

Other Information:

The subject will be open, but not exclusive, to a special needs population of disabled persons. MAP has analyzed the project as it would target senior households within the market with demand not based on special needs exclusivity.

Section 4: Site Profile

Date of Inspection: 6/20/2020 By Chris Vance

Acreage: 9.4

Total Residential Buildings: 3

Density: 3.1

(Acres/Building)

Topography: Wooded lot

Adjacent Land Uses: Impact:

North: Multi-family Residential Favorable
East: Assisted living Favorable
South: Church Favorable

West: Multi-family Residential Favorable

City and Neighborhood Characteristics

The site is located in Johns Island, southwest of Charleston. The site is a wooded lot on the southeast side of Maybank Highway in a residential area. To the southeast of the site is an office complex. The site is surrounded by woods to the northeast and southwest. Multi-family residential is located northwest of the site across Maybank Hwy. To the southwest is a single- family residence that abuts St. John's Parish Church. To the southwest is Sea Island Apartments a LIHTC project detailed in a latter section of this report. Farther removed from the site development drops off to the west and south, with a commercial concentration, including the nearest grocery, to the northeast at Main Road and Maybank Highway. No negative attributes of the site were apparent; existing residential near the site indicates the site's viability for residential use.

Visibility and Accessibility of the Site

Signage on Maybank Highway at the subject would provide the site with good visibility but limited exposure as this is not a major thoroughfare for the area. Marketing efforts will be critical to draw potential tenants to the site. The site will be easily accessible from Maybank Highway.

Marketability of Proposal

The site is located in an area attractive to its targeted tenants. The project's proximity to residential housing demonstrates the site's viability for residential use. It is located a short distance from a small commercial concentration and offers easy access to roadways that provide linkages to higher density development in Charleston and James Island to the north and east.

Neighborhood Amenities/Retail/Services

Several amenities and services are located in close proximity to the site, concentrated within James Island and Charleston to north and east. Just removed from the site to the northeast is a commercial concentration that consists of a Bi-Lo, Family Dollar, CVS, McDonald's, banks and other amenities. A middle school is located about 1 mile to the northeast of the site. A Walmart is located approximately 10 miles from the subject to the east. A major commercial concentration is located approximately 12 miles north of the site near the intersection of Sam Rittenberg Boulevard and Orleans Road. Amenities at this location include Target, Citadel Mall, Best Buy, Belk, a movie theater, several restaurants and smaller retailers.

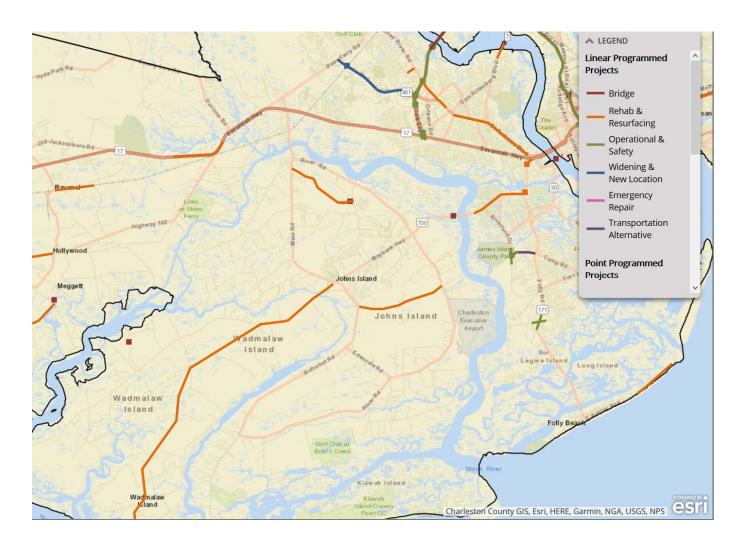

Health Care

The nearest medical facility is Barrier Islands Free Medical Clinic which is located approximately 1.5 miles northeast of the site. The nearest general hospital, Medical University of South Carolina, is approximately 10 miles to the northeast. According to their website: As the clinical health system of the Medical University of South Carolina, MUSC Health is dedicated to delivering the highest quality patient care available, while training generations of competent, compassionate health care providers to serve the people of South Carolina and beyond. Comprising some 1,600 beds, more than 100 outreach sites, the MUSC College of Medicine, the physicians' practice plan, and nearly 275 telehealth locations, MUSC Health owns and operates eight hospitals situated in Charleston, Chester, Florence, Lancaster and Marion counties. In 2019, for the fifth consecutive year, U.S. News & World Report named MUSC Health the

No. 1 hospital in South Carolina.

Road or Infrastructure Improvements

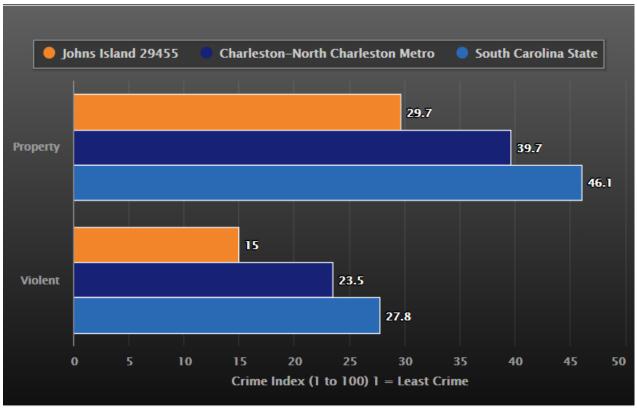

Planned or underway projects within Charleston County near the site according to the South Carolina Department of Transportation include the below, none of which are deemed to negatively impact the site.

Crime

Both violent and property crime risk is below state and national levels for the subject's zip code (the national average is 22.7 and 35.4 respectively) consistent with the less urban nature of the area and lower population density. Crime is rated from 1 to 100. Violent crime is composed of four offenses: murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. Property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims. MAP has considered local crime in its assessment of site appeal incorporated into rent analysis in a latter section of this report.

Section 5: Market Area Delineation

The following demographic information, comparables, and demand analysis are based on the Primary Market Area (PMA) as defined below and outlined in the following maps. The proposal is located in Johns Island, South Carolina, in Census Tract 21.01 of Charleston County. For comparison purposes, data pertaining to the city of Johns Island, Charleston County and the state of South Carolina where appropriate have also been included throughout the analysis.

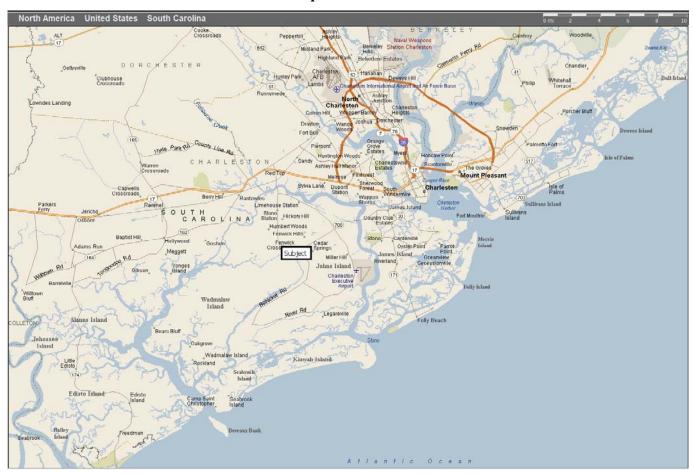

Census Tracts were used to define the PMA and form the boundaries of the PMA. The farthest boundary of the PMA is approximately 22.0 miles from the site to the northwest. From the site, the PMA extends approximately 11.7 miles to the north, 20.6 miles to the west, 12.3 miles to the east and 6.6 miles to the south. Census Tracts defining the market area include:

Census Tract 19.01, Charleston County Census Tract 20.02, Charleston County Census Tract 20.03, Charleston County Census Tract 20.04, Charleston County Census Tract 20.05, Charleston County Census Tract 20.05, Charleston County Census Tract 20.06, Charleston County Census Tract 20.07, Charleston County Census Tract 21.01, Charleston County Census Tract 21.03, Charleston County Census Tract 21.04, Charleston County Census Tract 21.05, Charleston County Census Tract 22, Charleston County Census Tract 22, Charleston County Census Tract 25.02, Charleston County

Census Tract 26.04, Charleston County Census Tract 26.05, Charleston County Census Tract 26.06, Charleston County Census Tract 26.11, Charleston County Census Tract 26.12, Charleston County Census Tract 26.13, Charleston County Census Tract 26.14, Charleston County Census Tract 27.01, Charleston County Census Tract 27.02, Charleston County Census Tract 28.01, Charleston County Census Tract 28.02, Charleston County Census Tract 29, Charleston County Census Tract 30, Charleston County Census Tract 30, Charleston County Census Tract 56, Charleston County

Major factors in defining the PMA were proximity to the site, natural boundaries and the low density of rental housing and senior rental housing in particular. The proposal is a senior project, located southwest of Charleston. Increasing competition with Charleston, as well as the Ashley River which limits linkages, serve to constrain the expansion of the PMA to the east and northeast. Similarly water boundaries constrain the PMA to the southwest. To the west declining proximity was the primary factor in limiting the extension of the PMA. The market study demonstrates sufficient market depth for prospective tenants in the PMA at the proposed rents and unit configuration. Race statistics for the Census Tract of the site are located in an addendum.

Map: Local Area

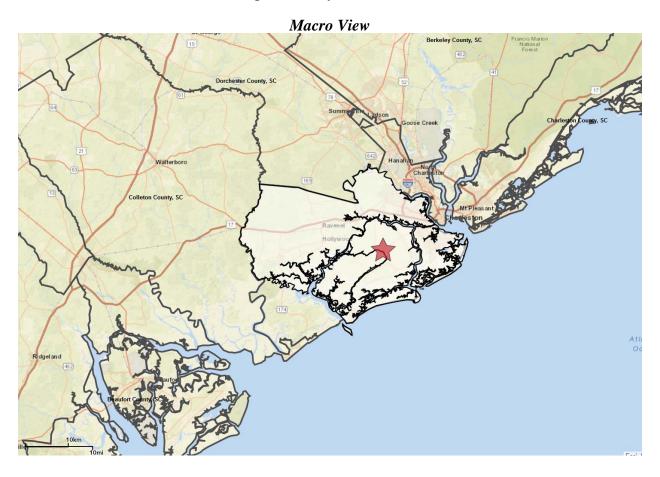

Map: Primary Market Area

Micro View

Map: Primary Market Area

Section 6: Economic Analysis

Economic Overview

The proposal will offer units targeted at low income households within the Johns Island area. Economic analysis is provided for Charleston and Charleston County, which is deemed the most important for the area's economic viability. In addition, information for the State of South Carolina and United States are illustrated to put these trends into greater context.

Local economics are largely driven by the national economy, particularly for larger, more urban areas with greater economic diversification. This is visually evident in the unemployment rate comparison presented in the following pages (i.e., movements in the unemployment rate for the United States coincide with state and local movements). While generally moving in tandem with national levels, the unemployment rate in South Carolina had been higher in comparison to national levels prior to 2011 with a dramatic surge evident in 2008--this can be attributed to a continual rise in the labor force combined with a decline in employment. However, in more recent years the unemployment rate within the state has declined below the national average.

At the time of completion of this report, the United States and global economy are experiencing a tumultuous period marked by increasing unemployment claims as a result of shelter in place orders in various states. The impact of this will likely be significant in the near term despite government efforts to mitigate the impact through stimulus and other preventative measures. Analysis throughout this report is based on economic conditions returning to growth and greater stability at the time of market entry for the proposal. The effects of a deceleration or stagnation in the economy generally serve to increase demand for affordable housing among those experiencing wage cuts while eliminating from consideration those who become unemployed. Since the subject will operate with a project based subsidy covering all units, it is largely insulated from local economics.

Economic Characteristics and Trends

Johns Island is located within Charleston County, with the bulk of employment concentrations within the county located within and near Charleston to the northeast. Within the PMA, approximately 21 percent of workers find employment within a less than 15 minute travel time, while an additional 44 percent of workers find employment within a 30 minute radius, contributing to a longer commute time in the PMA relative to the county.

Employee Commute Times

	City of Johns Island	PMA	County of Charleston	State of SC
2010 Total Workers via Census	68,838	71,648	188,784	1,994,198

Source: Census of Population and Housing, U.S. Census Bureau; ESRI

Industry employment concentrations in the city, county and state are illustrated below with national trends illustrated to put state and local trends into greater context. Locally within the city and county employment is more heavily concentrated in management, business, science and the arts and service occupations relative to the state as is typical with a more urban area. Similarly service sector employment is higher in the city and county relative to the state as a whole.

Industry Employment Concentrations

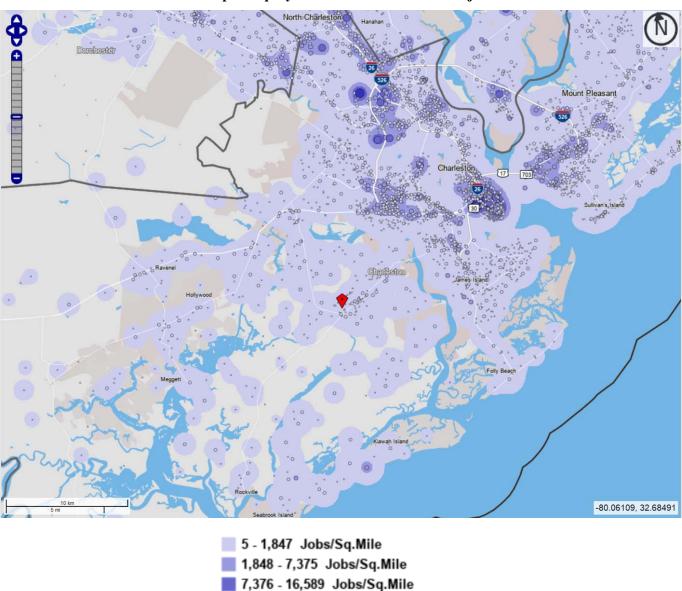

Mngmt, bus, sci, and arts Service occupations Sales and office occupations Nat res, construction, and maintenance Prod, transp, and material moving Manufacturing Mngmt, bus, sci, and arts Service occupations Sales and office occupations Nat res, construction, and maintenance Prod, transp, and material moving Wholesale trade Mngmt, bus, sci, and arts Service occupations Sales and office occupations Nat res, construction, and maintenance Prod, transp, and material moving Retail trade Mngmt, bus, sci, and arts Service occupations Nat res, construction, and maintenance Prod, transp, and material moving Retail trade Mngmt, bus, sci, and arts Service occupations Nat res, construction, and maintenance Prod, transp, and material moving Transp and warehousing, and util Mngmt, bus, sci, and arts Service occupations Sales and office occupations Nat res, construction, and maintenance Prod, transp, and material moving Information Mngmt, bus, sci, and arts Service occupations Sales and office occupations Nat res, construction, and maintenance Prod, transp, and material moving Fin and ins, and restate and rent/lease Mngmt, bus, sci, and arts Service occupations Sales and office occupations Nat res, construction, and maintenance Prod, transp, and material moving Prof, sci, and and sci, and arts Service occupations Sales and office occupations Nat res, construction, and maintenance Prod, transp, and material moving Prof, sci, and and and and waste mngt Mngmt, bus, sci, and arts Service occupations Nat res, construction, and maintenance Prod, transp, and material moving Pof, sci, and and sci, and arts Service occupations Nat res, construction, and maintenance Prod, transp, and material moving Ed services, and hith care and soc assist Mngmt, bus, sci, and arts Service occupations Nat res, construction, and maintenance Prod, transp, and material moving	318 43% 12% 7% 34% 44% 2,853 32% 0% 7% 57% 33% 48% 1% 10% 60% 60% 32% 0% 60% 11% 5,834 11% 5,834 11% 5,834 11% 3,36 78% 2,946 17% 3,36 78% 2,946 17% 3,36 3,36 2,55%	790 25% 10% 4% 51% 10% 11,550 21% 6% 68% 6% 68% 6% 13,155 36% 2% 41% 4,611 18% 60% 2% 18% 19,784 11% 4% 75% 3% 8,530 16% 2% 2%	20,931 30% 7% 6% 47% 11% 132,429 16% 6% 73% 4% 271,686 23% 2% 12% 8% 55% 53,918 16% 53% 59% 4% 10% 92,163 15% 39%	2,669,57 34% 4% 6% 48% 9,642,45 16% 72% 5% 15,281,30 28% 49% 4,158,68 18% 54% 54% 64% 616,336,91 11% 4% 70% 4% 11% 7,171,43 14% 3%

Section 7: Demographic Trends and Characteristics

Demographic Overview

Between 2000 and 2010 population increased in all areas. The rate of change in the PMA over this period was slower relative to the state as a whole which increased at a moderate annual rate and also slower relative to the county which increased over this period Between 2020 and 2025 ESRI forecasts that population will increase in all areas. Between 2020 and 2025 ESRI forecasts that households will increase in all areas. Between 2020 and 2025 ESRI forecasts that senior population will increase in all areas.

Population Characteristics and Trends

Population in the PMA represents 35.3 percent of the total population of the county. Between 2000 and 2010 population increased in all areas. Population in the PMA increased at an annual rate of 1.2 percent, representing a moderate annual rate in MAP's estimation, while increasing in the county over this period at a rate of 1.2 percent, also considered a moderate rate. The highest rate of growth among all submarkets was in the city at 1.4 percent relative to an overall increase in the state of 1.4 percent annually. The overall total change over this period was: 15,664, 13,380, 39,915 and 613,352 in the city, PMA, county and state respectively. Between 2010 and 2020 ESRI estimates that population increased in all areas. Over this period population in the PMA increased at an annual rate of 1.7 percent while increasing in the county at a rate of 1.8 percent. The rate of change in the PMA over this period was faster relative to the state as a whole which increased at a moderate annual rate and slower relative to the county which increased over this period. Between 2020 and 2025 ESRI forecasts that population will increase in all areas. Population in the PMA will increase at an annual rate of 1.6 percent, representing a moderate annual rate in MAP's estimation, while increasing in the county over this period at a rate of 1.7 percent, also considered a moderate rate. The highest rate of forecasted growth among all submarkets is in the city at 2.1 percent relative to an overall increase in the state of 1.2 percent annually.

All three submarkets share similar age distribution characteristics with the majority of the population concentrated in the 44 and under age cohorts. The aging of the Baby Boom generation has and will continue to shift the national age distribution toward the 45 and over population segments. This national trend is evident within all markets here as well with the majority of growth between 2010 and 2025 concentrated in the 25 and over age segments with particularly strong growth on a percentage basis in the senior segment of the population.

Senior Population Trends

The subject will target seniors (ages 62 years and older) operating with the project based subsidy in place. No detailed information for persons ages 62 years and older is available so information for person ages 65 years and older is presented. Under a LIHTC scenario the subject will be open to seniors ages 55 years and older—data for this age segment is presented as well. In 2010 the highest concentration of seniors among all submarkets is in the PMA at 15.4 percent relative to the lowest rate among submarkets in the city at 12.2 percent and 13.7 percent in the state. Between 2010 and 2020 ESRI estimates that senior population increased in all areas. Over this period senior population in the PMA increased at an annual rate of 4.1 percent while increasing in the county at a rate of 4.5 percent. The highest rate of growth among all submarkets was in the city at 5.1 percent relative to an overall increase in the state of 4 percent annually. Between 2020 and 2025 ESRI forecasts that senior population will increase in all areas. Population in the PMA will increase at an annual rate of 3.8 percent, representing a robust annual rate in MAP's estimation, while increasing in the county over this period at a rate of 4.1 percent, also considered a robust rate. The highest rate of forecasted growth among all submarkets is in the city at 4.6 percent relative to an overall increase in the state of 3.7 percent annually. The overall total forecasted change over this period is: 14,069, 14,104, 37,408 and 451,697 in the city, PMA, county and state respectively.

Household Characteristics and Trends

Between 2010 and 2020 ESRI estimates that households increased in all areas. Over this period households in the PMA increased at an annual rate of 1.7 percent while increasing in the county at a rate of 1.8 percent. The rate of change in the PMA over this period was faster relative to the state as a whole which increased at a moderate annual rate and slower relative to the county which increased over this period. Between 2010 and 2025 ESRI forecasts that households will increase in all areas. Households in the PMA will increase at an annual rate of 1.6 percent, representing a moderate annual rate in MAP's estimation, while increasing in the county over this period at a rate of 1.7 percent, also considered a moderate rate. The highest rate of forecasted growth among all submarkets is in the city at 2.1 percent relative to an overall increase in the state of 1.2 percent annually.

Average household size can reflect economic conditions (with household size increasing during periods of recession) or indicative of the construction of larger units within the area. Average household is estimated to have remained constant or increased marginally within all areas between 2010 and 2020. ESRI projections indicate constant or increasing average household size within all areas through 2025.

Between 2000 and 2010 renter penetration rates increased in all areas. Increases over this period are consistent with the financial crisis of 2008 and lasting impacts on home ownership. Among all submarkets renter penetration is highest within the city at 47.9 percent relative to the lowest rate in the PMA at 36.1 percent and an overall rate of 30.7 percent in the state. Between 2010 and 2025 ESRI forecasts renter households will increase in the PMA consistent with a increase in the renter penetration rate over this period and relative to a increase in overall households.

Market Analyst Professionals, LLC

All three submarkets have similar renter persons per household distribution, with the highest concentration in one- to three-person households, but with skewing to smaller units sizes in the city and PMA relative to the county. The subject will offer one- to two-bedroom units targeting local seniors.

Senior Household Trends

In 2010 the highest concentration of senior households among all submarkets is in the PMA at 23.4 percent relative to the lowest rate among submarkets in the city at 19.7 percent and 23.1 percent in the state. Between 2010 and 2020 ESRI estimates that senior households increased in all areas. Over this period senior households in the PMA increased at an annual rate of 3.7 percent while increasing in the county at a rate of 4.1 percent. The highest rate of growth among all submarkets was in the city at 4.8 percent relative to an overall increase in the state of 3.5 percent annually. Between 2010 and 2025 ESRI estimates that senior households increased in all areas. The highest rate of growth among all submarkets is forecasted in the city at 4.4 percent relative to an overall increase in the state of 3.3 percent annually. The overall total forecasted change over this period is: 9,239, 8,474, 22,595 and 257,130 in the city, PMA, county and state respectively. Between 2010 2025 ESRI forecasts senior renter households will increase in the PMA despite with a decrease in the renter penetration rate over this period and relative to a increase in overall senior households.

Household Income

Median household income within all areas is estimated to have increased at a tepid annual rate between 2010 and 2020, increasing below the rate of inflation, suggesting a loss of purchasing power. The income level within the PMA is the highest among the three submarkets. ESRI forecasts continual tepid growth for all areas through 2025, with income forecasted to increase at a 1.6 percent annual rate within the PMA over this period.

Median Household Income

	City of Johns Island	PMA	County of Charleston	State of SC
2010 Median Household Income	\$57,603	\$62,625	\$54,931	\$43,939

The subject will offer one- to two-bedroom units targeted at seniors. The table below presents household income by tenure for senior (ages 65 and over) households. Senior housing by income tenure is not available for the PMA. As a result, estimates below are based on extrapolations considering household income distribution by age, household growth, inflation rates and tenure. In particular, household income distribution based on the most recent year HUD tabulations for the county and 2010 Census income distribution data for the PMA is applied to forecasted households for 2020 and 2023. Additionally, these income distributions are inflated to current year dollars based on the Consumer Price Index.

Section 8: Demand Analysis

Utilizing methodology provided by SCSHFDA, demand estimates for the proposal are outlined in the following pages based on qualified income ranges for the proposal. Income ranges are based on an affordability ratio of 35 and 40 percent of income to gross rent for family and senior projects respectively, and maximum LIHTC rents and income limits for Charleston County. Based on South Carolina requirements, demand estimates are measured from two key sources: new renter household growth and demand from existing households and elderly owner households converting to rentership for senior projects. Demand from this source is capped at 20 percent of total demand and MAP has utilized a 2.0 percent movership rate (historically utilized in South Carolina) for senior owners converting to renters. The resulting calculations are illustrated in the following tables and discussed below.

Demand by bedroom is derived from the individual income ranges by bedroom by income targeting. Specifically, the income range is based on beginning gross rents by bedroom size and maximum income by income target.

Capture Rates

From the LIHTC demand calculations, capture rates provide an indication of the percentage of annual income-qualified demand necessary for the subject property. Lower capture rates indicate generally deeper markets, thus reducing risk and hastening potential absorption periods.

The subject will operate with a project based subsidy open to tenants ages 62 years and older. Demand calculations for the subject operating both with and without the project based subsidy are presented. Since rents are over programmatic limits, demand calculations under a LIHTC scenario are based on maximum allowable gross. A capture rate of 10.0 percent for the project operating with the project based subsidy was determined based on the demand calculations outlined in the following pages (including renter household growth, substandard units and overburdened rental housing potential). The capture rate is within the threshold rate of 30 percent. Under a LIHTC scenario (with rents at maximum gross) the capture rate for the project is also within threshold rates. The capture rate for the proposal should be considered to provide further evidence of potential demand for the subject.

Absorption Rate

Oakside Apartments indicated absorption of 19 units per month for 38 units. However, this is a general occupancy LIHTC project relative to the proposal's senior targeting and with all units under subsidy. MAP has utilized movership ratios from the American Housing Survey as well as estimated "capture" rates among these income eligible households to estimate absorption. With the project based subsidy in place the subject should be absorbed within 6 months of market entry. Under a LIHTC scenario the subject would not be fully absorbed within 12 months of market entry absent a reduction of rents.

Section 9: Supply Analysis and Characteristics

Local Rental Market Analysis

MAP completed a survey of existing rental projects within the market area in July 2020. Leasing specialists of developments were contacted to identify rental housing trends as well as the most competitive projects within the area—given the senior tenancy of the subject both family and senior projects were included in the analysis. Updated information could not be obtained for Oakside Apartments, so information from a January 2019 survey is utilized. Additionally, the area was surveyed regarding current developments under construction; pipeline projects are detailed below. The overall occupancy rate for the surveyed projects was 96.7 percent with LIHTC projects reporting 98.9 percent and senior only projects reporting 100 percent occupancy—all rates are indicative of very strong demand for rental housing and supportive of the proposal.

For those facilities providing information, the rental stock surveyed was weighted toward one- and two-bedroom units, which represent approximately 17 and 41 percent, respectively, of the surveyed rental stock. In terms of number of projects, the surveyed rental market is weighted to market rate projects. The average build year for the surveyed facilities was 2003.

Comparable Project Analysis

The proposal will be new construction, offering senior apartment units operating with a project based subsidy covering all units, with tenants paying 30 percent of income to rent. Within the survey only Ashley Arms offers subsidized units, with 76 of 100 units operating with a project based subsidy—this project reported 100 percent occupancy and a 200 person wait-list offering strong evidence of demand for projects operating with a project based subsidy. Since the subject will operate with a project based subsidy, LIHTC rents are only applicable in the unlikely event the subject was to lose its project based subsidy.

The subject is analyzed as it would operate both with and without the project based subsidy in place. Under a LIHTC scenario the most comparable projects to the proposal include units operating under income restriction guidelines within or near the market area and serving a senior tenancy. MAP has selected the most comparable projects based on proximity, unit type and appeal/condition—these projects

comprise the competitive set. Only one senior LIHTC project was located in the market area, as result a general occupancy LIHTC projects deemed insightful to the subject are also included in the competitive set. The overall occupancy rate for the most comparable projects is 100 percent with all projects reporting wait-lists for occupancy indicating very strong demand within the area. Detailed information on competitive set projects deemed to provide the most insight to the proposal operating under LIHTC guidelines are presented on the following pages.

In terms of unit appeal, it is assumed the subject will be comparable or superior to existing competitive set projects with a competitive amenity package, unit size, quality of construction and design. The proposal's site is assessed as comparable to competitive set projects. No premium was evident for senior projects, so no adjustment for senior only tenancy was made. Based on the above analysis, rents for the proposal would be above programmatic limits under a LIHTC scenario but given 50 percent AMI targeting maximum gross rents would be easily achievable within the market under a LIHTC scenario. High occupancy among both surveyed and comparable projects offer support for the proposal.

Impact on Existing LIHTC Housing

The introduction of the proposal will have no long-term negative impact on existing surveyed LIHTC projects. Strong demand is evident among existing competitive set projects with reported occupancy at LIHTC projects of 98.9 percent. Strong demand in the overall rental market, continued household growth and ongoing obsolescence among housing in the area will fuel demand for the subject.

Competitive Environment

Credit restrictions particularly for lower income buyers, as well as upfront money cost have made purchasing a home outside the reach of potential buyers who would fall within the qualified income range. Thus, competition between rental and ownership options are limited for the subject within the qualified income range, making rental housing the most viable option for low to moderate income families.

Pipeline Considerations

No comparable units in the planning stages were located within the area.

Market and Achievable Rent

Market and achievable rents for the subject are illustrated below. These rents were estimated based on competitive positioning of the project in the area. An analysis utilizing both LIHTC and market rents is presented on the following page to help illustrate the competitive positioning of the subject and its positioning as a hypothetical market rate project and in comparison to similar LIHTC projects. Rents are adjusted based on appeal (including location, amenities and unit design), included utilities, unit size and where applicable by maximum allowable gross and a minimum 10 percent market advantage. Site location, condition and appeal scores are relative to the subject (i.e., the subject is always rated as 5). Rents are not projected to market entry. Based on these analyses, the subject's LIHTC rents as proposed would be above maximum gross under a LIHTC scenario (and thus would need to be lowered under a LIHTC scenario).

Estimated achievable LIHTC and hypothetical market rent represent an assessment of what a comparable unit is receiving within the market. It is not an endorsement of rent at that level as the project was analyzed considering contract rent. Changes in contract rent will impact absorption, demand statistics and competitive positioning of the proposal and would necessitate additional analysis.

	AMI Target	Contract Rent	Est. Achievable LIHTC Rent	Est. Market Rent	Market Advantage
Summary 1 BR					
1 BR-Apt	50%	\$1,050	\$610	\$1,249	16%

Section 10: Interviews

MAP surveyed local apartment managers in the course of market study completion and surveyed recent LIHTC allocations within the PMA (summarized in a preceding section).

Section 11: Recommendations and Conclusions

Based on the analysis within this report, the proposal will be successful as is; no changes are deemed necessary from a market standpoint. The proposal is the construction of new senior units operating with a project based subsidy covering all units. The site is located in an attractive location in close proximity to Charleston, near existing residential, amenities and services. Capture rates for the proposal indicate sufficient market depth to absorb the proposal. Local economic conditions have shown job gains the last 10 full years. However, at the time of completion of this report, the United States and global economy are experiencing a tumultuous period marked by increasing unemployment claims as a result of shelter in place orders in various states. The impact of this will likely be significant in the near term despite government efforts to mitigate the impact through stimulus and other preventative measures. Analysis throughout this report is based on economic conditions returning to growth and greater stability at the time of market entry for the proposal—however residual impacts may be felt in markets with rental housing in high supply relative to demand and in particular for projects positioned aggressively. Since the proposal operates with project based subsidy covering all units, it is largely insulated from economic instability. Households in the PMA have expanded in the past decade in the PMA and are forecasted to increase through 2025. As a result of the analysis within the report, the development of the proposal to more adequately serve the PMA's population is recommended.

Section 12: Qualifications of the Market Analyst

CHRIS VANCE

EDUCATION:

Michigan State University

Master of Arts, Economics

- Concentration in Industrial Organization
- Doctorate level curriculum

Oakland University

Bachelor of Science, Economics

- Concentrations in Finance and Computer Science
- Graduated with Honors

EMPLOYMENT HISTORY:

MARKET ANALYST PROFESSIONALS, LLC, a real estate market research company

Founder (12/03 to Present)

- Founder
- Custom report development.

COMMUNITY RESEARCH GROUP, LLC, a real estate market research company.

Market Analyst/Consultant (2/00 to12/03)

- Prepared real estate market feasibility studies considering site characteristics, economic and demographic trends, market forecasts and project guidelines.
- Developed analytical tools and improved methodologies.
- Provided project recommendations based on analysis of market area.
- Gathered information utilizing secondary market research and through personal interviews.

J.D. POWER AND ASSOCIATES, an automotive marketing information firm.

Analyst-Economic Analysis in Forecasting Group (6/98 to 9/99)

Senior Analyst-Economic Analysis in Forecasting Group (9/99 to 2/00)

- Wrote detailed analysis of economic, political and automotive market conditions of global economies for monthly, quarterly and annual reports.
- Developed forecasting models and analytical tools to enhance forecasting capabilities using computer, data collection and analysis skills.
- Analyzed the impact of automotive market dynamics on automotive sales and competition, including pricing and profitability analysis.
- Forecasted economic growth and automotive sales for North and South America and Asia.
- Traveled to Asia and Europe as needed to participate in the company's strategic growth and product positioning decisions.

Section 13: Signed Statement Requirements

I affirm that I have made a physical inspection of the market and surrounding area and the information obtained in the field has been used to determine the need and demand for LIHTC units. I understand that any misrepresentation of this statement may result in the denial of further participation in the South Carolina State Housing Finance and Development Authority's (SCSHFDA) programs. I also affirm that I have no financial interest in the project or current business relationship with the ownership entity and my compensation is not contingent on this project being funded. This report was written according to the SCSHFDA's market study requirements. The information included is accurate and can be relied upon by SCSHFDA to present a true assessment of the low-income housing rental market.

Approved Market Study Provider

Acknowledgment, Release and Waiver of Liability

In consideration for being an approved market study provider, I acknowledge and agree to the following:

- 1. I, Chris Vance, am a duly authorized representative of Market Analyst Professionals. As an approved Market Study Provider for the Low Income Housing Tax Credit Program as administered by the South Carolina State Housing Finance and Development Authority (the "Authority"), my organization may prepare market studies on behalf of developers to be submitted as part of their application for Low Income Housing Tax Credits.
- 2. I understand and agree that any market study and applicable attachments submitted to the Authority are subject to a request for disclosure and I expressly consent to such disclosure on behalf of my organization.
- 3. I understand and agree that the Authority may upload any market study and applicable attachments to its website and I expressly consent to such disclosure on behalf of my organization.
- 4. On behalf of my organization, I agree to release, waive, discharge and covenant not to sue the Authority and its officers, agents, or employees from any and all liability, claims, demands and causes of action whatsoever arising out of or related to the Authority's use or disclosure of any market study and applicable attachments.
